Introduction

Teaching Methods and Personalized Education continue to evolve thanks to the integration of advanced technologies and learner-centered pedagogical approaches. In fact, this personalization is increasingly supported by digital tools that make it possible to adjust content and pace to individual needs. In addition, teaching is adopting active methodologies, such as Collaborative Learning, promoting skills such as critical thinking and problem solving. For this reason, TECH has created the present qualification, in which in 3 weeks the specialist will integrate in a team versed in Teaching Methods and Personalized Education, to get up to date on the latest developments and technologies available, thus being able to bring them to their own daily practice in a comprehensive and efficient way.

“

With this Internship Program, you will develop skills to use technological tools and innovative methodologies, such as Cooperative Learning and Project-Based Learning”

Teaching Methods and Personalized Education have evolved driven by the need to address diversity in the classroom and to enhance the use of educational technologies. In addition, personalized approaches, which consider individual differences in students' pace, style and abilities, have been consolidated through the use of adaptive learning platforms and interactive digital resources.

And since the best way to perfect these skills is through practice, TECH has designed a program consisting of a 120-hour stay in an educational center of reference in the field of Teaching Methods and Personalized Education.

In this way, during 3 weeks, the graduate will become part of a team of specialists of the highest level, with whom they will actively work in the development of innovative teaching plans, dealing with real students. In this way, they will be able to update not only on the most effective learning strategies, but also implement tools to better understand the individual needs of students, design inclusive curricula and apply methodologies such as Cooperative Learning and Multiple Intelligences.

Furthermore, during the stay, you will have the support of an assistant tutor, who will ensure that the requirements for which this Internship Program was designed are met. Therefore, the specialist will work with total guarantee and security in the handling of the most innovative technology, as well as in the use of the educational techniques with the best results to date.

02

Why Study an Internship Program?

This Internship Program will allow teachers to acquire key skills to personalize learning, adapting pedagogical strategies to the pace and style of each student, resulting in a more meaningful and effective educational experience. In addition, it will provide the opportunity to become familiar with the latest innovative methodologies, such as Cooperative Learning and Project Based Learning (PBL). In this sense, professionals will be better prepared to face the challenges of today's education, promoting an inclusive and dynamic environment that fosters the integral development of students.

This Internship Program will be essential for educators who wish to improve the quality of their teaching and respond effectively to the diversity of needs present in the classroom”

1. Updating from the latest technology available

Adaptive learning platforms, powered by artificial intelligence and data analytics, deliver highly personalized learning experiences by adjusting content, activities and pace of study based on individual student needs and progress. In addition, advanced Learning Management Systems (LMS) also facilitate the creation of personalized educational paths and continuous assessment, providing teachers with detailed analytics on student performance and enabling more accurate and effective interventions.

2. Gaining in-depth knowledge from the experience of top specialists

The large team of professionals that will accompany the specialist throughout the practical period is a first-class and an unprecedented guarantee of updating. With a specifically designated tutor, the student will be able to work with real students in a state-of-the-art environment, which will allow them to incorporate the most effective procedures and approaches in Teaching Methods and Personalized Education into their daily practice.

3. Entering first-class professional environments

TECH carefully selects all available centers for Internship Programs. As a result, the specialist will have guaranteed access to a prestigious educational environment in the field of Teaching Methods and Personalized Education. In this way, they will be able to experience the day to day of a demanding, rigorous and exhaustive area of work, always applying the latest techniques and learning tools in their work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

The academic market is plagued by teaching programs that are poorly adapted to the daily work of the specialist and that require long teaching hours, often not very compatible with personal and professional life. TECH offers a new learning model, 100% practical, that allows you to get to grips with state-of-the-art procedures in the field of Teaching Methods and Personalized Education and, best of all, to put it into professional practice in only 3 weeks.

5. Opening the door to new opportunities

Opening the door to new methodologies and technologies, such as Project Based Learning (PBL), Artificial Intelligence and interactive digital platforms, facilitates more inclusive and effective teaching that responds to the diversity of needs and learning styles. At the same time, it empowers educators to innovate in their pedagogical practices and create learning environments that not only optimize academic performance, but also encourage motivation, creativity and student engagement.

*You will have full practical immersion
at the center of your choice"*

03

Objectives

This program will enable participants to acquire competencies in the personalization of learning, using methodologies such as Cooperative Learning, Project Based Learning (PBL) and the incorporation of educational technologies. Educators will also be prepared to create inclusive and dynamic environments, where the integral development of students is fostered, attending to diversity and promoting creativity and critical thinking. In addition, they will be able to continuously and personally evaluate the progress of students, adjusting their pedagogical strategies according to the results.

General Objectives

- ♦ Adapt teaching strategies to the individual needs of the students
- ♦ Use digital tools and innovative methodologies in the classroom
- ♦ Encourage Cooperative Learning and Project Based Learning
- ♦ Promote Educational Inclusion and Attention to Student Diversity
- ♦ Develop creativity and critical thinking in students
- ♦ Evaluate academic progress in a continuous and personalized way
- ♦ Apply Multiple Intelligences theories in the design of activities
- ♦ Improve the ability to plan and organize personalized classes
- ♦ Facilitate the integration of educational technologies in teaching
- ♦ Create dynamic and motivating learning environments

