01

Introduction

The creation of the graphic form is the basis of all design. A basic yet complex step that requires the designer to master the appropriate techniques and approaches. In order to achieve this in a simple way, we offer the opportunity to acquire the skills of a specialized professional through a program that will ensure job growth without problems of conciliation. A unique opportunity for development and promotion.

“

A high intensity program about the use and development of the Graphic Shapes that will allow you to work with the solvency of the best professionals in the sector"

This Postgraduate Certificate in Graphic Shapes has been structured to offer an interesting, interactive and, above all, effective process of specialization in everything related to this question. To achieve this, TECH offers a clear and continuous program, which is also 100% compatible with other occupations.

Through an exclusive methodology, this Postgraduate Certificate will lead you to know all the characteristics that the professional needs to stay at the forefront and to know the changing phenomena of this form of communication.

Therefore, this program will address the aspects that a designer needs to know in order to perform their functions with confidence. An educational path that will scale the student's skills to help them achieve the challenges of a top professional.

The Postgraduate Certificate in Graphic Shapes is presented as a viable option for a professional who decides to work independently but also to be part of any organization or company. An interesting avenue of professional development that will benefit from the specific knowledge that we now make available to you in this program.

This **Postgraduate Certificate in Graphic Shapes** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ Practical case studies presented by experts
- ◆ Graphic, schematic, and highly practical contents
- ◆ The latest developments and cutting-edge advances in this area
- ◆ Practical exercises where the self-evaluation process can be carried out to improve learning.
- ◆ Innovative and highly efficient methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Do not miss the opportunity to study this Postgraduate Certificate in Graphic Shapes with TECH. It's the perfect opportunity to advance your career"

“ *All the necessary knowledge for the graphic designer in this field, compiled in a highly efficient Postgraduate Certificate, which will optimize your effort with the best results*”

The development of this program is focused on practicing the proposed theoretical learning. Through the most effective teaching systems, proven methods imported from the most prestigious universities in the world, you will be able to acquire new knowledge in a practical way. In this way, we strive to convert your efforts into real and immediate skills.

The online system is another of the strengths of the educational program. With an interactive platform that has the advantages of the latest technological developments, the most interactive digital tools are made available. This way, it is possible to offer a way of learning that is totally adaptable to your needs, so you can perfectly combine this program with your personal or working life.

A practical and intensive program that will give you all the tools you need to work in this field, in a specific and concrete Postgraduate Certificate.

A training program created to allow you to implement your acquired knowledge into your daily practice in an almost immediate way.

02 Objectives

The objective of this Postgraduate Certificate in Graphic Shapes is to offer professionals a complete program to acquire knowledge and skills for professional practice in this sector, with the confidence of learning from the best and a form of learning based on practice that will allow the student to complete the program with the necessary knowledge to work with total confidence and competence.

“

An opportunity created for professionals who are looking for an intensive and effective program with which to take a significant step forward in the practice of their profession"

