Introduction

Nowadays, the importance of Emotional Intelligence to achieve academic, professional and life success has been confirmed. Therefore, the education sector has been implementing changes from the early stages, such as kindergarten, so that children can develop the ability to manage their emotions in a positive way. In this sense, TECH has developed this Postgraduate Certificate in Emotional Intelligence for Pre-School Teachers with all the tools that teachers need to implement effective and innovative teaching strategies. Thanks to the 100% online modality, you will be able to study in a natural and progressive way from wherever you are and, thus, build the professional background you desire.

“

TECH has a modern study platform and the best teachers that will facilitate your learning in Emotional Intelligence for Pre-School Teachers in a 100% online way"

Emotional education is based on managing empathy, orienting it towards the inculcation of positive values in students. In this process, the integration of the educational center and parents is fundamental to educate inside and outside the classroom. In this regard, this Postgraduate Certificate aims to provide the education professional with the key tools and advances in terms of Emotional Intelligence to work with pre-school children.

Through this program, teachers will discover the importance of their role in this process, the functions and limits they must consider, the EQ intervention in the Pre-School classroom and the resolution of conflicts with colleagues, parents and students. You will learn to apply Emotional Intelligence in the work environment, creating the right conditions to generate the best results during their management.

You will learn all this in an agile and uncomplicated way, in only 6 weeks, 100% online, thanks to the methodology implemented by TECH for each of its programs. You will enjoy content designed by experts in the field, presented in multiple formats, which will allow you to develop a highly qualified profile to work in early childhood education.

This **Postgraduate Certificate in Emotional Intelligence for Pre-School Teachers** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Practical cases presented by experts in Emotional Intelligence
- ♦ The graphic, schematic and eminently practical content of the system provides practical information on those disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Make a difference as an Pre-School Teacher with new knowledge and skills about Emotional Intelligence"

“

You will identify the relationship between Adulthood and Gender in Emotional Intelligence through the study of this program"

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

In only 6 weeks you will obtain the Postgraduate Certificate in Emotional Intelligence for Pre-School Teachers, renewing your professional profile.

Understand Unitary Intelligence and identify Multiple Intelligence in order to determine teaching strategies for the Pre-School stage.

02

Objectives

Emotional Intelligence is a tool that allows people to improve their quality of life and in schools it plays a very important role, achieving better results in students and relationships in general. In this Postgraduate Certificate, the teacher will be equipped with the most advanced knowledge to work with infant children, applying this ability. To achieve this, TECH has set a series of general and specific objectives in order to obtain the desired results according to the subject matter.

“

Through Emotional Intelligence you will obtain great advances in the classroom. Learn how to do it with this program”

General Objectives

- Update knowledge on Emotional Intelligence in its different fields of application, from the clinical, educational or labor area, in order to increase the quality of the professional's praxis in his performance
- Introduce the student to the vast world of Emotional Intelligence, from a practical perspective, to learn about the different disciplines that cover emotions in relation to human behavior and its possibilities
- Know the tools used in the practice of Emotional Intelligence
- Enable the development of skills and abilities by encouraging continuous preparation and research

Specific Objectives

- Explore the relationship between adulthood and gender in emotional intelligence
- Analyze the social determinism of emotional intelligence
- Understand unitary intelligence
- Identify multiple intelligence

“

Experts in Emotional Intelligence have designed the content of this program. Enroll now and prepare for the future"

03

Course Management

Thanks to TECH's interest in providing high academic level training, this Postgraduate Certificate has the best teaching staff. Reputed professionals have been in charge of designing all the study material, based on their own experiences and contributing from their research on Emotional Intelligence. Only in this way is it possible to offer the high academic level that the student deserves and is looking for.

“

A highly professional team makes up the teaching staff of this program and is available to you"

- 1.8. Pre-School Teacher Conflict with Parents
- 1.9. EI Intervention in Early Childhood Teacher Conflict
- 1.10. EI Intervention in the Work Environment of Early Childhood Teachers

“

It's time to leverage your talent and boost your career. Apply for this new program and raise your level of knowledge”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Postgraduate Certificate in Emotional Intelligence for Pre-School Teachers guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This private qualification will allow you to obtain a **Postgraduate Certificate in Emotional Intelligence for Pre-School Teachers** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003.
