# Introduction

Current education requires elements that go beyond any subject, so the teacher must understand the needs of each of his students within the classroom. Diversity and inclusion, as well as sex education and emotional intelligence are fundamental aspects that every child should know. Therefore, more and more institutions have within their ranks teaching professionals trained in these areas. That is why TECH has created this program in order to provide the most rigorous knowledge and requested by a constantly evolving field. It will contain audiovisual material that delves into the competences of teachers for inclusive schools.

“

*Register now and discover the changes that the education sector has made in terms of more comprehensive learning"*

To ensure quality education, it is necessary to incorporate elements such as diversity, inclusion, respect and equality. This is due to the principles and foundations with which each student has been taught since birth and which, therefore, puts into practice within the classroom. For these beliefs and practices to be respected, the concept of inclusive school must be strengthened. Therefore, more and more schools are looking for more teachers training in areas such as equality and social integration.

Therefore, TECH has created this qualification for professionals who want to delve into these aspects of inclusive education. Inside, you will find a comparison of the field and its historical path, showing the main changes in the education sector. It will also delve into concepts that strengthen the integral model and that includes emotional intelligence, sexual education and diversity. This is how this Postgraduate Certificate is presented as a unique learning opportunity for teachers to update their knowledge.

Being a 100% online program, it is packed with high-impact audiovisual material and practical exercises based on the Relearning methodology, leaving behind the long hours of memorization and study and ensuring practical and effective learning through real cases and simulation. In addition, you will not need to go to a face-to-face centre and only have a device with an Internet connection.

This **Postgraduate Certificate in Teacher Preparation for Inclusive Schools** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Teacher Preparation for Inclusive Schools

## International Guest Director

Cathy Little, Ph.D. in Education, has a long career teaching children and young people in Pre-School and Primary Education centers. In particular, she is noted for her extensive experience in Special Education centers, where she has taught students with Autism Spectrum Disorders and Behavioral Disorders. In this field, she was assistant director of a Support Unit attached to a prestigious elementary school. She has also taught at both undergraduate and postgraduate levels and has held the position of Director of Initial Teacher Education at the University of Sydney.

Throughout her career she has proven to be an educator who is passionate about providing an engaging and positive educational experience for all students. Her areas of interest are high support needs and positive behavioral guidelines. Therefore, her research work has focused on the study of efficient pedagogical models that address the most complex learning difficulties.

In this line, one of her projects has dealt with teachers' attitudes and social inclusion of students with Asperger syndrome. She has also collaborated with Srinakharinwirot University in Bangkok to investigate the behavior, knowledge and perceptions of Thai teachers about children and adolescents with Autism Spectrum Disorder. She is also a member of the International Society for Autism Research and a member of the Australian Special Education Association.

She has an extensive list of published scientific articles and conference papers on education. She has also published the book *Supporting Social Inclusion for Students with Autism Spectrum Disorders*. For all this, she has been awarded twice with the Teaching Excellence Award from the Faculty of Education and Social Work of the University of Sydney.

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

**Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

**Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

**Classes**

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

**Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
