Introduction

There currently is a growing demand for orthodontic treatments, a branch of dentistry that corrects the malposition of bones and teeth through the application of different forces. It is recommended in cases of crowding when the poor position of the teeth prevents proper cleaning. Due to its increasing demand, professionals are turning to further specialization. For this reason this eminently internship program has been designed to provide students with the necessary skills to restore, recover and improve the dental physique of patients and helping them to improve their quality of life. Thanks to the agreement established with the most prestigious clinical centers, students will be able to choose their ideal learning environment. Together with a team of experts and an assigned tutor you will advance in just 3 weeks towards professional specialization.

“

With TECH you will be at the forefront of new advanced techniques in Orthodontics and Dentofacial Orthopedics. In just 3 weeks you will learn in a practical way all the new developments in the area”

People want to look better every day, there is a trend influenced by the new information and communication technologies where they have been marking ideal profiles in terms of dental health and smile design. For this reason, it is becoming more and more common for them to go to a specialist to find the solution to their desires. That is why the specialist, with practical and specialized knowledge, will have a much better chance to stand out in a competitive and global market.

With this Internship Program developed by TECH, the professional will specialize in his own work environment and will learn the most modern techniques, tools and methods that will give him the advantage that will make a difference. This is what this 100% practical program offers you, which will take place in a state-of-the-art clinical center chosen by TECH and with the support of a team of experienced professionals.

That way students will be able to appreciate first-hand the different malocclusive syndromes and craniofacial deformities that merit the use of orthodontics and dentofacial orthopedics to correct certain malformations. They will also be introduced to cases that require treatment depending on patient age. As the program progresses, students will be able to apply retention protocols for different deformities, the principles and mechanisms involved in physiological rebound and recurrence of malocclusions.

The aim of this program is for students to face real situations in an environment controlled by specialists trained in the field. For this purpose, the dental center also places state-of-the-art equipment at the disposal of the students, making their practice as close as possible to a real working environment.

02

Why Study an Internship Program?

The patient seeks to deliver their oral health in the hands of the best specialists. The newest treatments, techniques and forms will be in the daily clinical praxis of the profile that the student will obtain after completing this Practical Training. They will learn about the evolution of treatments in patients who come to the private practice of the clinical center chosen for this program. During 3 intensive weeks, you will be integrated into a multidisciplinary work team, where you will see firsthand both the latest scientific findings in the area and how to apply them. A unique academic opportunity that not only revolutionizes traditional pedagogical systems, but also puts the specialist at the center of the equation to offer him or her learning with real utility and adapted to his or her needs.

Expand your field of action in the area of dentistry by specializing in the practice of Orthodontics and Dentofacial Orthopedics, in 3 weeks with the most knowledgeable specialists"

1. Updating from the latest technology available

The evolution of Orthodontics and Dentofacial Orthopedics in recent years has been amazing, no longer with a metallic smile but with much less visible solutions leaving a free smile in front of a latest technology treatment. In this program you will learn the latest in solutions and treatments, directly in the clinical center chosen for this study.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

You will be accompanied by a specialist as a guide throughout the process, in addition to integrating the multidisciplinary team in the clinical center of reference chosen to carry out the Internship Program. All this will facilitate the incorporation of new models of care for patients in your practice with the most advanced techniques and effective treatments.

3. Entering First-Class Clinical Environments

In order to obtain the best results in the Practical Training, TECH has established the best agreements with modern clinical centers of reference in the area of study. Thus, you will have guaranteed access to the most advanced knowledge in only 3 weeks. You will be able to apply the latest theses and techniques in Orthopedics and Dentofacial Orthodontics to your patients, standing out in the professional environment.

4. Putting the acquired knowledge into daily practice from the very first moment

You will not get a program like this one. TECH has designed an exclusive practical study method that will allow you to immediately apply what you have learned in a prestigious clinical center. This new learning model, 100% practical, allows you to get to grips with state-of-the-art procedures and, best of all, put them into professional practice in just 3 weeks.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of doing this Internship Program, not only in national, but also in international centers. This way, the specialist will be able to expand their frontiers and catch up with the best professionals, who practice in first class centers and in different continents. A unique opportunity that only TECH, the largest online university in the world, could offer.

You will have full practical immersion at the center of your choice"

03

Objectives

With this program, students will learn the techniques used in orthodontics and dental orthopedics, starting with basic processes such as data collection to take medical histories, perform simple radiographies or ultrasounds. All this supervised by a group of experts specialized in this field.

General Objectives

- ◆ Update the theoretical and practical knowledge of the dentist in the different areas of Orthodontics, through evidence-based dentistry
- ◆ Solve problems in new or unfamiliar environments, with a multidisciplinary approach within the context of Health Sciences
- ◆ Integrate knowledge and deal with the complexity of making judgments, while reflecting on the social and ethical responsibilities associated with the application of their knowledge and judgments
- ◆ Demonstrate technical skills and abilities, using the most advanced technical equipment

