# 01 Introduction

Society's growing awareness of oral health and hygiene and the technological advances related to the clinical diagnosis and treatment of oral and maxillofacial pathologies are forcing dental professionals to update and apply the latest developments in the sector. Therefore, TECH has created this degree, in which in 3 weeks the professional will be integrated into an expert and multidisciplinary team to get up to date with the new updates available, thus being able to transfer them to their own daily practice in a comprehensive and efficient way.

*Apply in your daily practice the new updates on Oral Medicine thanks to this totally practical and effective experience offered by TECH"*

Society's concern for oral health and hygiene has made Oral Medicine an essential branch for dentists to delve into. This discipline allows professionals to effectively address the variety of pathologies existing in the oral cavity, such as mucosal lesions, salivary gland disorders or orofacial pain. In this way, it can offer patients the latest in oral techniques and procedures. Therefore, this degree is a key tool that includes a 120-hour stay in a clinical center of reference in the field of Oral Medicine.

Thus, during 3 weeks the graduate will become part of a team of top level specialists, with whom he/she will work actively in the management of the different patients who come to their offices during this period. As the dental professional expands his knowledge, he will not only master the latest techniques, but will be able to apply them to his daily practice, thus obtaining a complete review of the patient's oral anatomy in the most innovative way possible.

During the stay, you will have the support of an assistant tutor, who will ensure that all the requirements for which this Practical Training has been designed are met. Based on this, the specialist in Dentistry will update the management of the most innovative technology, as well as deepen in the various specialties that encompass this branch such as periodontics, maxillofacial surgery, geriatric dentistry, and even other fields related to medicine such as dermatology or oncology. In this way, you will be able to apply the most advanced diagnostic methods to your daily work, offering an efficient and quality service.

## Why Study an Internship Program?

In the medical field, the professional must know and put into practice the latest innovations and procedures developed in his field. This is why TECH has designed a unique and disruptive academic product in today's educational landscape. This is because it not only provides the dental professional with new knowledge based on the latest scientific studies, but also offers the tools to put it all into practice. Thus, the dentist will enter a real clinical environment for 3 intensive weeks, integrating with a multidisciplinary team, where he/she will see how to apply the latest advances in the area of Oral Medicine to his/her own daily clinical practice. It is, therefore, a unique academic opportunity in which the degree offers real learning adapted to the needs of the professional.

*TECH is the only university that offers you the possibility of entering real clinical environments. An opportunity to deepen the field of Oral Medicine"*

### 1. Updating from the latest technology available

Oral Medicine has gained great importance in recent years thanks to the relationship that has developed between Medicine and Dentistry. For this reason, and with the aim of bringing the dental professional closer to the latest advances in this field, TECH presents this Practical Training with which the dentist will enter a cutting-edge clinical environment, accessing state-of-the-art procedures.

### 2. Gaining In-Depth Knowledge from the Experience of Top Specialists

A team of highly prestigious experts will accompany the dental specialist throughout the entire practical period, guaranteeing a safe and high quality update. Likewise, with a specifically designated tutor, the student will be able to assist real patients, which will allow him/her to incorporate the most effective novelties in Oral Medicine in his/her daily practice.

### 3. Entering First-Class Clinical Environments

All centers available for hands-on training have been carefully selected by TECH. This guarantees the professional access to a prestigious clinical environment in the field of Oral Medicine. In this way, you will be able to analyze the day-to-day in a demanding and rigorous work environment, with the use of the latest alternatives available in this sector.

#### **4. Putting the acquired knowledge into daily practice from the very first moment**

TECH offers a new learning model, 100% practical, that allows you to get in front of the latest developments in the area of Oral Medicine. This allows the dentist to put all that has been learned into professional practice in just 3 weeks.

#### **5. Expanding the Boundaries of Knowledge**

The possibilities offered by TECH are so wide that this Practical Training can be carried out not only in centers of national importance, but also internationally. In this way, the dentist can nourish knowledge with the best experts from different continents. A unique opportunity that allows professionals to expand their knowledge frontiers.

*You will have full practical immersion  
at the center of your choice"*

# 03 Objectives

The main objective of this program is to bring the dentist closer to the latest developments in Oral Medicine in an exclusively practical and intensive way. Therefore, during a 3-week stay in a prestigious clinical center, the dentist will deepen his knowledge in this field with renowned professionals.

