01 Introduction

The multiple possibilities of bioceramic materials in the field of regenerative endodontics have led to modulate inflammation processes and achieve bone regeneration. In this sense, both technical advances and their effectiveness have led to a greater appreciation of dentists by patients. Faced with a discipline that seeks continuous improvement through innovation, TECH has created a 100% practical program that allows professionals to update their knowledge through a stay in a leading clinical center. All this in only 3 weeks and by the best specialists in Endodontics and Apical Microsurgery.

Incorporate into your daily practice the most relevant advances in endodontic treatments thanks to a unique practical experience in the academic panorama"

Endodontic microsurgery, bioceramic materials used in endodontics, as well as differential diagnosis or the relevance of pulpal vital therapy are currently the central and progressive topics in the field of dentistry. A specialty that in recent years has managed to improve treatments, applying much more effective techniques, more durable and resistant materials and reducing pain in the patient after interventions.

All this represents an important advance in the field of Endodontics and Apical Microsurgery, where the patient must have maximum guarantee of the results that will finally be obtained. In view of these advances, TECH has created an Internship Program that provides a real response to the needs of professionals.

In this way, the professional who enters this program will do so in the hands of the best specialists in this field and a prestigious clinical center. An ideal environment to update your knowledge and enhance your skills and abilities in Endodontics and Apical Microsurgery. A 100% practical, unique experience that you can only do with TECH.

“

This Internship Program will take you through this program in a dental center equipped with the latest technology”

02

Why Study an Internship Program?

Undoubtedly, practice is one of the determining factors in the professional development of the dentist. Therefore, for specialists who already have advanced knowledge, TECH offers a program that meets their real needs for updating. That is why it has created this Internship Program that will lead, during 3 intense weeks, to know, first hand, the most outstanding advances in the field of Endodontics and Apical Microsurgery. All this, in a first class clinical environment and together with real specialists in this field. In this way, this institution guarantees access to new, relevant and directly applicable information in daily practice in this area.

Enter into real clinical environments and maximum demand to deepen, with the help of the best specialists, in the latest advances in Endodontics and Apical Microsurgery"

1. Updating from the latest TECHNIQUES available

Advances in endodontic microsurgery or bioceramic materials in endodontics have improved the treatments and procedures used, significantly improving the health and well-being of the patient. For this reason, and with the objective of bringing the specialist closer to this technology, TECH presents this Internship Program with which the professional will enter a state-of-the-art clinical environment, accessing the techniques, materials and state-of-the-art equipment used in the performance of endodontics and Apical microsurgery.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

During this process, the professional will be guided by authentic experts in the performance of endodontics and Apical microsurgery, which is a first class guarantee and a guarantee of updating. With a designated tutor, the professional will be immersed in a prestigious clinical environment, where they will be able to work with real patients, which will allow him/her to incorporate the most effective procedures and approaches in this field into their daily practice.

3. Entering First-Class Clinical Environments

TECH maintains its philosophy of offering professionals a program of the highest level and quality, which is why it carefully selects all the centers available for Internship Programs. In this way, the specialist will have guaranteed access to a prestigious clinical environment in the area of Endodontics and Apical Microsurgery. In this way, you will be able to check the day to day protocols, diagnostic, evaluation and intervention procedures carried out in this field, always following the latest scientific-technical advances.

4. Putting the acquired knowledge into daily practice from the very first moment

TECH has created an educational program adapted to the daily work of the specialist and that responds to the need for real updating in a reference clinical environment. In this sense, this institution offers a 100% practical training that allows you to get in front of state-of-the-art procedures in the field of Endodontics and Assisted Reproduction Apical Microsurgery and, best of all, to take it to the professional practice in only 3 weeks.

5. Expanding the Boundaries of Knowledge

TECH offers the opportunity to carry out an Internship Program in centers that stand out for their excellent facilities, equipment and professionals. This will allow the professional to catch up with the best specialists in a unique clinical environment. An excellent opportunity that can only be realized through this academic institution.

