tech 06 | Introduction

Therefore, an educational center that wants to be a reference and aims to obtain quality and efficiency in its practices, must be an expert in the programming and implementation of educational projects. This Postgraduate Certificate promotes an overall vision that will enable the implementation, or transformation, of educational projects that are intended to constitute the essence of the center, whatever their nature.

Thanks to this program, educational centers will be able to build the appropriate knowledge, the fundamental pillars of the educational project taking into account each and every one of the factors that must be addressed in the process of programming and implementation of educational programs. Otherwise, schools are doomed to the vagaries of fashion, to fruitless waste of time and money, and most importantly, to fail to achieve a sufficiently stable path for students to walk on and develop their full capabilities and potential.

This program is unique because it manages to offer the necessary tools to build this core of the educational center so that it can last over time, be viable and, of course, be efficient. In addition, the teaching staff has extensive personal and professional experience in all types of educational projects, which means that this Postgraduate Certificate is not developed from pure theory, but from the scientific evidence of practices in all types of educational centers. On the other hand, the online modality ensures that the best experts and professionals in each of the areas of programming and implementation of educational projects can be found among the list of professors who teach this Postgraduate Certificate.

Another of the reasons that make this Postgraduate Certificate unique is the specialization in all the areas necessary for Programming and Implementation of Educational Projects. While other programs focus on only a few aspects, the program we offer allows you to study each and every one of the fields that will make up the ideal construction of the educational project. Thus, starting with an introduction to educational projects and their most important elements, it will continue with the specification of the most innovative and significant types of projects on the international scene from which each educational center can be reflected or impelled to its implementation.

This Postgraduate Certificate in Advantages of the Implementation of an Educational Project contains the most complete and up-to-date program on the market. The most important features include:

- Case studies presented by experts in Advantages of the Implementation of an Educational Project
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice

A unique, key, and decisive experience to boost your professional development"

tech 24 | Methodology

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
- **3.** Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

tech 26 | Methodology

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 27 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 28 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
