01 Introduction

The changes brought about by the advance of new technologies, as well as the trends that have been emerging in the market as a result, have meant that business models have had to adapt their strategies to them, if they are to achieve profitability through a service that lives up to the rigor and excellence of their respective areas. The same has happened in the dental sector, where its professionals are increasingly demanding the offer of qualifications that will enable them to keep up to date with the latest developments in the management and effective running of their clinics. And to do so through an eminently practical experience, they can count on this program, which offers a 120-hour stay in a prestigious center with which they will be able to get up to date with the most relevant business issues for the management of their entity at the highest level.

Would you like to be part of a top level clinical and management team? TECH gives you the opportunity to achieve it with the launch of this Internship Program”

The administration and management of dental clinics has aroused great interest in recent years, especially in those professionals who have realized the importance of knowing how to properly manage the resources required by this type of centers, in order to turn them into the business of the future, ensuring at all times to apply the measures of business management. Along with this new environment, the approach of the dental clinic as an organizational structure is gaining special strength, and it must have a directive figure that attends to and dominates all the areas of management and direction such as human resources, marketing, quality, time management, planning, accounting among others.

Based on the above, the new scenarios in this field of action require professionals willing to take on new challenges and make the pertinent decisions. Therefore, the need to launch this program to the market. With this Internship Program you will have an expanded vision of the new techniques to the daily activity of professionals through a thorough design by other specialists in the sector. Throughout the 3 weeks of instruction, the student will be able to get up to date on the realization of different techniques, with security and solvency.

The Internship Program in Dental Clinic Management and Administration is an academic project committed to updating high quality professionals. It is a practice designed by experts in each specific subject, who are faced with new challenges every day, which will provide them with the latest developments and techniques in the management of a dental center of excellence. Thus, after passing this period, you will master the most innovative and effective strategies, which you will be able to implement in your practice from the very first moment to raise your clinic to the top of the dental sector.

02

Why Study an Internship Program?

Numerous studies carried out in the pedagogical area have determined that practice is the best way to update knowledge. For this reason, TECH invests in the design of programs such as this one, in order to provide graduates with the possibility of accessing a stay in which they can not only catch up with the latest developments in their profession, but in which they find the opportunity to be part of a great team of professionals, which will guide them for an effective and guaranteed update.

A program that will give you the keys to efficiently manage the warehouse and the request of resources through your own experience in this activity"

1. Updating from the latest technology available

Access to the practical part of this program guarantees that the graduates will be able to make use of the most sophisticated and innovative management and business management tools available on the market. As a result, they will be able to work on their management during this period, learning in detail their characteristics, as well as the best strategies to master them effectively in just 3 weeks.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

Thanks to the experience of your colleagues and the tutor who will accompany you during the 120 hours of this Internship Program, you will be able to get the most out of the program. You will be able to make use of their advice in order to deepen your knowledge of the most relevant aspects for a top-level practice in the future, when the graduates will have to face the direction and management of their own dental company.

3. Entering First-Class Clinical Environments

The clinic to which the graduates will have access with this Internship Program is considered one of the best in the panorama of business activity in the dental sector. Thus, the graduates who accesses this program will be able to get up to date with the most effective business strategies that have placed it at the top of the sector, thanks to a practice based on current market trends and the best marketing techniques.

4. Putting the acquired knowledge into daily practice from the very first moment

All the concepts that the graduates handle during the 3 weeks of practical training can be perfectly applicable to the different business contexts that the dental professional may encounter once the training is completed. Thus, TECH guarantees an exhaustive and ideal preparation for the business activity in the different areas of this sector.

5. Expanding the Boundaries of Knowledge

TECH does not believe in limits and therefore does not set them for its graduates. An example of this is the selection of international companies, thanks to which they can access the practical stay in their facilities, being able to catch up on trends and strategies that are marking the forefront in other parts of the world and adding to your resume a significant plus based on logic, critical and comparative vision and professional quality.

*You will have full practical immersion
at the center of your choice"*

03

Objectives

The general objective of this Internship Program in Dental Clinic Management and Administration is to provide the graduates with the possibility of using the theoretical, methodological and analytical tools necessary to optimally manage and direct their own clinical-dental businesses, effectively differentiating themselves in a highly competitive environment. All this through the effective incorporation and mastery of the skills of strategy and vision to facilitate the identification of new business opportunities through the application of the most effective business guidelines to adapt the entity to market trends.

General Objectives

- ◆ Use theoretical, methodological and analytical tools to optimally manage and direct their own clinical-dental businesses, effectively differentiating themselves in a highly competitive environment
- ◆ Incorporate strategy and envisioning skills to facilitate the identification of new business opportunities
- ◆ Promote the acquisition of personal and professional skills that will encourage students to undertake their own business projects with greater confidence and determination, both in the case of initiating the creation of their clinical-dental business, as well as in the , case of innovating in the management and direction model of the clinical-dental business they already have
- ◆ Professionalize the clinical-dental sector by means of continuous and specific updating in the field of management and business administration

Specific Objectives

- ◆ Describe the current situation and future trends of dental clinic management and administration to be able to define objectives and differentiating successful strategies
- ◆ Become familiar with the terminology and concepts specific to business management and administration to effectively apply them to dental clinics
- ◆ Discover and analyze the key points of successful business models of leading dental clinics in order to increase the motivation, inspiration and strategic mindset of future managers
- ◆ Learn to effectively identify and describe the value proposition of the dental practice business, as a solid basis for establishing a subsequent marketing and sales strategy
- ◆ Learn the most widely used validation method for the creation and innovation of business models in all business sectors, with practical and specific application in the clinical-dental sector
- ◆ Describe the language, concepts, tools and logic of marketing as a key business activity for the growth and positioning of the clinical-dental business
- ◆ Delve into the digital communication tools that are essential to master in this era 2.0, in order to reach through the most appropriate channels the value proposition of the dental clinic to the target patients
- ◆ Design targeted marketing and communication campaigns, being able to measure their impact through easy-to-interpret metrics

04

Educational Plan

The practical stay of the present program in Dental Clinic Management and Administration will be carried out in a prestigious center with a duration of 3 weeks, from Monday to Friday and with a day of 8 consecutive hours of practical experience next to an assistant specialist. This stay will allow professionals to see the daily work of a director, attending to all the managerial aspects that this type of position requires and taking as an example their day-to-day work in order to implement the latest strategies for effective management and leadership.

In this completely practical internship program, the activities are aimed at developing and perfecting the skills necessary to provide dental care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competences for the praxis of management and direction of dental clinics (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Dental Clinic Management and Administration** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
