Introduction

The demand for orthodontic treatment has increased in a large and growing number of individuals in the adult population, often as part of an integrated orthodontic treatment. The training of specialists is, therefore, both a need and a social demand. This program allows the professional to expand their knowledge in a practical way, 100% online and adapted to their needs.

“

Improve your knowledge with this program where you will find top level clinical cases and materials. Improve the quality of your clinical practice through this Postgraduate Diploma in Clinical Orthodontics”

Orthodontics was the first specialty within dentistry and the second after ophthalmology within the health sciences. In this sense, specialty is understood as the possession of a specific professional organization, literature and training. Its peculiarities in diagnosis, type of treatment, objectives and scientific bases, demand an exclusive professional practice.

The knowledge acquired in this program will allow the student to face working life from a more qualified position, giving them a clear advantage when it comes to finding a job, since they will be able to offer the application of the latest technological and scientific advances in the field of periodontics.

The fundamental justification of the program is, therefore, to train professionals with adequate knowledge, skills, attitudes, values and competencies, who is able to serve society by satisfying its health demands, in terms of prevention, diagnosis and treatment, in an ethical, efficient and safe manner.

This professional must appreciate the need for lifelong professional development and continuing education, be able to efficiently utilize advances in knowledge and technology, and understand the central role of the patient in therapeutic decision making.

This **Postgraduate Diploma in Clinical Orthodontics** includes the most complete and up to date scientific program on the market. The most important features include:

- ◆ Clinical cases presented by experts in the different dental specialties
- ◆ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Latest information on Clinical Orthodontics
- ◆ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ◆ With a special emphasis on evidence-based medicine and research methodologies in Clinical Orthodontics
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Expand your knowledge through the Postgraduate Diploma in Clinical Orthodontics, in a practical way and adapted to your needs”

“

This Postgraduate Diploma is the best investment you can make when selecting an up to date program for two reasons: in addition to updating your knowledge in Clinical Orthodontics, you will obtain a Postgraduate Diploma from TECH Global University"

Forming part of the teaching staff is a group of professionals in the world of Dentistry, who bring to this course their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

This program is designed around Problem Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of radiology with extensive teaching experience.

This Postgraduate Diploma offers training in simulated environments, which provides an immersive learning experience designed to train for real life situations.

It includes clinical cases to bring the program's degree as close as possible to the reality of care in dentistry.

02

Objectives

The main objective of the program is the development of theoretical and practical learning, so that the dentist is able to master the latest techniques in Clinical Orthodontics in a practical and rigorous manner.

“

This refresher program will generate a sense of confidence when practising medicine, which will help you grow both personally and professionally”

General Objectives

- ♦ Gain up to date theoretical and practical knowledge in the different areas of orthodontics and dentofacial orthopedics through evidence-based dentistry
- ♦ Know how to apply acquired knowledge and problem-solving skills in new or unfamiliar environments with a multidisciplinary approach within broader contexts related to health sciences
- ♦ Transmit learning skills to students that will allow them to continue their specialization in an autonomous and self directed manner, developing habits of excellence and quality in professional practice
- ♦ Ability to integrate knowledge and face the complexity of making judgments, while reflecting on the social and ethical responsibilities linked to the application of their knowledge and judgments
- ♦ Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- ♦ Encourage professional stimulation through continuous education and research

Make the most of the opportunity and take the step to get up to date on the latest developments in Clinical Orthodontics”

Specific Objectives

Module 1. Initial Diagnosis

 - 2.3.4. Idiopathic Condylar Resorption: Current Diagnostic Techniques. Preventive Treatment for Severe Progressive Open Bite

Module 3. Malocclusions and Dentofacial Deformities Etiology

- 3.1. Craniofacial Growth and Development
 - 3.1.1. Types of Postnatal Growth
 - 3.1.2. Integrating Facial Development
 - 3.1.3. Upper Jaw Growth
 - 3.1.4. Jaw Growth
- 3.2. Tooth Eruption Pathophysiology
 - 3.2.1. Eruption Phases
 - 3.2.2. Tooth Eruption in Adults
 - 3.2.3. Eruption Mechanisms
 - 3.2.4. Dentition General Development
- 3.2. Dentoalveolar Growth and Adaptation in Different Malocclusions and Dentofacial Deformities
 - 3.2.1. Dentoalveolar Growth and Adaptation in Transverse Malocclusions
 - 3.2.2. Dentoalveolar Growth and Adaptation in Vertical Malocclusions
 - 3.2.3. Dentoalveolar Growth and Adaptation in Sagittal Malocclusions
- 3.4. Differential Diagnosis of Etiological Factors
 - 3.4.1. Malocclusion Etiological Factors
 - 3.4.2. Specific Causes of Malocclusion
 - 3.4.3. Genetic Influences
 - 3.4.4. Environmental Influences
 - 3.4.5. Current Etiological Perspective

