Introduction

Philosophy and Anthropology are both disciplines of thought. A space in which rationality submits life to the relentless scrutiny of the analytical vision of events, paradigms and developments that these fields study. Teaching them is an exciting challenge that professionals must undertake, prepared to transmit passion and interest to their students. This program will enable teachers to understand these subjects in a profound way so as to make them attractive and stimulating for students.

“

Submerge yourself in the expertise of the great thinkers of our time: "When a human being does not know what to do, the only thing left is to think." (José Ortega and Gasset)"

This program approaches Philosophy and Anthropology from a global perspective, focusing specifically on teaching. Students can expect to gain a complete body of knowledge of the most fundamental philosophical themes, from the most purely theoretical and metaphysical to the most practical and active human issues.

In today's job market, professionals from other fields who complement their training with programs in philosophy are highly valued and sought after. Philosophers' ability to see things from another point of view, to think, as it were: Outside the Box, is a fundamental asset in the world of work.

Philosophy and Anthropology help to see things, as the great Spinoza said: *Aespecie Aeternitatis*. That is to say, under a prism of eternity, knowing that in the great context of the world and the universe our actions are both relevant and insignificant.

The role of Philosophy and Anthropology as consolatory disciplines in the face of the evils and misfortunes in the world have always been fundamental, as they allow us to better understand our nature, our actions, our morality, and our being. In short, Philosophy and Anthropology help us to grow as people, to mature as individuals, to be more responsible citizens and to improve our work performance.

Throughout the program, students will have the opportunity to access the most important developments in Philosophy and Anthropology applied to teaching. Guided by a very complete but very specific syllabus, students will acquire the knowledge and routines required to teach this subject or applicable to other areas of life.

An opportunity created to add enormous value to students' CV.

This **Postgraduate Diploma in Philosophy and Anthropology** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practising experts
- ♦ State-of-the-art interactive video systems
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is available from any fixed or portable device with an Internet connection
- ♦ Supplementary documentation databases are permanently available, even after the course has finished

A complete and well-developed program that will enable you to include knowledge of Philosophy and Anthropology in your teaching”

“

Acquire the skills of philosophical thinking and how to transmit this form of development to your students in only a few months”

Our teaching staff is composed of Philosophy and Anthropology professionals who are practising specialists. In this way we ensure that we deliver the educational update we are aiming for. A multidisciplinary team of trained and experienced professionals who will cover the theoretical knowledge in an efficient way, but, above all, who will bring the practical knowledge derived from their own experience to the course: one of the differential qualities of this training program.

The effectiveness of our methodological design enhances mastery of the subject matter. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. In this way, students will be able to study with a range of convenient and versatile multimedia tools that will provide them with the operability they need during the program.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, with the help of an innovative, interactive video system, and through telepractice and *Learning From an Expert* systems, students will be able to acquire the knowledge as if they were working on the case in real life. A concept that will allow students to integrate and memorize what they have learnt in a more realistic and permanent way.

Through a learning system based on the ABP method, the theoretical knowledge in this Postgraduate Diploma will be used to solve real situations in a practical context.

Human action, community, rationality... The most complete approaches in Philosophy, imparted in an educational and accessible way.

International Guest Director

Dr. Alexander Carter is a philosopher who has served as Academic Director of Philosophy and Interdisciplinary Studies at the Institute of Continuing Education, University of Cambridge. A specialist in Ethics and creativity theory, he has designed several models for teaching these areas. He has also supervised undergraduate research programs at the Institute and is a Fellow of Fitzwilliam College, where he has helped develop curricular outlines for Philosophy. His main interests include the Philosophy of Wittgenstein, the Theology of Simone Weil, and the Epistemology of Humor.

Throughout his career, he has worked in prestigious institutions, where he has combined his research experience with new teaching methodologies. In fact, his approach has been developed at the University of Essex, where he has honed his ability to guide people through philosophical dilemmas, encouraging critical and creative thinking. With over a decade of experience, he has encouraged reading to adults of all ages, always promoting the value of philosophical reflection in everyday life.

Internationally, Dr. Alexander Carter has been recognized for his unique perspective on philosophy, based on the idea of “serious play”, in which he investigates the relationship between humor and creative practice. In addition, his ability to generate debate and dialogue has transformed the way philosophers and humanists think and act. Likewise, his Doctorate in Philosophy has consolidated his activism towards philosophy.

He has also conducted research on freedom and fatalism in Wittgenstein’s work, and has worked at the intersection of humor and creativity. He has published several academic articles and continues to be an influential voice in contemporary philosophy, bringing new perspectives to current debates.

A complete program that will take you through the knowledge you need to compete among the best"

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
