Introduction

Spanish is a global language that is experiencing constant growth. So much so that it has approximately 500 million speakers and is the second mother tongue in the world in terms of number of speakers. In view of the popularity of this language, more and more people are turning to professionals to learn it. This opens up a wide range of job opportunities for teachers. To make the most of them, they need to acquire competitive advantages that differentiate them from other candidates. In this context, TECH has developed a degree that will provide educators with the most cutting-edge pedagogical strategies to maximize their potential.

“

Through this Hybrid Professional Master's Degree, you will obtain the necessary skills to develop innovative proposals in the classroom"

The World Organization of the United Nations highlights every year the importance of Spanish as an international language. In this way, it urges children to learn this language at an early age in order to facilitate their cultural integration, while at the same time it will serve them in the future to improve both their academic and work opportunities. Aware of its advantages, families are increasingly investing more and more in hiring teaching professionals to transmit their solid understanding of the language to their children.

In response to this, TECH has developed a Hybrid Professional Master's Degree aimed at teaching professionals who wish to stay at the forefront of the most innovative pedagogical approaches and educational technologies. Designed by experts in Teaching Spanish as a Foreign Language (SFL), this curriculum will address in depth aspects ranging from the planning or creation of teaching materials to progressive evaluation systems. At the same time, the syllabus will delve into the use of technology in the classroom, providing graduates with the keys to use tools such as Vuforia, *Samsung Virtual School Suitcase* or even the Scratch Platform. During the program, students will obtain advanced competencies in applied linguistics, including issues such as grammar, phonetics, semantics and pragmatics.

On the other hand, the Hybrid Professional Master's Degree is characterized by providing students with multimedia content developed with the latest educational technology. In this sense, in the Virtual Campus students will have access to a library full of resources among which interactive summaries, specialized readings or case studies stand out. In this way, they will enjoy immersive learning that will prepare them to solve complex situations during their professional practice.

This **Hybrid Professional Master's Degree in Teaching Spanish as a Foreign Language (SFL)**, contains the most complete and up-to-date program on the market. The most important features include:

Why Study this Hybrid Professional Master's Degree?

In many fields of work and knowledge, theory is not enough to achieve real development or progress. In the field of Teaching Spanish as a Foreign Language (SFL), it is equally relevant to know the latest pedagogical approaches and functional paradigms in relation to communicative methods. For this reason, TECH has designed this pioneering degree, which combines the most recent update in aspects such as lexical-semantic networks or evaluation rubrics with a practical stay in a reference educational center. In this way, students will achieve a holistic approach in this field of specialization, while being guided throughout the process by experts in the educational area.

“

TECH Global University offers you the most complete and updated educational program on the market with the aim of raising your teaching practice to the highest level"

1. Updating from the Latest Technology Available

Technological advances in recent years have provided teachers with new opportunities to optimize the quality, accessibility and personalization of education. For this reason, this Hybrid Professional Master's Degree will provide students with the most innovative digital tools to improve their educational programs and encourage more active learning.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

Throughout the entire practical period, graduates will be guided by a team of professionals with a broad professional background in Teaching Spanish as a Foreign Language (SFL). In this way, these specialists will share the latest advances that have been made in this field and will ensure that students have an optimal learning experience. Undoubtedly, this will allow students to experience a leap in quality in their career path.

3. Entering First-Class Professional Environments

In its commitment to offer qualifications of the highest level, TECH carefully selects all the centers available for the Internship Programs. Therefore, on this occasion, graduates will be guaranteed a practical stay in a prestigious, top-quality educational environment. In this way, they will be able to carry out their work in an academic center that has all the necessary resources to create productive educational itineraries.

4. Combining the Best Theory with State-of-the-Art Practice

The academic market is full of academic programs that are poorly adapted to the daily work of specialists and require long teaching hours. In contrast, TECH provides a revolutionary hands-on learning model that will allow students to enter the reality of the labor market. In this way, they will obtain the skills required to join the most prestigious institutions in the educational sector.

5. Expanding the Boundaries of Knowledge

This Hybrid Professional Master's Degree is designed for students who want to expand their career possibilities in the best entities dedicated to the Teaching of Spanish as a Foreign Language (SFL). Considering the high demand for this service, this degree is an excellent opportunity for students to acquire the necessary skills to meet their most ambitious professional goals. A unique pedagogical option that only TECH, the world's largest digital university, could offer.

