Introduction

Communication is an essential aspect in the resolution of bullying cases, since it helps to modify the aggressor's behavior and to ensure that their behaviors are not repeated in the future. To achieve this, it is necessary for professionals in the educational environment to have the most effective communication strategies with students of different types. For this reason, TECH has opted to design this program, which will provide students with the best techniques to promote assertive communication with young people and will help them to use ICT as a preventive tool against bullying. In a 100% online way and from the comfort of your own home, you will be trained to deal with these situations with solvency.

“

This Postgraduate Certificate will allow you to carry out effective communication strategies to prevent bullying through the use of new technologies"

Teachers are often confronted with delicate situations of bullying between students, in which they must contribute to preserving the well-being of the young person being bullied. In this line, communication is of great importance, since being able to move the aggressors and make them understand the negative aspects of their behavior is crucial to bring about a change in their behavior. Therefore, it is essential that educators have a high level of mastery of the most effective communication strategies to deal with the different contexts of bullying in the classroom.

That is why TECH has created this Postgraduate Certificate, through which the professional will increase their communication skills to successfully deal with bullying situations. During 180 hours of intensive teaching, you will deepen in the communicative styles of unequal resolution or acquire the cutting-edge skills to communicate with students in an assertive way in bullying situations. Likewise, you will be able to optimize decision making to choose those that will provide the best impact in the management of these conflicts.

All this, following a complete 100% online methodology, through which the student will be able to develop his own study schedules to achieve effective learning. In addition, you will enjoy didactic content available in a variety of textual and multimedia formats, including readings, explanatory videos and interactive summaries. As a result, you will enjoy a completely enjoyable, individualized and decisive teaching.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Global University School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.