## General Objectives

---

- ◆ Master the latest advances and technological applications in the field of Oral Medicine, highlighting the detection and treatment of oral and maxillofacial pathologies
- ◆ Incorporate into daily practice the most effective methods and techniques to improve the localization and clinical management of oral diseases
- ◆ To deepen in the specific approach required by a patient in the clinical setting of Oral Medicine

*The great evolution of Oral Medicine demands a continuous updating by the professional, something that will be achieved with this program in a comfortable and simple way"*

## Specific Objectives

---

- ◆ Learn how to take a complete and detailed clinical history, going through all its phases for both health and legal purposes
- ◆ Apply all the complementary diagnostic tests, as well as the tests, techniques and methods that validate them
- ◆ Learn and manage biopsy techniques, indications and contraindications, as well as various staining techniques
- ◆ Master a technical, theoretical and professional update that will allow you to make a difference at the professional level
- ◆ Recognize and differentiate bacterial, viral and fungal infections, as well as their treatments, evolution and etiology
- ◆ Diagnose different vesicular-ampullary diseases, being able to break them down according to their etiology and epidermal location
- ◆ Thoroughly identify the sequelae, prognosis and diagnosis of various systemic diseases, as well as their clinical management and oral manifestations
- ◆ Identify and distinguish the different pathologies according to their location
- ◆ Learn and handle the necessary terminology and pharmacology to elaborate adequate treatment plans for any of these pathological manifestations
- ◆ Manage prevention, rehabilitation, treatment plans and patient monitoring

# 04

## Planning of Teaching

The Practical Training of this program in Oral Medicine is composed of a practical and intensive stay in a prestigious center, lasting 3 weeks, from Monday to Friday with 8 consecutive hours of Practical Training. This stay allows the student to see real patients alongside a team of experts of reference in the area, applying the most innovative diagnostic procedures and planning the most updated treatment and follow-up for each pathology.

In this completely practical training proposal, the activities are aimed at developing and perfecting the skills necessary to provide a clinical service that includes the diagnosis, treatment and follow-up of various oral and maxillofacial pathologies with quality and qualification. In addition, they are oriented to the specific training for the exercise of the activity, in a safe environment for the patient and a high professional performance.

It is, without a doubt, an opportunity to learn while working in state-of-the-art dental clinical centers, where medicine and dentistry are combined to respond to patients with complex medical conditions. It is a relatively young specialty, which needs the most qualified dentists. Therefore, this Practical Training becomes the ideal scenario for perfecting professional skills.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of the professors and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of Oral Medicine (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

*Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"*

Module	Practical Activity
<b>Diagnostic methods and anatomic pathology of Oral Medicine</b>	To practice the radiography procedure as a diagnostic method in Oral Medicine
	Perform different types of biopsies evaluating their procedure according to the pathology
	Perform specific tests for the study of anatomical and physiological disorders of the diseased and physiological disorders of diseased areas
	To explore elementary lesions, detecting their typology and applying the specific approach to the specific approach to the condition
	Assess primary liquid and solid lesions and secondary lesions
<b>Addressing inflammatory and infectious oral pathologies</b>	Analyze and inspect different types of bacterial infections
	Analyze fungal infections
	Evaluating viral infections
	Analyzing and detecting benign exophytic lesions
	Perform labial, maxillary and mandibular pathology practices and examinations
	Detect through the development of tests the different types of tongue pathology
<b>Specific handling of special patients</b>	Assessing vesicular-ampullary diseases
	Detect and analyze hematological alterations caused by oral pathology
	Detect and analyze Endocrine alterations caused by oral pathology
	Detect and analyze Digestive alterations caused by oral pathology
	Detect and analyze Pulmonary alterations caused by oral pathology
<b>Approach to Salivary Gland and TMJ pathologies</b>	Assess dependent patients and detect possible pathologies with an effect on other organs
	Analyze saliva and salivary gland anatomy
	Assess the types of salivary gland malformations and their pathologies
	Perform Sialoadenitis test
	Perform Sialolithiasis test
<b>Bone lesions, jaw cysts and benign tumors</b>	Perform Sialoadenosis test
	To analyze bone tissue and detect possible tumor pathologies
	Perform etiopathogenic assessments in order to detect the origin of an oral pathology
	Assessing maxillary bone infections
	Exploring Developmental Epithelial Odontogenic Cysts
	Exploring Inflammatory epithelial cysts
Inspection Connective tissue and muscular tumors

## General Conditions

### Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

## General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

**1. TUTOR:** During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

**2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

**3. ABSENCES:** If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

**4. CERTIFICATION:** Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

**5. EMPLOYMENT RELATIONSHIP:** The Internship Program shall not constitute an employment relationship of any kind.

**6. PRIOR EDUCATION:** Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

**7. DOES NOT INCLUDE:** The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

# 07 Certificate

This **Internship Program in Oral Medicine** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery\*.

The certificate issued by TECH will reflect the grade obtained in the test.

Title: **Internship Program in Oral Medicine**

Duration: **3 weeks**
