Introduction

The school stage is a decisive factor in the development of an individual's education. During this period, children and adolescents acquire and perfect, little by little, the skills and abilities that later shape critical thinking, literacy, good communication and, in general, personal development. However, to achieve this goal, the teacher must know in detail the pedagogical and educational tools that favor an inclusive, modern and highly beneficial learning for the student. You will find all the information you need to develop in this very complete qualification that TECH has designed exclusively for education professionals. In addition, its convenient 100% online format will allow you to keep up to date with the latest developments in the sector without hindering your teaching activity.

“

Having a detailed knowledge of the pedagogical tools to develop innovative and effective educational projects will allow you to offer your students the opportunity to be educated based on the latest developments in the industry”

Education is a primordial institution that intervenes mainly in the cultural development of society. The early stages of education are, in turn, fundamental for this projection, since it is at this time that students work on their critical, inquiry, communication and reflection skills. In this sense, in recent decades there has been a huge evolution in terms of educational intervention techniques and protocols, so that today it is common to find, for example, centers that use tablets or digital boards in their classrooms, something unthinkable less than two decades ago.

Pedagogical methodologies also change in parallel to society, so education professionals must be continuously updating their knowledge based on these advances, in order to be able to offer an educational quality according to the latest developments in the sector. To facilitate this task, TECH has developed this Advanced Master's Degree in Innovation, Development and Entrepreneurship in Educational Projects, a 100% online qualification distributed over 24 months that will help you get up to date with the most cutting-edge strategies and protocols.

Thanks to the comprehensiveness with which this program has been designed, you will be able to delve into the importance of the use of ICT in the classroom and its intervention in modern literacy, in the methodologies of current socio-educational action and in the design, management and evaluation of inclusive and quality educational programs. In addition, it will delve into innovation and entrepreneurship in teaching practice, with special emphasis on communication and oral expression techniques for teachers.

Through a multidisciplinary content and developed based on the relearning methodology, the graduate will be able to expand their knowledge in a progressive and natural way. In addition, thanks to the possibility of accessing the virtual classroom 24 hours a day and from any device with an Internet connection, you will be able to study this program on a personalized schedule, allowing you to combine this academic activity with your working day.

This **Advanced Master's Degree in Innovation, Development and Entrepreneurship in Educational Projects** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Practical cases presented by experts in education
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies in the development of dynamic and avant-garde educational projects
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Implementing the latest communication and expression techniques in the education sector to your professional profile will allow you to reach your students in a more effective and precise way"

“

This qualification will help you to perfect your skills in managing the family, social and school context, as well as to develop an educational strategy adapted to different scenarios”

The teaching staff includes professionals from the education sector, who bring their experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will be up to date on the new key factors for the improvement of teaching practice and learn in detail the phases of the process to adapt your classes to the most innovative pedagogical concepts.

This program delves into entrepreneurship in formal and non-formal education, as well as the resources and strategies to take into account to guarantee the educational success of your students.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

Certificate

The Advanced Master's Degree in Innovation, Development and Entrepreneurship in Educational Projects guarantees you, in addition to the most rigorous and up-to-date training, access to a Advanced Master's Degree issued by TECH Global University.

“

Successfully complete this program and receive your university degree without travel or laborious paperwork”

This program will allow you to obtain your **Advanced Master's Degree diploma in Innovation, Development and Entrepreneurship in Educational Projects** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
