01 Introduction

Harmful eating habits, tobacco consumption or poor oral hygiene cause, in thousands of people, the appearance of periodontal diseases. Such is its magnitude that more than two-thirds of the population has suffered gingivitis or periodontitis, requiring surgical intervention in numerous cases for its treatment. Due to this, experts in this field must master the latest advances to prevent or adequately address these pathologies. That is why TECH has started this program with which the dentist will enter a prestigious clinical environment for 3 weeks and, together with the best professionals, will update their skills in mucogingival surgery or periodontal treatment to include them in their dental treatment methodology job.

You will manage, thanks to this program, the latest advances in mucogingival surgery or periodontal treatment in a 100% practical way"

Over the years, bad habits have progressively established themselves in society. This fact, accompanied by poor oral hygiene, has led to an increase in periodontal pathologies. In greater or lesser extent of severity, more than 70% of adults suffer from them or have suffered from them. In many cases, these are due to the accumulation of bacteria and, if not treated properly, they can lead to more serious problems such as tooth loss or various conditions in the body. This is where the dentist must decide the type of treatment to follow, with his last option being surgery to extract the tooth. Given the relevance of their work, their skills must be constantly updated to offer the most satisfactory services to their patients. For this reason, TECH has created this 100% practical program.

For 3 weeks, the dentist will have access to a prestigious clinical environment, in which he will acquire a series of skills by solving real cases. In this way, he will join an excellent work team made up of the best professionals in the area of Periodontics and Mucogingival Surgery, who will provide him the most cutting-edge and applicable skills in this field. In this way he will master the updated protocols that must be followed to guarantee success of reconstructive periodontal treatment or new techniques in maintaining the periodontal and implantological patient.

Throughout their internship, the student will be accompanied at all times by a specifically designated tutor, who will be responsible for achieving skills that are fully applicable to their daily work practice. This program, therefore, is an excellent opportunity for professionals to learn alongside the best experts in Periodontics and Mucogingival Surgery and promote its growth in a highly specified dental branch today.

02

Why Study an Internship Program?

In the field of Periodontics and Mucogingival Surgery, it is necessary to master the latest advances and procedures that guarantee excellent treatment of periodontal pathologies, but it is essential to know how to put them into practice. For this reason, TECH has created a completely pioneering program, which will allow the dentist to enter a prestigious clinical environment for 3 weeks to apply these advances with real patients. During this stay, you will integrate in an excellent work team, together with those who will adopt the new skills with greater applicability in your daily activity.

“

TECH gives you a unique opportunity to enter a prestigious clinical environment for 120 hours to apply new skills in Periodontics and Mucogingival Surgery in your work methodology”

1. Updating from the latest technology available

The Area of Periodontics and Mucogingival Surgery has undergone numerous modifications in recent times thanks to the emergence of updated techniques for the detection, treatment or maintenance of periodontal pathologies. For this reason, TECH has opted to create this Internship Program, with which the dentist will enter a cutting-edge clinical environment to learn these advances in a practical way.

2. Gaining In-Depth Knowledge from the Experience of Top Experts

The extensive team of professionals that the student will join during this practical period is a guarantee of the immense quality of this program. Accompanied by a specifically appointed tutor, you will observe and work with real patients to incorporate the most updated procedures and techniques into your work methodology in Periodontics and Mucogingival Surgery.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the area of Periodontics and Mucogingival Surgery. In this way, he will be able to experience the day-to-day of a demanding, rigorous and exhaustive area of work, always applying the latest theses and scientific postulates in their work praxis.

4. Putting the acquired knowledge into daily practice from the very first moment

Currently, there are numerous academic programs whose teaching load is only theoretical and requires an effort incompatible with personal and professional life. For this reason, TECH offers a new 100% practical learning model that, in just 3 weeks, will allow the dentist to assimilate and apply in an real environment the latest advances in Periodontics and Mucogingival Surgery.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of carrying out this Internship Program in centers of international importance. In this way, the specialist will be able to expand his frontiers and catch up with the best professionals, who practice in first class clinics in different continents. A unique opportunity that only TECH could offer.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

The objective of this program is on updating the skills of students through the practical exercise of the functions of a dentist specialized in Periodontics and Mucogingival Surgery. To this end, a series of activities will be carried out in a center equipped with the best equipment and tools, that will guarantee excellent learning

General Objectives

- ◆ Update the theoretical and practical knowledge of the dentist in the different areas of periodontics and Implant Dentistry, through evidence-based dentistry
- ◆ Promote work strategies based on a multidisciplinary approach to patients who are candidates for periodontal or implant therapy
- ◆ Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- ◆ Encourage professional stimulation through continuing education and research