“

You will have full practical immersion at the center of your choice”

03

Objectives

The Internship Program in Endodontics and Apical Microsurgery seeks to facilitate the practice of the professional dedicated to the field of dentistry. All this is carried out in a dental center equipped with the latest advances and innovative treatments in this field. In this way, you will be able to update in a practical way the skills necessary to provide quality treatment.

General Objectives

- ◆ To update technical and procedural knowledge using the latest technology applied to patients requiring Endodontics and Apical Microsurgery
- ◆ Incorporate the most effective methods and approaches in Endodontics and Apical Microsurgery into daily work with specialized professionals
- ◆ Master the main solutions to problems in emergency situations in the event of an operative accident in Endodontics

Specific Objectives

- ◆ Take a correct clinical history in Endodontics, taking into account the risk diseases, as well as the different radiological techniques to make a correct diagnosis
- ◆ Apply the different treatment options for the open apex tooth
- ◆ Perform the procedure for insulation by means of a rubber dam
- ◆ Perform a correct shaping of the root canal system through different techniques and instruments
- ◆ Perform a correct disinfection of the root canal system through the different dispensing techniques and irrigants
- ◆ Perform canal obturation according to the appropriate technique for each clinical situation
- ◆ Perform endodontic retreatment by removing existing root anchors if necessary
- ◆ Solve possible operative accidents in Endodontics
- ◆ Describe the process of performing a correct reconstruction of the endodontic tooth using the different materials and intra-radicular anchors available
- ◆ Apply the techniques and agents when performing teeth whitening
- ◆ Apply radiological techniques for endodontic diagnosis
- ◆ Perform the different access cavities according to the clinical situation
- ◆ Use the RX. Conventional
- ◆ Correct use of LEAs
- ◆ Perform chemical cleaning of the root canals by activating the irrigants and of irrigants
- ◆ Perform canal filling using thermoplastic techniques
- ◆ Perform removal of threaded metal poles, cast stubs, and fiberglass or carbon fiber poles using ultrasonics
- ◆ Apply incision techniques in Apical Surgery
- ◆ Perform retro-preparation and retro-obturation in Apical surgery
- ◆ Apply knowledge in regeneration in Apical Surgery
- ◆ Carry out the reconstruction of the endodontic tooth knowing that the use of intra-radicular anchors is not always necessary
- ◆ Perform laser tooth whitening

For every professional it is essential to develop a sense of security in their patients, that is why this program provides you with the latest advances in Endodontics and Apical Microsurgery"

04

Educational Plan

The Internship Program in Endodontics and Apical Microsurgery consists of a three-week practical placement in a prestigious dental center. In addition, a Monday through Friday schedule with eight-hour consecutive workdays. All this guarantees a complete education with a highly experienced specialist. In this way, the professional will be able to treat real patients with significant oral health problems that compromise their wellbeing and esthetics.

In this training proposal, completely practical in nature, the activities are aimed at developing and perfecting the skills necessary to provide dental care in areas and conditions that require a high level of qualification, and are oriented towards specific training for the practice of the activity, in an environment of safety for the patient and high professional performance.

In this way, TECH offers a unique experience, to learn by working in an innovative professional environment, where the most advanced materials and the most precise techniques will be put into practice. This is a new way of understanding and integrating health processes, turning a reference center into a scenario for the improvement of professional competencies.

Practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of the professors and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of dentistry (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their completion is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

