01
Introduction

In recent years, images seem to be winning the battle against words thanks to new technologies. However, in digital environments, literature survives by adapting to new formats. For example, transferring the Spanish language and the passion for reading to the students is a challenge for the teacher. An even easier challenge if you have the necessary tools and the right content for each educational level. To support this teaching process, TECH has created this program, which provides the graduate with an update on the history of language, literature, and text comprehension techniques. All this, moreover, in a 100% online educational format and through innovative pedagogical resources, developed by an excellent teaching team with extensive experience in the education sector.

Boost your teaching career with this 100% online Postgraduate Certificate, flexible and compatible with your daily responsibilities. Enroll now"

In the current educational context, the teaching-learning process of Spanish Language and Literature is in a continuous struggle to awaken the students' interest in reading and the relevant use of the language.

The teacher specialized in this area is, in addition, flooded by digital devices and tools that must take advantage of their full potential to bring the students closer to their subject. However, it is equally important to adapt the content to the educational level and to provide the knowledge that is really needed at any given moment. That is why it is necessary for the student to have an update on the current study of language and literature in today's educational system.

This is how this 100% online Postgraduate Certificate in Disciplinary Training in Spanish Language and Literature in High School Education was created, An advanced program that allows teachers to update their knowledge of the history of the language, study grammar, literary education and text commentaries.

An advanced syllabus with a theoretical-practical approach, composed of additional and enriching pedagogical material based on video summaries, detailed videos, essential readings, and case studies.

TECH offers, in this way, a unique opportunity to improve the teaching work through a Postgraduate Certificate that can be carried out comfortably. All you need is an electronic device with an Internet connection to be able to view the content hosted on the virtual platform at any time of the day. A flexibility that favors the updating of knowledge, without neglecting the most demanding responsibilities.

This **Postgraduate Certificate in Disciplinary Training in Spanish Language and Literature in High School Education** contains the most complete and up-to-date educational program on the market. The most important features include:

- The development of case studies presented by experts in teaching in High School Education
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

In only 6 weeks you will obtain the complementary information you need to successfully develop your work as a Spanish Language and Literature teacher"

"*With this university program you will be aware of the main content to be taught to students in High School Education*"
Delve with the library of multimedia resources into the evolution of didactic models in the teaching of Literature.

Introduce your students to literary gatherings with the most current techniques that improve their reading habits thanks to this program.

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the educational year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

02
Objectives

The main objective of this Postgraduate Certificate is to provide students with a quality update of the contents to be taught in Spanish Language and Literature in High School Education. To achieve this, TECH provides an advanced syllabus developed by the best teachers in this field, with an extensive professional background linked to the teaching of classes in public and private educational centers.

Boost your skills as a teacher with all the pedagogical resources provided by this program"
General Objectives

    1.4.1.   Pragmatics.
    1.4.2.   Text Linguistics
    1.4.3.   Text and Its Properties
    1.4.4.   Modalization
    1.4.5.   Textual Typologies

1.5.   Classification of Text Types according to the Form of Discourse: Descriptive, Narrative, Dialogic, Expository and Argumentative Texts
    1.5.1.   General Ideas
    1.5.2.   Descriptive Texts
    1.5.3.   Narrative Texts
    1.5.4.   Dialogic Texts
    1.5.5.   Expository Texts
    1.5.6.   Argumentative Texts

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

" *Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

" *Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.

2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.

3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.

4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.
Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.
This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06
Certificate

The Postgraduate Certificate in Disciplinary Training in Spanish Language and Literature in High School Education guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Disciplinary Training in Spanish Language and Literature in High School Education** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
