01
Introduction

The textile harmony in any interior design project is essential and the creative has to work not only according to the trends that exist at the time the project is being developed, but based on the client's criteria and the color and lighting specifications available in the room where it will be applied. Knowing in detail the intricacies of textile design today is now a simple task to carry out thanks to this program that TECH has developed. It is an online, dynamic and highly capacitating program, with which professionals can work on their creative skills, expanding their knowledge of these decorative elements and their combination of color and texture.

The good choice in the combination of color and texture is what leads to an attractive and unique textile design. With this Postgraduate Certificate, you will achieve that all your projects comply with this characteristic"

Textile design is undoubtedly one of the most important aspects of any interior design project. It is about giving life and personality to a space through the placement of furnishings, whether carpets, curtains, tablecloths, etc., which will bring a unique harmonic character to the room, transforming the space and generating the possibility of transmitting sensations through the fabrics. Nowadays, the wide range of materials, textures, colors and shapes allows creatives to customize every detail, but at the same time, it complicates the choice, especially when the client is characterized by their difficulty in making decisions.

In this type of case, a broad and exhaustive knowledge of the sector will enable the professional to pre-select those products that best suit the needs of the person or company, as well as the specifications of the space in which it will be placed. For this, the graduate can count on this Postgraduate Certificate in Textile Design, a 100% online program that addresses the different types of materials, techniques and criteria for the choice of fabrics when coordinating an interior textile project.

This is an avant-garde and intensive program that will help graduates to perfect their professional skills from wherever they want and with a schedule totally adapted to their availability. In addition, they will have the support of a teaching team versed in design and architecture, which will be at their disposal whenever they need it to help them get the most out of this educational experience.

This **Postgraduate Certificate in Textile Design** contains the most complete and up-to-date program on the market. The most important features include:

♦ The development of practical cases presented by experts in Design and Architecture

♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice

♦ Practical exercises where the self-assessment process can be carried out to improve learning

♦ Its special emphasis on innovative methodologies

♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments

♦ Content that is accessible from any fixed or portable device with an Internet connection

You will delve into the different types of materials most used in Textile Design: natural, synthetic and premium"

Jacquard fabrics are in great demand in modern interior design projects. Learn, with this program, the best combination strategies for its use in small and large spaces"
Would you like to specialize in the most avant-garde textile design techniques such as Batik or prints? With this program, you will master them in just 6 weeks.

A 100% online program with which you can connect from anywhere, either from a computer, a tablet or from your own cell phone.

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02
Objectives

The choice of the textile to be used in any interior design project is one of the most important and complex tasks that the creative has to perform. For this reason, TECH has developed this Postgraduate Certificate with the objective of facilitating the process to the graduate through the exhaustive knowledge of the intricacies of this field and the mastery of the most avant-garde techniques and strategies of selection and creation of today.

Mastering Rapport design is now a perfectly achievable and attainable goal thanks to TECH and this Postgraduate Certificate"

General Objectives

- Know in detail the main trends in the textile design sector applied to interior design and based on the most avant-garde strategies
- Learn to manage textile design projects from the construction of the fabric to the completion of interior design projects

Whatever your objectives are, TECH will help you to achieve them thanks to a program designed in detail taking into account the immediate current situation of the interior design sector"

Specific Objectives

- Generate a Mood Board of style for an interior decoration project by aligning main and coordinates
- Delve into the origin of fibers and their manufacture, detecting their functionality, use and application in each specific design case
- Manage the different rooms and optimize fabric selection processes, as well as promote the different textile design techniques
- Analyze the main differences between textile interior design projects for the general public and for the premium sector
- Apply the Rapport technique or continuous textile printing and positional design, as required

03
Course Management

The teaching team of this Postgraduate Certificate in Textile Design is made up of a group of design and architecture professionals with a wide and extensive work experience in the management of large interior design projects. As they have communicated to TECH, they are willing to make available to the graduate all the tools at their disposal, as well as their own experience, to help and guide them during the course of the program.