Module	Practical Activity
Diagnosis, Treatment Plan and Dental Anesthesia	Perform Clinical Examination and Differential Diagnosis of Pulpal Pain
	Perform Conventional radiological examination: occlusal and panoramic, interproximal and periapical radiographs
	Computerized dental xrays CBCT
	Identify periapical lesions from CBCT in Endodontics
	Perform Pre-surgical planning of CBCT in Endodontics
	Carry out emergency treatments in Endodontics
	Put into practice the different anesthesia techniques on the tooth to be endodontized
Opening, location and morphology of root canal system	Access cavities in uniradicular teeth and access root canal system
	Perform cavities in molars and access of root canals
	Perform the Root pulp extraction and cleaning
	Master the techniques of rubber dam installation, as well as the different types of rubber dams
Current protocol in canal irrigation	Perfectly perform therapeutic considerations on irrigation in vital and necrotic teeth
	Assess and consider the use of irrigating substances
	Application of irrigation solutions
	Removing the smear layer and performing the apical Perform permeabilization (PATENCY)
Root canal system sealing	Use drying techniques and dentin preparation prior to obturation
	Use different materials for canal obturation such as: gutta-percha tips, classic sealing cements and biocement sealants
	Practice Technique of Obturation with Gutta-Percha Tips (Lateral Condensation)
	Perform Techniques of Obturation with Thermoplasticized Gutta-Percha (Vertical Condensation with Hot Gutta-Percha)
	Use thermoplasticized gutta-percha filling materials and techniques
	Master the apical sealing technique
	Conduct postoperative pain follow-up and final patient information
Use of Calcium Hydroxide and its Ions in Current Dentistry	Master the methods of pulp prevention in young molars and other teeth: pulp curettage, pulpotomy or partial pulpectomy
	Use and management of biomaterials in modern dentistry
	Use calcium hydroxide to solve pathologies and other intra-duct medications and other intra-duct medications
	Use biomaterials (pulp protectors, repair cements, sealing materials) according to the specific characteristics of the patient

05

Where Can I Do the Internship Program?

TECH aims to offer quality education to its students and, for this reason, gives them the opportunity to take this internship program in a variety of centers. As such, it is a unique opportunity for dentists to advance their careers in this sector.

“

Take your career to the next level and develop the skills to advise patients on the best course of treatment at a prestigious center”

The student will be able to do this program at the following centers:

Dentistry

Clínica Go Gaztambide

Country	City
Spain	Madrid

Address: Calle de Gaztambide, 52, bajo derecha, 28015 Madrid

Dental and esthetic care center

Related internship programs:

- Periodontics and Mucogingival Surgery
- Orthodontics and Dentofacial Orthopedics

Dentistry

Clínica Dental Diseño Sonrisa

Country	City
Spain	Almería

Address: Av. del Sabinar, 80, 04740 Roquetas de Mar

Oral health and esthetics care center

Related internship programs:

- Endodontics and Apical Microsurgery
- Implantology and Oral Surgery

Dentistry

Clínica Dr Dopico

Country	City
Spain	Asturias

Address: C. de la Libertad, 1, 1ºB, 33180 Noreña, Asturias

Center for dental care and dental esthetics

Related internship programs:

- Adhesive Aesthetic Dentistry
- Dental Clinic Management and Direction

Dentistry

Sevilla Dental

Country	City
Spain	Seville

Address: C. Reyes Católicos, 15 Derecha, 41001 Sevilla

Oral health and esthetic dentistry assistance center.

Related internship programs:

- Orthodontics and Dentofacial Orthopedics
- Endodontics and Apical Microsurgery

Dentistry

Clínica Dental Los Bermejales

Country	City
Spain	Seville

Address: Avenida Del Reino Unido Local, Esquina, C. Colonia, 41012 Sevilla

Oral health and esthetic dentistry assistance center.

Related internship programs:

- Orthodontics and Dentofacial Orthopedics
- Endodontics and Apical Microsurgery

Dentistry

Arte Sano Dental

Country	City
Spain	Valence

Address: Passeig de la Ciutadella, 11, 46003 Valencia

Dental center specializing in implantology and oral and dental treatment.

Related internship programs:

- Implantology and Oral Surgery
- Dental Clinic Management and Direction

Dentistry

ICD Policlínica

Country	City
Spain	Valence

Address: Av. de Jacinto Benavente, 2, bajo, 46005 València, Valencia

General Conditions

Civil Liability Insurance

The main concern of this institution is to guarantee the safety of both the interns and the other collaborating agents required in the Internship Program processes in the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Endodontics and Apical Microsurgery** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.