Module 4. Treatment Plan

- 4.1. Concepts and Objectives
 - 4.1.1. Establishing Priority Lists for Orthodontic Problems
 - 4.1.2. Establishing Treatment Possibilities and Therapeutic Sequencing
 - 4.1.3. Assessing Potential Treatment Factors
 - 4.1.4. Types of Treatment
 - 4.1.5. Treating Orthodontic Disorders
- 4.2. Evidence-Based Orthodontics: PICO, Databases and Critical Reading
 - 4.2.1. Formulating Clinical Questions
 - 4.2.2. Literature Consultation
 - 4.2.3. Types of Clinical Studies
 - 4.2.4. Bias and Confusion Factors
 - 4.2.5. Evidence Levels and Degrees of Recommendation
 - 4.2.6. Critical Assessment of Results
- 4.3. Limits to Orthodontics and Dentofacial Orthopedics as a Function of Malocclusion Type and Patient Age
 - 4.3.1. Growth Modification in Skeletal Problem Treatments
 - 4.3.2. Biological Limits
 - 4.3.3. Soft Tissue Limitations
- 4.4. Early or Late Treatment Indications
 - 4.4.1. Determining Skeletal Maturity
 - 4.4.2. Malocclusion Evolution during Growth
 - 4.4.3. Early Treatment for Malocclusions
- 4.5. Determining the Need for Therapeutic Extractions
 - 4.5.1. Definition of Volumetric Malocclusions
 - 4.5.2. Premolar Therapeutic Extractions
 - 4.5.3. Special Extraction Cases
 - 4.5.4. Stripping Technique as an Alternative to Tooth Extractions
- 4.6. Preparing Individualized Treatment Plans
 - 4.6.1. General Considerations in Individualized Treatment Planning
 - 4.6.2. Determining Individualized Treatment Plans
 - 4.6.3. Auxiliary Tools to Determine Individual Treatment Plans: The Steiner Box

Module 5. Conventional Orthodontics

- 5.1. Treatments for Stage 2 Mixed and Early Permanent Dentition
 - 5.1.1. Treatment Protocols
 - 5.1.2. Indications and Contraindications. Fixed Equipment
 - 5.1.2.1. Advantages and Disadvantages. Fixed Equipment
 - 5.1.3. Malocclusions
 - 5.1.3.1. Transversal Malocclusions
 - 5.1.3.2. Vertical Malocclusions
 - 5.1.4. Retention/Relapse
- 5.2. Bracket Cementation Specification: Malocclusion Type and/or Therapeutic Objectives
 - 5.2.1. Installing Pre-Adjusted Equipment
 - 5.2.1.1. Bracket and Tube Location
 - 5.2.1.2. Mesiodistal Location
 - 5.2.1.3. Vertical Position ("Height")
 - 5.2.1.4. Inclination
 - 5.2.1.5. Vestibular Face Fitting
 - 5.2.2. Cementing in Case of Deep Spee Curve
 - 5.2.3. Cementing in Case of Class II Molar
 - 5.2.4. Cementing in Fractured or Abraded Teeth
- 5.3. First Phase: Alignment and Leveling Types of Intrusion
 - 5.3.1. Diet
 - 5.3.1.1. Selection Principles for Alignment Arches
 - 5.3.1.2. Symmetric Crowding Alignment
 - 5.3.1.3. Alignment in Case of Premolar Extraction
 - 5.3.1.4. Alignment in Non-Extraction Cases
 - 5.3.2. Levels
 - 5.3.2.1. Extrusion Leveling (Relative Intrusion)
 - 5.3.2.2. Intrusion Leveling

- 5.4. Second Phase: Work, Closing Extraction Spaces
 - 5.4.1. Molar Ratio Correction
 - 5.4.1.1. Differential Growth in Class II Patients
 - 5.4.1.2. Differential Anchoring of Extraction Spaces
 - 5.4.1.3. Distalization
 - 5.4.2. Closing Extraction or Residual Spaces
 - 5.4.2.1. Continuous Bow with Locking Handles or DKL Bow
 - 5.4.2.2. Sliding
 - 5.4.3. Overjet and Overbite Correction
 - 5.4.4. Middle Line Centering
- 5.5. Third Phase: Completion Retention Design
 - 5.5.1. Retention Definition
 - 5.5.2. Types of Retainers
 - 5.5.2.1. Fixed Retainers
 - 5.5.2.2. Removable Retainers
 - 5.5.3. Retention Duration
 - 5.5.3.1. Cases Where Retention May Not Be Required
 - 5.5.3.2. Cases Requiring Permanent or Semipermanent Retention
 - 5.5.3.3. Cases Requiring a Variable Retention Period

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the dentist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Dentists who follow this method not only grasp concepts, but also develop their mental capacity by means of exercises to evaluate real situations and apply their knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The student will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 115,000 dentists with unprecedented success, in all specialties regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances, and to the forefront of medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

Certificate

The Postgraduate Diploma in Clinical Orthodontics guarantees students, in addition to the most rigorous and up to date education, access to a Postgraduate Diploma issued by TECH Global University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Diploma in Clinical Orthodontics** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Diploma in Clinical Orthodontics**

Modality: **online**

Duration: **6 months**

Accreditation: **22 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
