# Introduction

Each educational center or school institution has the fundamental objective of ensuring that its students acquire the necessary skills depending on the field in which they find themselves. The teaching-learning process is essentially marked by the type of educational project followed by the center. Everything else are factors, methodologies, or fields that circumscribe the educational project.

“

*This Postgraduate Certificate in Introduction to Educational Projects generates a sense of confidence in the performance of your profession, which will help you to grow personally and professionally"*

This program will introduce the education professional to the deep knowledge of the educational project, providing information regarding the bases on which a project is built, taking into account the main objective which is to promote the role of education in all its fields of action.

In this way, the reality of the educational project will be explored and answers will be given to important questions such as: What is an educational project? What is it for? What is its origin? Who is the target audience? What are the most important factors? Which actors are involved? What are the contents of an educational project? How is the evaluation of the project carried out?

Once introduced to the subject, the student will understand the different types of projects, as well as their purpose and function in society. On the other hand, the main knowledge techniques that allow solidifying projects such as these will be explained throughout the program. Thus, it will delve into technological and innovative projects that have had an impact on society, which have transformed schools, educational centers and schools from its different variations, being these sports, artistic and scientific projects.

It is a 100% online program that will allow the education professional to identify the action plan for the implementation of an educational project, identifying in the first instance its introduction to it. A program that will allow the student to download the material from any mobile device, without pre-established schedules or cumbersome procedures.

This **Postgraduate Certificate in Introduction to Educational Projects** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Case studies presented by experts in Introduction to Educational Projects
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Latest news on Introduction to Educational Projects
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve learning
- ♦ With special emphasis on innovative methodologies in Introduction to Educational Projects
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*Update your knowledge through the program in Introduction to Educational Projects”*

“

*This Postgraduate Certificate is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge in Types of Educational Projects, you will obtain a qualification from TECH Technological University"*

It includes in its teaching staff, professionals belonging to the field of Types of Educational Projects, who bring to this program the experience of their work, as well as recognized specialists from reference societies and prestigious universities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program to learn in real situations.

This program is designed around Problem-Based Learning, whereby the Educators must try to solve the different professional practice situations that arise throughout the program. For this purpose, educators will be assisted by an innovative interactive video system developed by recognized experts in the field of Types of Educational Projects, with extensive teaching experience.

*Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.*

*Take the opportunity to learn about the latest advances in Introduction to Educational Projects and improve your students' education.*

# 02

# Objectives

The program in Introduction to Educational Projects is oriented to facilitate the performance of the professional dedicated to working with students related to the educational field.

“

*This program is oriented so that you can update your knowledge in Introduction to Educational Projects, with the use of the latest educational technology, to contribute with quality and confidence to the decision-making and monitoring of these students”*

## General Objectives

---

- ♦ Know the most important elements of the educational project
- ♦ Specialize people in the educational field in order to improve the educational projects they use, or to develop an innovative project of their own creation or based on evidence
- ♦ Study each of the phases of programming and implementation of an educational project
- ♦ Analyze the essential factors to be taken into account in the programming and implementation of an educational project
- ♦ Get a global view of the whole process and not just a biased position
- ♦ Understand the role of each of the educational agents in each phase of the programming and implementation of the educational project
- ♦ Delve into the essential success factors of the educational project
- ♦ Become an expert to lead or participate in a quality educational project

*Take advantage of the opportunity and take the step to get up to date on the latest developments in Introduction to Educational Projects”*

## Specific Objectives

---

- ◆ Understand the concept of an educational project
- ◆ Study the most popular approaches to educational projects
- ◆ Understanding the start-up of innovative educational projects
- ◆ Analyze the purpose of educational projects
- ◆ Determine the learning objectives and the process to reach them
- ◆ Evaluate possible centers where the educational project can be implemented
- ◆ Understanding which factors are key in the programming and implementation of educational projects
- ◆ Learn which agents are involved in the process of programming and implementing educational projects
- ◆ Know the most common types of educational projects in schools
- ◆ Discover the most innovative educational projects of the moment
- ◆ Understand the variety of programming and implementation possibilities with regards to educational projects
- ◆ Analyze the most common and innovative educational projects in the technological field
- ◆ Study educational projects based on the most innovative methodologies
- ◆ Understand value-centered educational projects that improve various factors of the teaching-learning process
- ◆ Determine the concept of Evidence-Based Projects

*A unique, key, and decisive program to boost your professional development”*

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides
