# Introduction

In ancient Greece, religion was an integrating agent of the polis. Citizens showed their commitment to the city by participating in collective ceremonies of a civic nature. On the other hand, common beliefs and Panhellenic sanctuaries functioned as elements of identity for the Greeks as a whole. In accordance with the relevance that this subfield has taken in the field of history, this program has been opened in order to offer an exclusive content on how to differentiate and recognize the foundations of ancient religion. All this will be possible with the support of didactic resources that are available to students during the development of the program.

“

*With this Postgraduate Certificate you will be able to implement innovative skills in your practice in order to favor the learning of your students in Greco-Roman Mythology"*

Greco-Roman religion, classical religion or Olympian religion are usual denominations in the literature to designate the system of religious beliefs of the Greco-Roman civilization, which, however, have particular forms in each of these civilizations: Greek religion and Roman religion; just as it happened in other manifestations of culture. In this way, the teacher has managed to bring the different knowledge from specialized readings and several studies on the influence of divination in the politics of Antiquity and the private cults of the Greeks and Romans.

In this sense, the research carried out in this field has advanced cultivating more questions, which will be solved in this program, making it clear that teachers must continue to be up to date in this area of knowledge. In this way, this Postgraduate Certificate will offer the professional current innovations in the Teaching of Greco-Roman Religion, as well as an exhaustive knowledge of the impact of religion in society.

Graduates will enhance their skills in key and very important aspects related to understanding the footprint of religiosity today and how it became an object of study, analyzing and delving into items such as the cult in Greece and Rome, their sacrifices, prayers and offerings, those being some of the many practices that were performed to worship the gods. A program that integrates an excellent experienced faculty along with multimedia content of quality that offers dynamism and comfort with the online modality.

Also, TECH thinks about comfort and excellence, that is why this program offers the most complete and highest quality update, being a very flexible program that requires only a device with internet connection to easily access the platform from the comfort of the place where the student is.

The **Postgraduate Certificate in Teaching Greco-Roman Religion** contains the Educational most complete and up-to-date program the market. Its most notable features are:

- ♦ Practical cases presented by experts in Humanities, Art History and Teaching
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