Specific Objectives

- ◆ Consolidate structural and radiological anatomical knowledge, as well as the practical considerations that students should apply in the diagnosis, prognosis and therapeutic planning of orthodontic patients and those requiring dentofacial orthopedics
- ◆ Recognize oral radiology, intra and extrabuccal, with special emphasis on lateral and frontal skull telerradiography. Students will also receive training in other techniques such as simple radiology, ultrasound, CT, CBCT and MRI, especially for the cervico-facial area
- ◆ Diagnose, classify and treat dental malocclusions caused by dental osseo-dental discrepancy by osseo-dental discrepancy
- ◆ Determine the individual characteristics of patients, both physical, psychological and social
- ◆ Take medical histories, examine patients and take records
- ◆ Identify disorders that require treatment, as well as the ideal age to treat each type: Determine the specific therapeutic objectives of each treatment
- ◆ Classify the different types of microscrews
- ◆ Apply retention protocols for different deformities, as well as the principles and mechanisms involved in physiological rebound and recurrence of malocclusions
- ◆ Identify and prevent or treat risk factors for patient relapse
- ◆ Describe the alterations in the eruption of canines, incisors, premolars and molars
- ◆ Predicting the efficacy and efficiency of the different treatments and the stability of the correction
- ◆ Identify the types of ligatures and their use
- ◆ Create action plans that complement the different treatments in a comprehensive overview of any complications in orthodontics
- ◆ Apply Advanced Treatments in Conventional Orthodontics
- ◆ Intervene in the different types of orthognathic surgery

04

Educational Plan

The Internship Program in Orthodontics and Dentofacial Orthopedics will be carried out in a prestigious center for three weeks, from Monday to Friday, in consecutive eight-hour days in which students will be able to perform different activities supervised by a professional. That way students will be in contact with patients requiring orthodontic treatment.

In this completely practical internship program, the activities are aimed at developing and perfecting the skills necessary to provide dental care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

In this program students will have the opportunity to complete a set of essential activities to improve the abilities and skills that will help them make logical treatment plans that integrate all the therapeutic objectives, as well as design and/or prescribe the appropriate mechanics and therapeutic sequence depending on the type of deformity and the individual characteristics of the patient.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of the professors and other training partners to facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of dentistry (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential”

Module	Practical Activity
Techniques in Diagnosis in Orthodontics and Dentofacial Orthopedics	Perform a Systematic Diagnosis in Orthodontics: First Visits and Clinical Histories, Patient Examinations and Corresponding Record-Taking
	Perform a Staged Orthodontic Diagnosis by Planning Mechanotherapy and Appliances
	Verify the Diagnosis and Treatment of Habits: Atypical Swallowing, Nutritive and Non-Nutritive Sucking Habits, Oral Breathing, Dyslalia and Others
	Participate in the Diagnosis of Craniofacial Growth and Development
	Intervene in the Differential Diagnosis of Etiological Factors and Causes of Malocclusion
Dentofacial Orthopedics Treatment Plan	Apply orthodontic treatments and disorders. Critical Assessment of Results
	Intervene in Premolar Therapeutic Extractions
	Apply stripping techniques as an alternative to tooth extractions, bio-mechanics and bonding of brackets and bands
	Participate in different types of treatment of the bites and physiognomy of the patient's teeth of the patient's dentition
Advanced Treatments in Conventional Orthodontics	Apply Physical Techniques to Accelerate Movement. Microscrew Placement and Activation
	Intervene in the Impacted Teeth Treatment and Other Eruption Disorders: Impacted or Unerupted Teeth and Retained Canines
	Apply esthetic treatments and SAHS treatments in adults and children
	Cement brackets according to the type of malocclusion: cemented in case of deep curve of Spee, cemented in cases of class II molar or cemented in fractured or abraded teeth
	Practice denture alignment and leveling by extrusion and intrusion
	Correct molar relationship: distalization, protrusion and overbite
	Use Fixed and Removable Retainers
Orthodontic Techniques	Apparatus Manufacturing Using the Hiro System, the Incognito™ system
	Perfecting Bracket Base
	Case Reception and Cabinet Preparation
	Use of Ligatures: Self-Retaining Slot, Conventional Elastic Bandage, Elastic, Metal Bandage, Overtie, Steel Overtie, Power Tie, , Elastic Lasso Chicane
	Selection and Initial Arch Placement and Manipulating the Arch in the Mouth. Using a Full-Arch Arch-Wire
	Emergency Solutions: Brackets Recementing and Brackets Debonding
	Extraoral and Intraoral Photography X-ray, orthopantomography and lateral teleradiography of the skull. Use of the Intraoral Scanner

05

Where Can I Do the Internship Program?

This program has different specialized centers that are distributed in different parts of the country. TECH offers students the best program for training in a booming dental sector, in addition to providing an enriching and competitive experience:

These dental centers have the best equipment and professionals to help students improve their work practice”

The student will be able to do this program at the following centers:

Dentistry

Clínica Go Gaztambide

Country: Spain City: Madrid

Management: Calle de Gaztambide, 52, bajo derecha, 28015 Madrid

Dental care and esthetics center.

Related internship programs:

- Periodontics and Mucogingival Surgery
- Orthodontics and Dentofacial Orthopedics

Dentistry

Palmaclinic

Country: Spain City: Madrid

Management: Calle de Fermín Caballero, 57, Madrid

Specialized Clinic in Endodontics, Periodontics, Orthodontics and esthetic dentistry.

Related internship programs:

- Orthodontics and Dentofacial Orthopedics

Dentistry

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Orthodontics and Dentofacial Orthopedics** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Orthodontics and Dentofacial Orthopedics**

Duration: **3 weeks**

Attendance: **Monday to Friday, 8-hour consecutive shifts**
