Introduction

In the first years of life is where people begin to speak and communicate, therefore, it is important that, during the Pre-School Education stage, language is learned in a broad sense and communication barriers are eliminated. This program will enable teachers to teach this process to their students, but also to detect possible communication difficulties.

“

Acquire the necessary skills to teach your language classes in an attractive way for your students"

Language teaching is a scientific discipline whose main objective is to teach teachers how to develop communicative skills in their students. Through these communicative skills, people carry out their main activities, that is to say, they relate to others and to themselves by learning what is necessary to live.

Specifically, it is in the Pre-School stage where the development of oral and written language begins. For this reason, the above concepts are studied in this Postgraduate Certificate, as well as the role of the teacher in detecting the difficulties of students and enhancing their capabilities to the maximum.

This education is distinguished by the fact that it can be taken in a 100% online format, adapting to the needs and obligations of the student, in an asynchronous and completely self-manageable manner. The student will be able to choose which days, at what time and how much time to dedicate to the study of the contents of the program. Always in tune with the capabilities and skills dedicated to it.

The order and distribution of the subjects and their topics is specially designed to allow each student to decide and self-manage their time. For this purpose, you will have at your disposal theoretical materials presented through enriched texts, multimedia presentations, exercises and guided practical activities, motivational videos, master classes and case studies, where you will be able to evoke knowledge in an orderly manner and work on decision making that demonstrates your high-level education within this field of teaching.

This **Postgraduate Certificate in Learning Spanish Language in Pre-School Education** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ The development of practical cases presented in simulated scenarios by experts in each area of study, where the student will effectively put their learning into practice and demonstrate skills acquisition
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ The latest developments in Spanish language teaching
- ♦ Practical exercises where the students undergo the self-assessment process to improve learning, as well as activities at different skill levels
- ♦ Special emphasis on innovative methodologies and teaching research
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

If you are looking to excel in your profession, do not think twice, in TECH we offer you the most complete program of the moment"

“

Acquire a higher professional level that will allow you to compete with the best thanks to the completion of this Postgraduate Certificate"

Its teaching staff includes professionals belonging to the field of education, who contribute their work experience to this training, as well as renowned specialists from reference societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the teacher must try to solve the different professional practice situations that arise throughout the Postgraduate Certificate. For this purpose, the professor will be assisted by an innovative interactive video system created by renowned and experienced experts in Spanish language and with great teaching experience.

We offer you the best teaching methodology with a multitude of practical cases so that you can develop your study as if you were facing real cases.

The program invites us to learn and grow, to develop as teachers, to learn about educational tools and strategies in relation to the most common needs in our classrooms.

02

Objectives

The Postgraduate Certificate in Learning Spanish Language in Pre-School Education is oriented to develop in students the skills required for the exercise of their profession. For this purpose, TECH offers the most complete education from the hand of the main experts in the field.

“

We want to develop your skills so that you can, in a short period of time, make the professional leap you deserve”

General Objective

- Develop in the teacher the necessary competences to teach their lessons in the Pre-School Education stage, complying with the educational objectives foreseen and focused on Spanish language teaching

Our goal is to achieve academic excellence and to help you achieve it too"

Specific Objectives

- ♦ Help Pre-School Education teachers to develop their students' communicative competences
- ♦ Get to know the didactics of the Spanish Language and how to apply it
- ♦ Establish different children's books to be applied in the classroom
- ♦ Master the objectives and contents of the syllabus

03

Structure and Content

The structure of the contents has been designed by top level professionals within the educational panorama, with a wide trajectory and recognized prestige in the profession, endorsed by their experience, and with a wide command of the new technologies applied to teaching.

“

The best content to create the best teachers”

Module 1. Teaching Spanish Language in Pre-School Education

- 1.1. Language Teaching in Pre-School Education
 - 1.1.1. What is Language Teaching?
 - 1.1.2. The Linguistic System
 - 1.1.3. Language Functions
 - 1.1.4. Theoretical and Methodological Guidelines
- 1.2. Methodology of Language Teaching
 - 1.2.1. Importance of Literature
 - 1.2.2. Bringing Literature to the Classroom
 - 1.2.3. Typology and Selection of Children's Books
- 1.3. Verbal Language Programming in Pre-School Education
 - 1.3.1. Legislation and Language Teaching: Programming and Syllabus
 - 1.3.2. Objectives, Contents and Methodology
 - 1.3.3. Evaluation
- 1.4. Acquisition of Language
 - 1.4.1. Acquisition of Language
 - 1.4.2. Prelinguistic or Preverbal Communication Stage
 - 1.4.3. Linguistic Stage
- 1.5. Teaching Vocabulary in Pre-School Education
 - 1.5.1. Vocabulary Concept
 - 1.5.2. Theories and Methodology for the Classroom
 - 1.5.3. Words and the Child
- 1.6. Oral Communication in the Classroom: The Dialogue
 - 1.6.1. Comprehension and Expression
 - 1.6.2. Language for Thinking
 - 1.6.3. Symbolic Play
 - 1.6.4. Approach to Reading and Writing
- 1.7. Stories for Children
 - 1.7.1. Telling or Reading: The Dilemma
 - 1.7.2. Preparing a Story for Oralization
 - 1.7.3. Successful Storytelling
 - 1.7.4. Expressive Reading and the Support of Images

