01

Introduction

Pedagogy does not consist only in the acquisition and transmission of cultural contents. The educational process constitutes a set of actions and experiences through which educability is made possible. Hence the importance of in-depth teacher training. In addition, taking into account the analysis of the current social reality, the teacher must understand education as a process of personal construction. For this reason, TECH has designed this program in which throughout 6 weeks of 100% online education, the student will make a complete journey through the connection between the Religiosity of the person and their education. All of this is concentrated in 150 totally flexible teaching hours, so that the graduates themselves will determine their own schedules and places of study, without having to adapt to a pre-established schedule.

“

Thanks to this Postgraduate Certificate you will deepen, through a theoretical and practical vision, in the evangelizing mission of the Church"

The Postgraduate Certificate in Faith Pedagogy has been designed to train the teacher in the most specific knowledge of divine teaching. In this way, this program aims to establish education as a process of building one's own personality, through new teaching experiences. Catholic Education is a fundamental requirement of education today because of the high demand of students who request it. Therefore, it is indispensable for the professional to receive efficient and high quality instruction such as that offered by this program. The Faith Pedagogy implies a high responsibility and requires specific skills to know how to transfer the information to the students in a precise way, so that their interest does not diminish. It is therefore imperative to receive well-founded teachings, rich in reliable knowledge and explained in depth.

In this line, the professional requires a constant improvement of his competencies and skills when transmitting religious teaching to his own students. This expertise is achieved through a complete training that presents theoretical and audiovisual content to reinforce not only the concepts, but also the way in which they can be disseminated for greater impact. The syllabus selected by TECH embraces the connection between a person's religiosity and their education, as well as the proper character of school religious education. Therefore, the graduates will integrate the most specialized knowledge that will give them unique skills and competencies when it comes to transferring the acquired knowledge to their own students.

For all of the above, TECH and its team of experts in religious pedagogy have developed a very complete program. In this way, the teachers will be able to bring a distinctive uniqueness to their religious teaching through the most innovative teaching strategies. With this program, composed of high-value content presented in different multimedia formats (detailed videos, research articles, teaching resources, complementary readings), students will enrich their knowledge, developing exceptional skills. Through the latest educational technology 100% online and the most effective and efficient methodology, the graduate will be able to specialize and become an elite professional in Pedagogy of Faith.

This **Postgraduate Certificate in Faith Pedagogy** contains the most complete and up-to-date educational program on the market. Its most notable features are:

- ♦ The development of case studies presented by experts in Faith Pedagogy
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

This training will provide you with the security in the performance of your teaching practice that will make you grow personally and professionally"

“

This Postgraduate Certificate allows you to exercise in simulated environments, which provide immersive learning programmed to train in real situations”

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, in which the professional will have to try to solve the different professional practice situations that will arise throughout the academic course. This will be done with the help of an innovative system of interactive videos made by renowned experts.

Take advantage of the opportunity and train yourself to respond to the challenges that the current social reality poses to education.

You will be able to access all the content from anywhere and at any time, thanks to the 100% online format offered by this program. In addition, you will be able to download the content to consult it whenever you need it.

02

Objectives

The educational process is not a linear process, but has evolved over time. Therefore, it must be adapted to the cultural and social context in which it is carried out. Thanks to the Postgraduate Certificate in Faith Pedagogy, the student will delve into the evolution of education throughout history, as well as in the current educational process itself. After completing the program, graduates will have optimal resources that will prepares them to face their daily work with fluency and efficiency. In addition, all of this is presented in a 100% online format that will allow students to study anywhere and from any device with an internet connection.

“

Enroll in this program that will enhance your qualities to the maximum exponent to meet the demands of today's education"

- ♦ Analyze the social reality and challenges in education
- ♦ Identify the connection between the person and the Religiosity
- ♦ Rate the Evangelism Mission of the Church
- ♦ Know the main pedagogical lines in the teaching of Catholic Education

03

Structure and Content

The composition of the syllabus of the Postgraduate Certificate in Faith Pedagogy has been carefully selected in a structured way, in order to provide new and more complete knowledge. TECH uses the revolutionary Relearning methodology in the development of its programs. This tool consists of the repetition of the most important concepts throughout the content, so that the student acquires the knowledge in a natural and progressive way. In addition, a compilation of additional pedagogical resources is included and presented in multimedia format, ensuring the student a learning experience that is not only fully rigorous, but also adapted to the needs of today's teaching landscape.

“

Learn with the most up-to-date content the different ways of educating and education to improve your skills in transmitting knowledge about the Faith"

Module 1. Faith Pedagogy

- 1.1. School
 - 1.1.1. Approach to the Concept of "school"
 - 1.1.2. Evolution throughout History
 - 1.1.3. Types of Existing School
- 1.2. What is Educate?
 - 1.2.1. Etymology and Meanings of the Term "Education"
 - 1.2.2. Analysis of the Different Ways of Educating and Education
- 1.3. Educational Process
 - 1.3.1. Education as a Process of Personal Construction
- 1.4. The Demands of Education in Today's World
 - 1.4.1. Analysis of The Current Social Reality
 - 1.4.2. Challenges that this Reality Poses to Education

 - 1.9.1. Jesus and His Pedagogy of Love
- 1.10. Keys to the Christian Educational Model
 - 1.10.1. Main Pedagogical Lines of the Christian Educational Model

“

Contrasted and up-to-date contents that converge with your vocation to become your best professional version"

04

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

05

Certificate

The Postgraduate Certificate in Faith Pedagogy guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Faith Pedagogy** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (**official bulletin**). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
