Introduction

The benefits of Bilingual Education are expressed in a significant development of the child's cognitive skills in the use of a second language, mainly English. Thanks to curricular adaptation, it has been possible to implement teaching and pedagogical tools in the classrooms through which the student can continue their educational progress while improving their language skills.

TECH's program focuses on this area, on the management and adaptation of the centers that want to carry out bilingual teaching. Therefore, through a 100% online program you will be able to learn in detail the successful academic actions in the teaching environment and implement them in your daily practice.

“

A program based on innovative education and with which you will stand out in the school environment due to the design of state-of-the-art bilingual syllabus"

More than one billion people in the world speak English. In addition, the command of this language has become a fundamental requirement in the selection processes of the best companies. Numerous investigations carried out by specialists in the field of pedagogy have determined that children are more easily able to handle a new language than adults because their neural networks are developing and they have a greater predisposition to knowledge and learning. For this reason, projects related to bilingual education and focused on satisfying the very high demand for professionals who are fluent in English have multiplied in recent years, allowing schools to offer education based on the vehicular language in combination with secondary education.

And in order for the teacher to be able to get up to date on the organizational and control guidelines in the center to carry out successful language plans, TECH has designed the Postgraduate Diploma in Management of Bilingual Education in Pre-school and Primary, a program at the forefront of pedagogy that includes the best strategies to implement the most innovative and sophisticated bilingual models in your center. This is an academic program developed over 6 months in which the graduate will be able to delve into the latest developments in Education and in the coordination of teams for teaching in English and Spanish.

All this 100% online and making use not only of the most complete, dynamic and exhaustive syllabus, but also of hours of high-quality additional material: detailed videos, research articles, complementary readings, images, diagrams and much more! This is, therefore, a unique opportunity to lead a state-of-the-art learning project that will take your teaching to the highest level through the implementation of bilingualism in your Pre-school and Primary classes.

This **Postgraduate Diploma in Management of Bilingual Education in Pre-School and Primary Education** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ Over 75 cases presented by experts in bilingual early childhood education
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Methodological and application innovations in bilingual pre-school education
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve the Interactive learning system based on the decision making process on the situations presented
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Through a thorough knowledge of the principles of bilingualism, you will be able to define academic strategies based on the pedagogical techniques that are achieving the best results today"

“

A program that will introduce you to Neuroeducation and bilingualism as the keys to teaching through knowledge of current projects in the international environment"

The program includes, in its teaching staff, professionals from the sector who bring to this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Thanks to the comprehensiveness of this program, you will be able to develop integrated curricula based on the most innovative guidelines for bilingualism in the classroom.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
