Introduction

The audiovisual sector is fundamental in different areas, since the union of image and sound is the perfect complement for many creations. In the field of design, its relevance is becoming increasingly important, whether in advertising or in the creation of video games, for example, where the audiovisual format is indispensable. Undoubtedly, design professionals who wish to dedicate themselves professionally to the business management of audiovisual companies need to find programs which are not only suited to their needs, but within which the knowledge of both areas complement each other. With this aim in mind TECH, has created a highly academic program, which will be fundamental to your professional development and to achieving success with your company.

“

Design professionals with a higher qualification in Senior Management of the Audiovisual Industry will have a unique opportunity to carve a niche for themselves in a highly competitive industry”

The audiovisual industry has experienced tremendous growth in recent decades. New digital tools and new formats have arrived to revolutionize the sector and, although it may seem that everything has been done, innovation continues to be the basis of an area that surprises the public every day with new productions. Their importance is such that these audiovisual productions can reach practically all citizens and, thanks to globalization and the advance of networks, these products no longer have physical limits to be consumed anywhere in the world. As a result, the contribution of this industry to the world economy is growing.

The accomplished management of these types of companies in the design sector requires specific knowledge, so more and more professionals are deciding to enroll in top-level programs and universities to improve their training and open a niche in a highly competitive sector, which demands professionals with experience, but above all, superior knowledge of the sector. With this premise in mind, TECH has designed a highly academic Advanced Master's Degree, which includes the best of an MBA and the specific concepts and strategies of the audiovisual industry. In this way, the syllabus covers the main concepts of the audio-visual industry and culture, and covers the inner workings of cultural journalism. The technical part also acquires a relevant section in this program, focused on the realization of the projects, taking the student from the idea to the staging. A unique opportunity to learn about the structure of the audiovisual system and the production of this type of content, while studying the new genres and formats being used in television.

The program also perfectly combines theoretical and practical content, giving each one the importance it deserves and favoring contextual learning, so that students, while studying, are confronted with cases they may encounter in real situations. Likewise, one of the main advantages of this program is that it will be studied 100% online, without the need for transfers or specific schedules, so that the student himself can self-manage his study, planning his schedule and pace of learning, which will be very useful to be able to combine it with the rest of their daily obligations.

This **Advanced Master's Degree in Senior Management of the Audiovisual Industry** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- ◆ Development of case studies presented by design experts
- ◆ The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Special emphasis on innovative methodologies in the management of audiovisual companies

“*Take a high-quality academic course that will be fundamental for your professional development in the audiovisual field*”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“ *Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and relearn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent elearning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07 Certificate

The Advanced Master's Degree in Senior Management of the Audiovisual Industry guarantees you, in addition to the most rigorous and updated training, access to a Advanced Master's Degree issued by TECH Technological University..

“

*Successfully complete this training
and receive your university degree
without travel or laborious paperwork”*

This **Advanced Master's Degree in Senior Management of the Audiovisual Industry** contains the most complete and updated program on the market

After the student has passed the evaluations, they will receive their corresponding **Advanced Master Degree** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Advanced Master's Degree, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional from career evaluation committees.

Title: **Advanced Master's Degree in Senior Management of the Audiovisual Industry**
 Official N° of hours: **3,000 h.**
