Introduction

The Clinic and Educational Needs in High Capacity play a crucial role in the recognition and care of people with superior intellectual abilities. This area has become increasingly relevant due to the need to adapt educational environments to meet the specific demands of these individuals. That is why the teacher plays an important role in identifying, addressing and maximizing the potential of students with advanced cognitive skills. For that reason, TECH has developed a program in a 100% online format, which gives the educator the freedom to reconcile his daily responsibilities with his studies, since he will not be subject to inflexible schedules.

“

With this Postgraduate Certificate, you will address the non-pathological clinical aspects and referral criteria in students with high capacities"

As the understanding of High Capacity has evolved, so has the Clinical and Educational Needs for these conditions. As a result, more holistic approaches have been developed that consider emotional, social, and cognitive aspects, rather than focusing solely on educational performance. Also, the importance of early identification and the need for close collaboration between health professionals, educators, and parents has been emphasized.

Consequently, it is essential for the teacher to keep up-to-date with the most recent pedagogical approaches that address the educational requirements of students with outstanding intellectual abilities. In this way, you will be able to identify the characteristics and signs of students with these skills and adjust the syllabus to stimulate and enrich their learning process, providing them with opportunities to develop their full intellectual potential.

In order to achieve this objective, TECH has created a Postgraduate Certificate in Clinic and Educational Needs in High Capacity, with the purpose of providing the educator with the most up-to-date knowledge in the pedagogical field to meet the educational demand of individuals with outstanding intellectual competencies. A program that incorporates the Relearning methodology and that, in addition, will be presented in a 100% online format. In addition, it offers the participant the opportunity to access at any time and place, since it only requires an electronic device with an Internet access.

This **Postgraduate Certificate in Clinic and Educational Needs in High Capacity** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Case studies presented by experts in High-Capacity Individuals and Inclusive Education
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

With this program, you will explore the biological, psychological and social foundations that influence intellectual potential"

“

In just 6 weeks, you will discover internal and external dyssynchronies, and the negative Pygmalion effect"

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the educational year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will delve into the clinical features associated with High Capacity and how to explain them from this perspective, thanks to this 100% online program.

You will identify, throughout this program, the needs derived from self-awareness and cognitive profile in students with high capacities.

02

Objectives

This program aims to provide the teacher with the most innovative pedagogical tools and knowledge to identify, understand and meet the specific needs of students with high capacities. In this way, you will be able to identify these needs in both educational and social-emotional areas. The objective is to promote their integral development, maximize their intellectual potential and foster their emotional well-being, while challenging and stimulating them in their learning. All this will be achieved thanks to a series of multimedia materials that can be accessed 24 hours a day without restrictions.

“

Incorporate in your work practice the most up-to-date knowledge about personality and emotions in students with high capacities”

General Objectives

- ♦ Train the participant to recognize and initiate the detection of students who present characteristics compatible with the high capacity spectrum.
- ♦ Make known the main characteristics of high capacities, as well as the pedagogical, scientific, and legal framework in which this reality is framed
- ♦ Show students the main assessment tools, as well as the criteria to complete the process of indentifying the specific educational needs required for high-capacity individuals
- ♦ Enable students in the use of techniques and strategies for educational intervention, as well as for response orientation in different extracurricular areas
- ♦ Develop in students the capacity to elaborate specific adaptations, as well as to collaborate or to promote integral programs within the educational project and the attention plan for diversity at a center
- ♦ Value the multidimensionality of high capacities and the need for multiprofessional interventions with flexible and adaptive methodologies from an inclusive vision
- ♦ Consolidate innovation and the application of new technologies as a central and useful element in the educational process
- ♦ Awaken in the student the necessary sensitivity and initiative to become a catalyst for the paradigmatic change that will make an inclusive educational system possible

Specific Objectives

- ♦ Describe the non-pathological clinical aspects of high-capacity individuals
- ♦ Critique reference manuals and their applicability to in the area of high-capacity individuals
- ♦ Know the biological, psychological and social foundations of clinical models

“

Update your professional profile in a dynamic and completely effective way, by means of teaching aids such as interactive summaries or real case simulations”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
