# tech 06 | Introduction

The absence of clearly defined objectives for workers can undermine company performance, according to several studies. Fortunately, new technologies provide solutions to turn the situation around, especially with game mechanics. Through Gamification, a company's staff can regain their motivation by setting goals, which are achieved with points harvested in contests or competitions.

It is, in fact, an excellent technique to promote team culture, since it is ideal that such competitions are organized in groups, increasing the interaction between colleagues. Under this context arises this TECH Postgraduate Certificate, which will provide a high level of preparation in these gamification techniques that have been reported to have achieved up to 20% more sales in different companies. The best thing is that these strategies are perfectly applicable regardless of the nature of the employee's tasks, adding synergies with other workers of similar functions.

With a format with all the flexibility that the students can imagine, to take this extensive training only requires an Internet connection. # tech 24 | Methodology

# Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

# Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.