- 1.8. Poetry and Theater for Children
 - 1.8.1. Types of Children's Poetry According to Age
 - 1.8.2. Recitation, Memorization and Traditional Games
 - 1.8.3. Dramatic Performances for Children
 - 1.8.4. Theater and Puppets in the Classroom
- 1.9. The Literature that Children Make: Stories, Poetry and Theatre
 - 1.9.1. Creativity in Childhood
 - 1.9.2. Springs for Inventing Stories
 - 1.9.3. Poeticism and Children's Language
 - 1.9.4. Mechanisms for Poetic Creation
 - 1.9.5. Understanding Dramatization and Theater
 - 1.9.6. Exercises and Staging
- 1.10. Literature and its Interrelationships
 - 1.10.1. For Linguistic Development
 - 1.10.2. For Integral Development
 - 1.10.3. Evaluation

“

This program is the key to advancing your professional career, don't let this opportunity pass you by"

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, we have prepared more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Video Education Techniques and Procedures

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, students can watch them as many times as they want.

Interactive Summaries

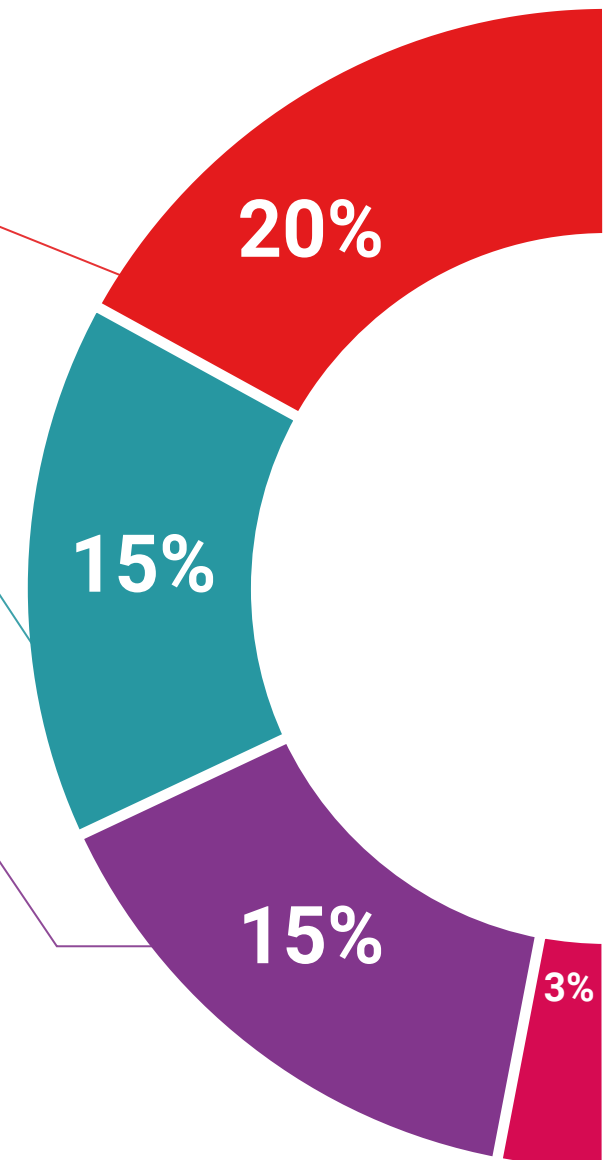

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically assess and re-assess students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical and effective way to help students progress in their learning.

05

Certificate

The Postgraduate Certificate in Learning Spanish Language in Pre-School Education guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Learning Spanish Language in Pre-School Education** contains the most complete and up-to-date program the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Certificate: **Postgraduate Certificate in Learning Spanish Language in Pre-School Education**

Official No. of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
