Introduction

Teaching of Geography in Primary Education should be focused on awakening the child's interest in obtaining new knowledge of his or her environment. Creating the necessary motivation for this is possible with an innovative educational strategy. In this program, the graduate will be able to give a didactic treatment to geographic space and the study of the environment. It will teach students how to use and take advantage of the materials and didactic resources for learning Geography, among other aspects concentrated in a complete syllabus developed by specialists in the subject and that will serve as a guide throughout the process. A completely online program available through the most modern Online Campus without limitations, so that students can achieve their goals effectively.

“

Thanks to this Postgraduate Certificate you will contribute to the development of innovative and critical thinking in primary school children about Geography as a discipline”

Explain the Teaching of Geography, taking into account the topics referred to in the Primary Curriculum, the materials and resources available. As well as the relationship between Geography and Cultural Heritage, its conservation and its enhancement to develop the lesson in the classroom, is what will be achieved through this Postgraduate Certificate.

A program developed by specialists in Teaching of Geography in Primary Education, where the graduate will explore the specific problems of teaching geographic space from an intercultural approach. You will learn the language of geography: vocabulary, maps and graphs, as well as the use of instruments for geographic analysis, including the compass and other measuring devices.

This program aims to contribute to the construction of the professional background of the teacher of the future, due to the high demand for qualified professionals in this sector and that, through a modern methodology based on Relearning, will allow the rapid assimilation of the concepts and understanding of the study material presented in this high-level academic space.

In a completely online mode, from any device with internet connection, the student will be able to complete the program in 6 weeks or 150 hours of study. Enjoying full freedom of organization in conjunction with your current agenda. Undoubtedly, the best opportunity to achieve new knowledge and a curriculum according to the current reality.

This **Postgraduate Certificate in Teaching of Geography in Primary Education** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Geography and History Didactics for Primary School
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Understand the evolution of the concept of space and the perception of the city in elementary school children to provide effective teaching in and out of the classroom"

“

You will master the use of materials and didactic resources for the teaching-learning of Geography in elementary school in only 6 weeks with this Postgraduate Certificate"

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that arise throughout the academic program. For this purpose, it will be assisted by an innovative interactive video system created by renowned experts.

Acquire the skills that will make you stand out in your environment as a teacher of Primary Education in the teaching of Geography in an innovative and creative way.

Enjoy the 100% online teaching modality offered by TECH, but with the guarantee of specialized content and the educational quality you deserve.

02

Objectives

The purpose of the Primary Education teacher is to facilitate the student's learning of oral expression and comprehension, reading, writing, the acquisition of basic and integral notions of different topics and subjects, for the development of critical and creative thinking. Through this Postgraduate Certificate, the graduate will be able to master the Teaching of Geography, taking into account the topics referred to in the Primary Curriculum, the materials and resources available in order to raise the level of knowledge of their students.

“

TECH has the best educational offer with state-of-the-art methodology and technology that will help you evolve in the learning process; this is your opportunity to succeed. Enroll now”

General Objectives

- ♦ Define the curriculum of Social Sciences
- ♦ Acquire knowledge and skills related to the Teaching of Geography in Primary Education, from an integrating and ethical perspective in which Cultural Heritage is the common nexus of the branches that encompass the Social Sciences
- ♦ Use the necessary tools to put into practice the knowledge learned, as well as to elaborate and defend with the necessary arguments the solutions to the possible problems that may arise in the corresponding area of study and work
- ♦ Design and plan teaching and learning processes using a method that integrates History and Geography studies from an instructional and cultural orientation
- ♦ Define the value of Cultural Heritage and its role in understanding, educating and developing today's society through the subjects of Geography and History
- ♦ Promote in the classroom, through these subjects, democratic, critical and diverse education, taking into account gender equality, equity and the value and importance of human rights, among others

- ♦ Pricing analyst at Aliseda Inmobiliaria
- ♦ Anida's control technician
- ♦ Architect at Arial Technical
- ♦ Architect at AD Architecture, their own studio
- ♦ Architect at MORAL Arquitecure
- ♦ Graduate in Fundamentals of Architecture from Nebrija University
- ♦ Master's Degree in Architecture from Nebrija University
- ♦ Master's Degree in Teacher Training for Compulsory Secondary Education, Baccalaureate and Vocational Training from the Madrid Polytechnic University

“

A unique, key, and decisive educational experience to boost your professional development”

04

Structure and Content

The professional will discover the advantages of studying 100% online. TECH offers you a unique and avant-garde methodology that will make your experience an efficient one with ample personal and professional benefits. When you enroll in this program, you will be provided with a specialized syllabus, developed by the best experts. You will have material designed in different formats, distributed in different multimedia resources through the most comfortable to use and secure educational platform. In only 6 weeks you will achieve the program that will allow you to work in advanced teaching environments about Teaching of Geography in Primary Education.