"

The graduate will have the possibility of individualized tutoring in order to resolve any doubts that may arise during the course of the educational experience"

Management

Ms. García Barriga, María

- Communicator at RTVE
- Communicator at Telemadrid
- University Teacher
- Author of The Pattern of Eternity: Creating a Spiral Identity for Automating Fashion Trends
- Communication, Marketing and Social Campaigns. Arts Heritage - Digital Marketing
- Editor-in-Chief. Chroma Press
- Marketing and Social Media Account Executive. Servicecom
- Web Content Editor. Premium Difusión, Diario Siglo XXI and Magazine Of Managers
- PhD, Design and Marketing Data. Polytechnic University of Madrid
- Bachelor's Degree in Information Sciences, Communications, Marketing and Advertising. Complutense University of Madrid
- Postgraduate degree in Marketing and Communication in Fashion and Luxury companies. Complutense University of Madrid
- Certified in Data Analysis & Creativity with Python in China
- MBA Fashion Business School, the Fashion Business School of the University of Navarra

Professors

Ms. Miñana Grau, Mari Carmen

- Textile designer at Petite Antoinette
- Designer at Donzis Estudios
- Designer at Summon Press
- Pattern maker at Valentín Herraiz
- Degree in Fashion Design by Barreira Art and Design
- Digital Design Expert with Adobe Illustrator
- Specialty in pattern making, cutting and sewing of Valencian clothing by Aitex Paterna

Mr. Pereira Paz, Juan Carlos

- Director of the DAB (Design and Bolivian Authors) project
- Internationally recognized designer
- Numerous appearances in fashion and culture magazines such as: Vogue Russia, Harper's Bazaar Russia, L´Officiel Italy, L´ Ofiiciel Arabia, Vogue Italy, Vogue Mexico, Elle China, L´Officiel Argentina
- Specialist in Fashion Communication and Marketing

Structure and Content

This Postgraduate Certificate has been designed by TECH following the specifications of the teaching team who, in turn, have had to adapt all the information gathered to the demanding quality criteria that define this university. Thanks to this, it has been possible to create a comprehensive program, highly specialization and adapted to the current specifications of the current market. In addition, the graduate will find additional material of high quality and presented in different formats so that they can delve into each aspect of the syllabus that they consider most important and relevant for their professional development and performance.

A program with which you will acquire the most professional skills that will enable you to create attractive Mood Boards that are completely different from those you have seen so far"

Module 1. Textile Design

1.1. Natural Materials
    1.1.1. Natural Fibers
    1.1.2. Ligaments
    1.1.3. Wool, Linen and Cotton

1.2. Synthetic Materials
    1.2.1. Artificial Fibers
    1.2.2. Filaments
    1.2.3. Polyester and Nylon

1.3. Premium Materials
    1.3.1. Mohair
    1.3.2. Silk
    1.3.3. Skin

1.4. Textile Design Techniques
    1.4.1. Batik
    1.4.2. Stamping
    1.4.3. Jacquard

1.5. Rapport
    1.5.1. Rapport Designs and Positional Designs
    1.5.2. Handmade Silkscreen Printing
    1.5.3. Continuous Screen Printing

1.6. Rugs and Carpets
    1.6.1. Craftsmanship Techniques
    1.6.2. Tufting
    1.6.3. Machine-Made Carpets

1.7. Upholstery
    1.7.1. Upholstery of Chairs
    1.7.2. Upholstery of Armchairs
    1.7.3. Upholstery of Furniture

Look no further because this program will guarantee you a before and after in your professional career through the best theoretical and practical education you have ever taken"

05
Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**
This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.
Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

30%

10%

3%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Certificate

The Postgraduate Certificate in Textile Design guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Textile Design** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Textile Design**

Official N° of hours: **150 h.**
