Introduction

The art of Greece and Rome is formed by two of the most important styles in history and became the canon or model to follow when making any architectural, sculptural or pictorial work. In this sense, being the main promoters and the great base of art in the world, has caused the attention and relevance at a global level. That is why this program has been created, with the purpose of having the most complete content for the teacher related to differentiate and recognize the different artistic styles of both civilizations, bringing the most exclusive knowledge to the classroom about Classical Culture. This, with the support of the innovative Relearning system, in addition to the comfortable pedagogical format 100% online.

“

This Postgraduate Certificate integrates the best content related to materials and technical innovations in Roman architecture”

Classical art is based on the aesthetic and philosophical principles established by the Greco-Roman civilization, which is also the basis of modern culture. Today's art, literature and music coexist, albeit in a dependent way, through extrapolations of systems devised and evolved by this culture several hundred years ago. In that respect, it adheres to the artistic principles and norms established by centuries of master painters and sculptors, all with artistic lineage going back to the noble Greeks and Romans and their interpretation and formal representation of the human form and the environment in which it exists.

In this sense, research in this field has progressed over time, discovering answers to multiple questions and making it clear that professionals in Classical Culture should continue to grow professionally to be at the forefront in this area of knowledge. In this way, this Postgraduate Certificate will provide the expert with the best updates in the Teaching of Classical Art.

Students will obtain relevant knowledge in specific aspects related to the selection and knowledge of the most outstanding elements of artistic production and delving into concepts such as the 3 periods: Archaic, Classical and Late. A program that integrates a specialized teaching team and complements the program with high quality audiovisual content providing the dynamism required by the program.

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.