“

Only with the best content will you be able to advance comprehensive learning about the goals and purpose of teaching Geography in the classroom”

Module 1. Teaching Geography

- 1.1. Geography as a Discipline
 - 1.1.1. Definition and objectives
 - 1.1.2. Historical Evolution of the Subject
 - 1.1.3. Theoretical Background in Teaching Geography
- 1.2. Geographic Space and Primary Education: Studying the Environment
 - 1.2.1. Objectives and Purpose of Teaching Geography in the Classroom
 - 1.2.2. Teachers' Geographic Competencies: Knowledge, Skills and Geographic Education
 - 1.2.3. The Limitations of Geography in Current Curricula
 - 1.2.4. Geography and Society
- 1.3. Evolution of the Concept of Space and the Perception of the City in Primary Education
 - 1.3.1. Teaching and Learning Geography: Building the Concept of Space in Children
 - 1.3.2. Spatial Representation Development
 - 1.3.3. Children and Understanding the World around Them: The Countryside and the City
 - 1.3.4. Interculturality in Geography
- 1.4. Teaching Materials and Resources for Geography Education
 - 1.4.1. Learning the Language of Geography: Vocabulary, Maps and Graphs
 - 1.4.2. Instruments for Geographic Analysis: Compass and Other Measuring Devices
 - 1.4.3. Comparative and Classificatory Charts
- 1.5. Physical Geography
 - 1.5.1. What Is Physical Geography?
 - 1.5.2. The Contents of Physical Geography in the Elementary School Curriculum
- 1.6. Procedures in Physical Geography
 - 1.6.1. Direct Observation
 - 1.6.2. Orientation in Space
 - 1.6.3. Map Analysis and Graphical Representations
 - 1.6.4. Methodological Aspects
 - 1.6.5. Space Categorization
 - 1.6.6. Complementary Activities

- 1.7. Human Geography
 - 1.7.1. What Is Human Geography?
 - 1.7.2. Contents of Human Geography in the Elementary School Curriculum
- 1.8. Procedures in Human Geography
 - 1.8.1. Procedures to Work in Urban Settings
 - 1.8.2. Population Pyramids: Preparation, Forms and Analysis
 - 1.8.3. Methodological Aspects
 - 1.8.4. Complementary Activities
- 1.9. Learning Geography through Cultural Heritage
 - 1.9.1. Narrative Landscapes: The Representation of Geographic Environments in Art
 - 1.9.2. Geographical Environments and its Value as Heritage
 - 1.9.3. Cultural Heritage Contributions to Teaching Geography in Primary Education

“Develop the most complete professional profile for teaching Teaching of Geography in Primary Education with this 100% online Postgraduate Certificate. Enroll now”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Teaching of Geography in Primary Education guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Teaching of Geography in Primary Education** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

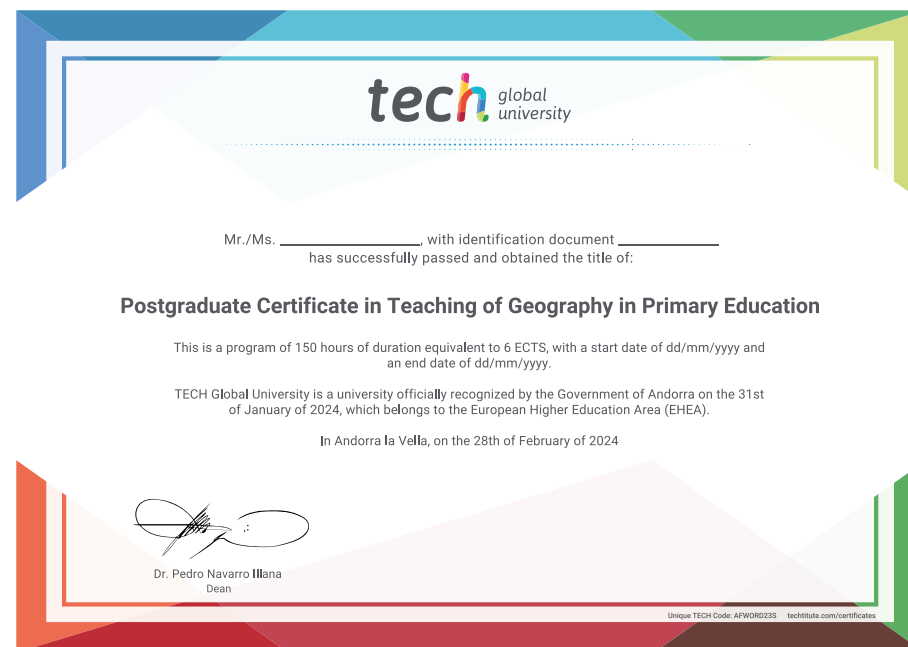

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program