“

*You will have full practical immersion
at the center of your choice”*

Internship

Once the online period is over, the program foresees a period of Internship Program in a reference educational environment. In this sense, students will have the guidance of a tutor specialized in Spanish as a Foreign Language (SFL) at all times, who will answer any questions you may have and even offer personalized advice aimed at optimizing your regular practice.

“

*You will carry out your internship
in one of the best academic
institutions in Spain"*

The Internship Program of this program of Teaching Spanish as a Foreign Language (SFL) consists of a practical stay in a distinguished educational center, lasting 3 weeks, from Monday to Friday with 8 consecutive hours of practical training with an assistant specialist. During this stay, the graduates will be integrated into a team of professionals of reference in the educational sector, contributing to the design of effective teaching strategies and programs that will allow users to acquire linguistic knowledge of the language. In addition, they will have at their disposal the most innovative resources to face the challenges that arise during the performance of their work in the classroom.

It should be noted that this TECH training proposal has an eminently practical focus, so the activities are oriented towards the development and optimization of the teaching skills necessary for the teaching of Spanish. This will allow students to improve their teaching practice and promote fully effective learning.

This is a unique opportunity for graduates to expand their knowledge and skills in a real scenario, in a first class educational institution. The facilities are equipped with the necessary technological resources for teaching, including computers with Internet access and projectors. Graduates will also be assisted by a team of experts in the education sector, who will help them to maximize their skills and stay at the forefront of the latest trends in this field.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees who facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of Teaching Spanish as a Foreign Language (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the program, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
Teaching at the Lexical-Semantic Level	Use dictionaries and online resources to investigate the meaning of unknown words, as well as to explore their example uses in sentences
	Carry out contextualization exercises, providing sentences for students to explain the meaning of words according to the general meaning of the text
	Design games such as crossword puzzles, word search puzzles or riddles to familiarize students with new words
	Conduct guided class discussions, where students share their experiences with specific words and reflect on their different interpretations
Grammar and Pragmatics of Language for Communication in Spanish as a Foreign Language	Analyze newspaper articles to identify specific grammatical structures and address how they are employed in different communicative situations
	Develop simulation activities in which students practice real-life communication situations, such as requesting information in a store or asking for directions
	Create cultural role-plays that simulate different social contexts (such as a conversation between friends or a business meeting), so that learners understand how grammar and pragmatics vary
	Develop activities to correct grammatical and pragmatic errors, allowing learners to develop their linguistic awareness and improve their accuracy in language use
Lexical Competence in Teaching SFL	Provide students with cards with words and their corresponding images for them to associate
	Perform gap-filling exercises to practice vocabulary in specific contexts
	Create glossaries of new words, including both their definitions and examples of usage
	Organize different memory games to practice long-term retention

Module	Practical Activity
Material Design for Autonomous Learning	Construct interactive exercises in online or print format that allow students to practice specific skills such as writing and reading
	Create specific classroom resources such as slideshows, video tutorials or activities
	Run simulation sessions where students teach a lesson using the materials they have developed
	Conduct a critical review of a set of ELE materials, evaluating their effectiveness in terms of their learning objectives, linguistic diversity, and cultural relevance
SFL Learning for Immigrant Children and Adolescents	Use songs and rhymes in Spanish to teach both vocabulary and grammatical structures in a playful way
	Design plays or dramatic representations in Spanish, allowing students to practice Spanish in a creative context
	Use digital resources such as videos, podcasts and social networks to engage children in learning activities relevant to their daily lives
	Organize conversation groups where immigrants practice communication skills in Spanish and share experiences with other learners in a supportive atmosphere

You will intern at a highly prestigious educational institution, where you will have the support of professionals who will help you to maximize your development"

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the Internship Program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. 3.- DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Where Can I Do the Internship?

This Hybrid Professional Master's Degree includes in its syllabus a practical stay in prestigious international educational centers, where students can put into practice the knowledge previously acquired in theories, approaches and methodologies in second language teaching. With the aim of bringing this university degree to more professionals, TECH offers students the opportunity to carry it out in different centers throughout the country. Undoubtedly, students are facing a first-class academic experience that will raise their professional horizons to a higher level.

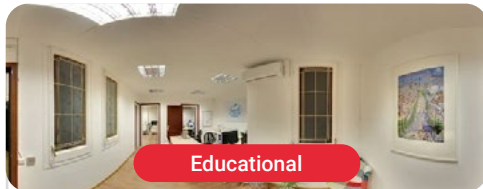

“

You will broaden your practical skills in Teaching Spanish as a Foreign Language (SFL through intensive internships in the most prestigious educational centers"

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