Specific Objectives

- ♦ Apply personalized teaching techniques based on student learning profile
 - ♦ Design activities that foster collaboration and cooperative learning
 - ♦ Use digital platforms to personalize learning pace
 - ♦ Evaluate student progress with continuous assessment strategies
 - ♦ Integrate active methodologies such as Project Based Learning (PBL)
 - ♦ Adapt curricular content to Multiple Intelligences
 - ♦ Develop strategies for the inclusion of students with special needs
 - ♦ Encourage the use of emerging technologies in personalized teaching
 - ♦ Implement activities that stimulate creativity and critical thinking
 - ♦ Design classes that promote student participation
 - ♦ Create inclusive and dynamic educational environments
 - ♦ Develop skills for classroom management in a context of personalization
 - ♦ Use data and feedback to adjust teaching strategies
 - ♦ Promote the holistic development of students through personalized approaches
 - ♦ Incorporate interactive and multimedia resources to diversify instruction
 - ♦ Facilitate the adaptation of foreign students through personalized learning strategies
 - ♦ Design educational programs aligned with the Core Competencies
 - ♦ Improve problem-solving and critical thinking skills in students
 - ♦ Evaluate the impact of personalized methodologies on academic performance
- ♦ Create individualized action plans to improve students' learning

The main objective of the Internship Program will be to train teachers in the effective implementation of educational strategies that respond to the individual needs of each student"

04

Educational Plan

The Internship Program in Teaching Methods and Personalized Education consists of a 3-week practical internship, from Monday to Friday, with 8 consecutive hours of practical training, always with an assistant specialist. In fact, this internship will allow graduates to work with real students alongside professionals of reference in the area of Teaching Methods and Personalized Education, applying the most innovative procedures and the most current tools in Pedagogy.

In this totally practical training proposal, the activities are aimed at developing and perfecting the skills necessary to develop educational projects in areas and conditions with a high level of qualification, and are oriented to the specific training for the exercise of the activity. It is, without a doubt, an opportunity to learn by working.

The practical part will be carried out with the participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for educational praxis (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and its realization will be subject to the center's own availability and workload, being the proposed activities the following:

Module	Practical Activity
Instructional Design and Planning	Adapt educational content to the needs and learning styles of each student
	Design activities based on Cooperative Learning
	Implement projects that foster creativity in the classroom
	Plan sessions that integrate Basic Competencies and Multiple Intelligences
Evaluation and Monitoring of Learning	Evaluate in a personalized way the progress of each student according to their abilities
	Use digital tools for continuous monitoring of learning
	Develop detailed reports on individual and group performance
	Apply formative and summative assessment strategies
Innovation and Educational Technology	Incorporate adaptive learning platforms into sessions
	Develop interactive and multimedia resources to enrich the lessons
	Apply innovative methodologies, such as Project Based Learning (PBL)
	Use emerging technologies to encourage students' participation and motivation
Attention to Diversity	Implement personalized educational programs for students with specific needs
	Adapt activities to promote the inclusion of students with disabilities
	Facilitate the integration of foreign students through language teaching strategies
	Promote the participation of all students in an inclusive environment

05

Where Can I Do the Internship Program?

In its maxim of offering quality education within the reach of most people, TECH has decided to broaden the academic horizons so that this training can be provided in various educational centers. This is a unique opportunity, which will allow the professional to continue to grow their career alongside the best specialists in the sector in various reference schools.

“

Upon completion, you will emerge with valuable practical experience that will reinforce your ability to manage dynamic and personalized classrooms, thereby improving the quality of teaching and learning”

Teaching Methods | 13 **tech** and Personalized Education

The student will be able to do this program at the following centers:

CEPA Pozuelo de Alarcón

Country	City
Spain	Madrid

Address: Av. de Juan XXIII, 1, 28224
Pozuelo de Alarcón, Madrid

Adult education center with the objective of improving access to employment for young people by promoting equality and quality education.

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the Internship Program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This private qualification will allow you to obtain an **Internship Program's diploma in Teaching Methods and Personalized Education** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

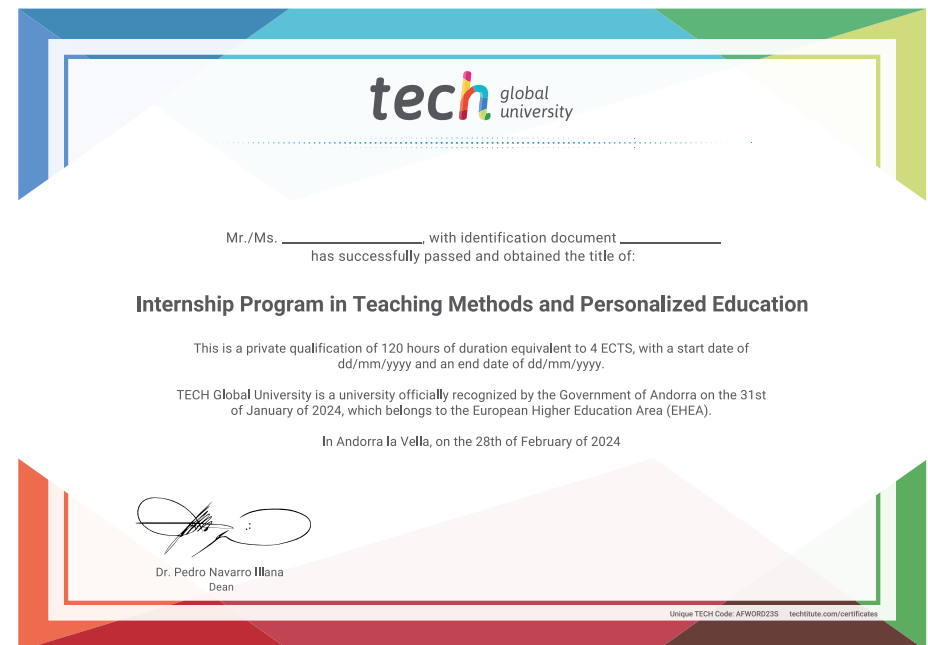

This **TECH Global University private qualification**, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