Specific Objectives

- ◆ Apply the knowledge of the macroscopic and microscopic anatomy of the periodontium, jaws and adjacent tissues in periodontal diagnosis and treatments and implant dentistry
 - ◆ Perform pre-surgical clinical history, pharmacological interactions and radiological techniques for periodontal diagnosis
 - ◆ Get to know of different non-plaque-induced inflammatory gingival lesions
 - ◆ Classify lesions by endodontic origin
 - ◆ Identify dental, social, family history, smoking, hygiene habits of patients with periodontal disease
 - ◆ Do a Intraoral and Radiographic Examination
 - ◆ Assimilate the steps to diagnose periodontal lesions
 - ◆ Manage the techniques for reducing the periodontal pocket, using different flaps such as the Widman, Neumann, distal wedge, among others
 - ◆ Detect regenerative procedures such as scaling and root planing and flap-reinsertion surgeries
 - ◆ Indicate treatment for different types of furcation lesions depending on the degree of these
 - ◆ Learn about sutures, surgical instruments and postoperative care used in reconstructive periodontal treatment
 - ◆ Make connective tissue grafts associated with displaced flaps
 - ◆ Detail the influence of gingival biotype and keratinized gingiva in implant dentistry
- ◆ Apply different treatments for peri-implant diseases
 - ◆ Analyze the indications and contraindications of orthodontic treatment in periodontal patients
 - ◆ Know the indications and applications of laser in periodontics
 - ◆ Identify the protocol for the maintenance of the implanted patient
 - ◆ Carry out preventive and therapeutic strategies

Establish a diagnosis, prognosis and formulation of a periodontal treatment plan for patients with dental problems”

04 Educational Plan

This program consists of an Internship Program in a prestigious clinical center lasting 3 weeks, from Monday to Friday, led by an adjunct specialist. This period will allow you to see real patients alongside a team of leading professionals in the area of Periodontics and Mucogingival Surgery, applying the most innovative diagnostic procedures and planning the latest generation therapeutics in each pathology.

In this completely practical internship program, the activities are aimed at developing and perfecting the skills necessary to provide dental care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is, without a doubt, an opportunity to acquire the new skills that guarantee the safety and satisfaction of patients undergoing periodontal treatments. This is a new way of understanding and integrating health processes, and turns a reference center into the ideal teaching setting for this innovative experience in the improvement of professional skills.

Practical teaching will be carried out with the active participation of the student, carrying out the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for praxis of dentistry (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation is subject to both the suitability of the patients and the availability of the center and its volume of work, the proposed activities being the following:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

Module	Practical Activity
Examination, Diagnosis and Treatment Plan	Analyze the the Oral Hygiene Status of the Patient with Periodontal Disease
	Carry out a Intraoral and Radiographic Examination
	Diagnose Periodontal Lesions, Gingivitis and Mild, Moderate or Advanced Periodontitis
Surgical Periodontal Treatment Periodontal Surgery Access Therapy	Use the periodontal pocket reduction technique in the surgical treatment of pathology
	Apply anesthesia to perform periodontal surgery
	Undertaking suturing in periodontal access surgery
Reconstructive Periodontal Treatment II: Periodontal Surgery Treatment of Furcation Lesions	Perform radiographic tests to observe the extent of the lesion
	Interpret the results obtained in the periodontogram
	Develop a treatment for furcation lesion based on their severity: grade I, II and III
Mucogingival Surgery in Implant Dentistry	Shape the Tissues Simultaneous to Implant Placement
	Prepare tissue reconstruction deferred to implant placement
	Obtain keratinized gum on implants through of the application of innovative surgical techniques
Maintenance of Periodontal and Implant Dentistry Patients	Undertake periodontal maintenance therapy in clinic meet Periodontal Maintenance Therapy in the Clinic
	Diagnose a possible peri-implant problem

05

Where Can I Do the Internship Program?

Always seeking to provide the best education to its students, TECH has taken on the task of opening different learning possibilities. For this reason, this program has different avant-garde dental centers that will provide the student with everything necessary for an enriching and complete stay.

Get an enriching hands-on experience in the field dentistry with some of the best professionals in Periodontics and Mucogingival Surgery”

The student will be able to do this program at the following centers:

Dentistry

Clínica Go Gaztambide

Country: Spain City: Madrid

Address: Calle de Gaztambide, 52, bajo derecha, 28015 Madrid

Dental and Aesthetic Assistance Center

Related internship programs:

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Periodontics and Mucogingival Surgery** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Periodontics and Mucogingival Surgery**

Duration: **3 weeks**

Attendance: **Monday to Friday, 8-hour consecutive shifts**

Accreditation: **5 ECTS**