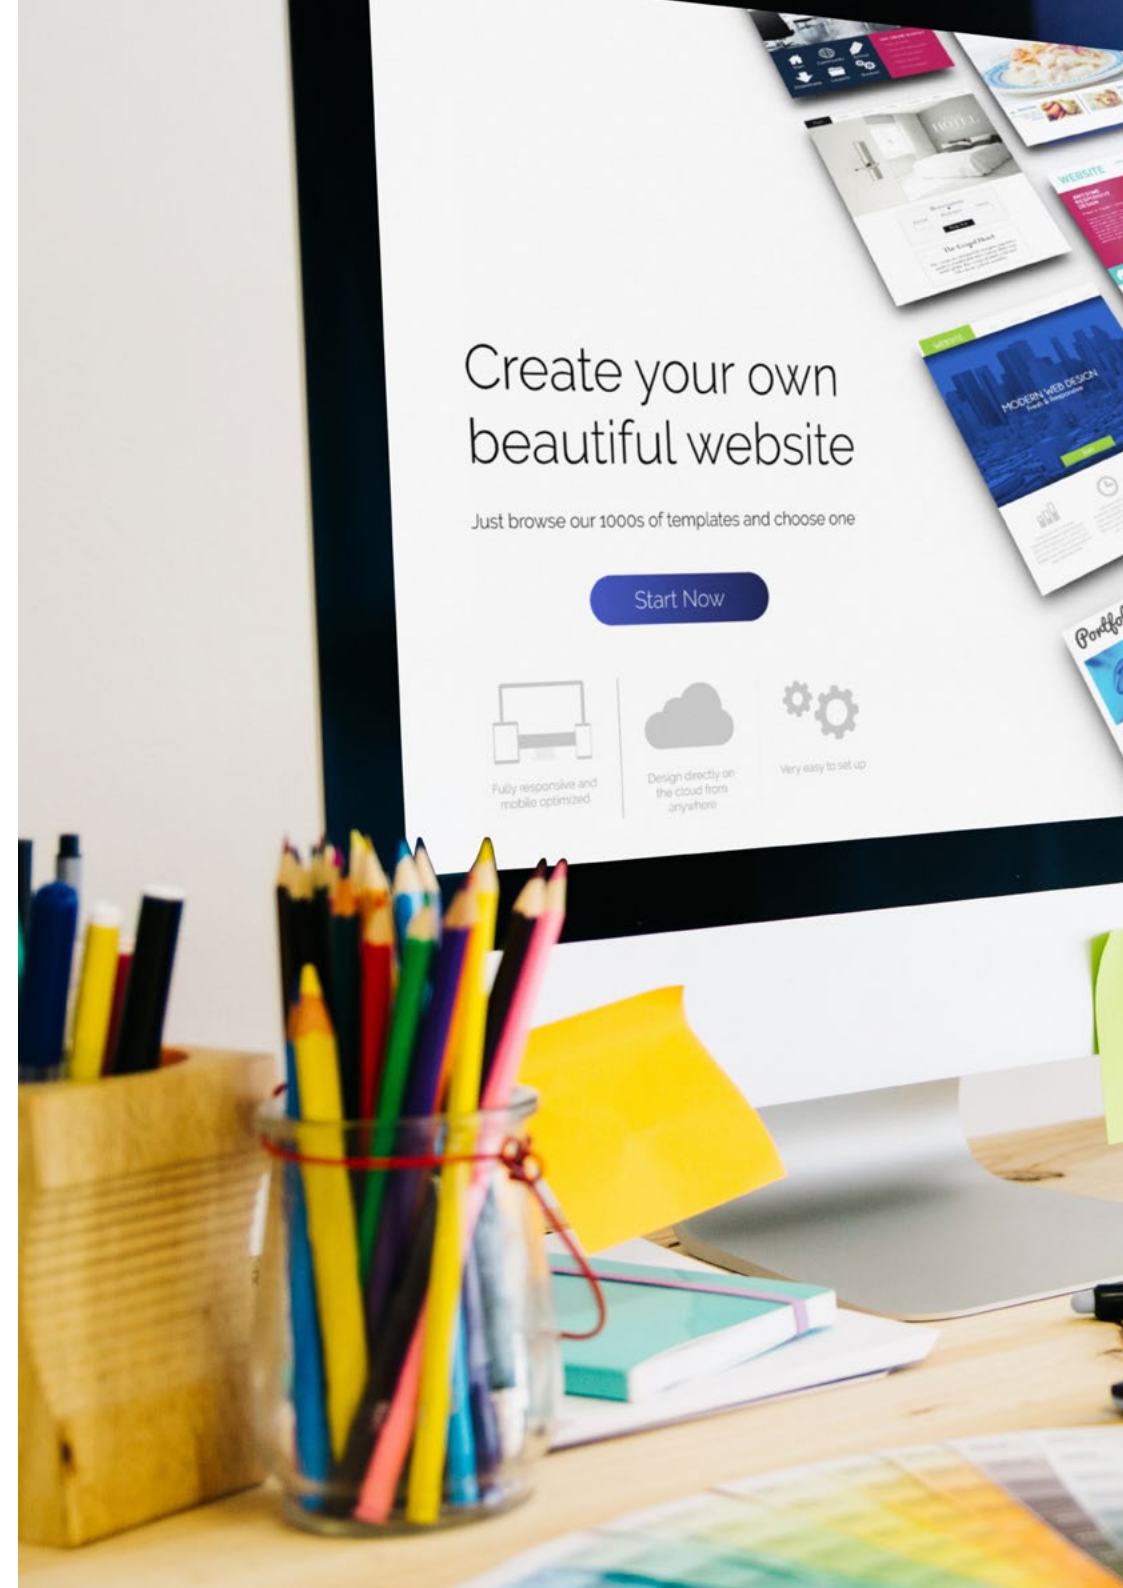

General Objective

- ◆ Learn all aspects and tools of working with Graphic Shapes in design

“

This Postgraduate Certificate contains the most complete and up-to-date program on the market”

Specific Objectives

- ◆ Understand the nature of image and motion graphics, as well as the basic principles of composition and structure that articulate image, graphics, and sound in time
- ◆ Apply spatiotemporal transformations and effects with narrative intentions to project and realize visual communications with a clear and specific purpose
- ◆ Develop spatial skills, analyzing the forms that are built in the environment
- ◆ Know the importance of shape in the development of more complex procedures
- ◆ Visually identify the types of shapes in order to create new ones from them
- ◆ Understand and analyze the emotional component attributed to certain shapes

03

Structure and Content

The structure of the contents has been designed by a team of professionals, aware of the current relevance of training in order to advance in the labor market with security and competitiveness, and to practice the profession with the excellence that only the best training allows.

“

A unique, key, and decisive program to boost your professional development”

Module 1. Introduction to Shapes

- 1.1. The Shape
 - 1.1.1. Definition, What Is It?
 - 1.1.2. Qualities and Features
 - 1.1.3. Contour, Silhouette, Figure and Profile, Aspects of the Same Reality
 - 1.1.4. Essential Representation
- 1.2. Types of Shapes Aesthetics of Functional Shape
 - 1.2.1. Types of Shapes According to Their Origin
 - 1.2.2. Types of Shapes According to Their Settings
 - 1.2.3. Types of Shapes According to Their Meaning
 - 1.2.4. Types of Shapes and their Relationship with Space
 - 1.2.5. Types of Shapes According to Their Bottom-Shape Relationship
- 1.3. First Graphic Shapes
 - 1.3.1. The Doodle
 - 1.3.2. The Shape of the Stain
 - 1.3.3. The Dot and the Line
 - 1.3.4. Awakening Creativity through Hirameki
 - 1.3.5. Haiku's Shape
- 1.4. Shape Composition
 - 1.4.1. Open Shape and Closed Shape
 - 1.4.2. Composition: Formal, Semiformal and Informal
 - 1.4.3. Symmetry
 - 1.4.4. Axes Axial and Radial Symmetry
- 1.5. Importance of Proportion in Shapes
 - 1.5.1. The Proportion
 - 1.5.2. Golden Rectangle
 - 1.5.3. The Scale
 - 1.5.4. Types of Scale

MASS MEDIA

OF FLAT DESIGN INFOGRAPHICS ELEMENTS

- 1.6. Ismos: A Practical Application
 - 1.6.1. Cubism
 - 1.6.2. Suprematism
 - 1.6.3. Constructivism
 - 1.6.4. Dadaism
- 1.7. The Human Being as a Measurement
 - 1.7.1. The Canon
 - 1.7.2. Different Canons in the Human Figure
 - 1.7.3. Representation of the Human Figure in Art
 - 1.7.4. Ergonomics
- 1.8. Visual Perception and Shape
 - 1.8.1. Visual Perception
 - 1.8.2. Gestalt
 - 1.8.3. Visual Thinking
 - 1.8.4. Interrelation of Shapes
- 1.9. Psychology of Shapes
 - 1.9.1. The Circle
 - 1.9.2. The Square
 - 1.9.3. The Triangle
 - 1.9.4. Other Shapes
- 1.10. Introduction to Digital Shapes
 - 1.10.1. From Analogue to the Digital World
 - 1.10.2. Positive and Negative Shapes
 - 1.10.3. Repetition and Reflexion
 - 1.10.4. Combining Techniques

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05 Certificate

The MBA in Audiovisual Business Management guarantees students, in addition to the most rigorous and up to date education, access to a Professional Master's Degree issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Graphic Shapes** contains the most complete and up-to-date educational program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Graphic Shapes**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
