# Introduction

Music is one of the most enriching expressions of the human being, since, through it, we are able to transmit sensations and emotions that other languages or codes are unable to do. Through music, we not only communicate, but we are also able to acquire values and attitudes or learn to channel feelings in different situations of our lives.

“

*The Professional Master's Degree in Didactics and Pedagogy of Music Education will generate a sense of confidence in the performance of your profession, which will help you grow personally and professionally”*

Therefore, the teaching of music should not only be relegated to a matter of content acquisition, but it is necessary to educate and specialize the teacher in each and every one of the dimensions involved in musical learning.

This educational program will enable professionals in this field to increase their capacity for success, which results in a better practice and performance that will have a direct impact on students, on the improvement of the subject of music and on the general benefit of society as a whole.

This program offers an integral vision of musical learning in all its dimensions, providing tools, experiences and advances in this field, which have also been guaranteed by the teachers of the educational action. With which the student will learn based on professional experience, as well as pedagogy, which makes the student's education more effective and accurate. In addition, it is necessary to highlight that, although there are courses on the Didactics of music, there is no program that offers a multidimensional approach to musical learning, studying not only elements related to the content, but also giving importance to the figure of the learner, to their educational, personal, social and intellectual characteristics and needs.

The different modules are taught in sessions with an eminently practical approach, supported by the necessary theoretical support. All the teachers of the Professional Master's Degree have extensive experience in cases of all ages and in diverse socio-family and educational contexts. Furthermore, it must be taken into account that musical learning is approached integrating the educational, personal and social-group vision.

In addition to educating students in Musical Didactics and in the educational environment, it will also facilitate their insertion in the labor world, due to the great demand for this type of specialized professionals within the regulated educational system, as well as in the non-formal field (private music schools or musical groups). For those students who are already in the labor market, it will allow them a better professional positioning and will increase their possibilities of promotion and recognition.

    - 9.2.2.2. The Conservatory as a Place of Intervention for Children at Risk of Social Exclusion
    - 9.2.2.3. The Conservatory Today
    - 9.2.2.4. New Spaces for Musical Learning
- 9.3. Music Education in the 20th Century
  - 9.3.1. Introduction
  - 9.3.2. A Traditional Model Based on Imposition
  - 9.3.3. A Change of Perspective: Towards Participatory, Non-Imposing Methodologies

- 9.4. Current Educational Paradigms applied to Music Education
  - 9.4.1. Introduction
  - 9.4.2. New Methodologies applied to Music Education
    - 9.4.2.1. Cooperative Learning and Music Learning
      - 9.4.2.1.1. What is Cooperative Learning?
      - 9.4.2.1.2. The Characteristics of Cooperative Learning
    - 9.4.2.2. PBL: Project-Based Learning
      - 9.4.2.2.1. What Is PBL?
      - 9.4.2.2.2. Characteristics of Project-Based Learning
    - 9.4.2.3. Gamification in the Music Classroom
      - 9.4.2.3.1. What is Gamification?
      - 9.4.2.3.2. Characteristics of Gamification

## Module 10. Evaluation of Music Students

- 10.1. Introduction
  - 10.1.1. General Aspects
  - 10.1.2. References
- 10.2. What is to Evaluate?
  - 10.2.1. Preliminary Considerations
  - 10.2.2. Main Definitions of the Evaluation Process
  - 10.2.3. Features of the evaluation
  - 10.2.4. The Role of Evaluation in the Teaching-Learning Process
- 10.3. What Should Be Evaluated in the Musical Area?
  - 10.3.1. Knowledge
  - 10.3.2. Competencies
  - 10.3.3. Skills

- 10.4. Pre-Evaluation Guidelines and Criteria
  - 10.4.1. Evaluation Functions
  - 10.4.2. Educational Programming
    - 10.4.2.1. What is Educational Programming
  - 10.4.3. Why Pre-Programming?
- 10.5. Evaluation Tools and Instruments
  - 10.5.1. Observation as an Evaluation Tool
    - 10.5.1.1. Participant Observation
    - 10.5.1.2. Indirect Observation
  - 10.5.2. Portfolio
    - 10.5.2.1. What is a Portfolio?
    - 10.5.2.2. Characteristics of the Portfolio
  - 10.5.3. The Class Journal
    - 10.5.3.1. What is a Class Journal?
    - 10.5.3.2. Parts of a Class Journal
  - 10.5.4. The Debate
    - 10.5.4.1. What is Debating?
    - 10.5.4.2. Importance of the Debate in the Educational Process
    - 10.5.4.3. Considerations Prior to the Debate
  - 10.5.5. Conceptual Maps
    - 10.5.5.1. What is a Concept Map?
    - 10.5.5.2. Main Elements of the Concept Map
    - 10.5.5.3. ICT Tools for the Elaboration of Concept Maps
  - 10.5.6. The Objective Evaluation Tests
    - 10.5.6.1. Completion or Simple Recall Tests
    - 10.5.6.2. Matching
    - 10.5.6.3. Ordering Tests
    - 10.5.6.4. Exercises of Answers with Alternatives
    - 10.5.6.5. Multiple Solution
- 10.6. Musical Evaluation Applied to the New Technologies
  - 10.6.1. Kahoot and Other Virtual Evaluation Resources

## Module 11. New Technologies Applied to Music Education

- 11.1. Introduction
  - 11.1.1. Music Before the Information Society
  - 11.1.2. The Information Society
  - 11.1.3. Digital Breach and its Impact on Music Learning
- 11.2. What are ICTs?
  - 11.2.1. Definition
  - 11.2.2. Evolution of the Concept
- 11.3. Main Technological Devices
  - 11.3.1. Computers in the Music Classroom
  - 11.3.2. Digital Tablets
  - 11.3.3. The Use of Smartphones in the Classroom
- 11.4. The Internet and its Relation with Music Learning
  - 11.4.1. Introduction
  - 11.4.2. Learning Music on the Internet
- 11.5. Benefits in the use of ICT for Music Learning
  - 11.5.1. Characteristics of ICT
  - 11.5.2. Main Benefits of Musical Learning
- 11.6. ICT Resources for Musical Learning
  - 11.6.1. Music Educational Resources
- 11.7. Risks Associated with the use of ICT: Techno-Addictions in Children and Adolescents
  - 11.7.1. What is an Addiction?
  - 11.7.2. Technoaddiction
  - 11.7.3. Intervention in Situations of Technoaddiction

## Module 12. Music as an Alternative Therapy: Music Therapy

- 12.1. What is an Alternative Therapy?
  - 12.1.1. Definition
  - 12.1.2. Conventional Therapies vs. Alternative Therapies
- 12.2. Main Alternative Therapies
  - 12.2.1. Chromotherapy
  - 12.2.2. Art Therapy
  - 12.2.3. Aromatherapy
  - 12.2.4. Relaxation Techniques and Mindfulness
  - 12.2.5. Music Therapy
- 12.3. Music as an Alternative Therapy: Music Therapy
  - 12.3.1. Definition
  - 12.3.2. Origins
  - 12.3.3. Music Therapy Today
- 12.4. Benefits of Music Therapy
  - 12.4.1. Introduction
  - 12.4.2. Main Benefits of Music Therapy
- 12.5. Main Benefits of Music Therapy
  - 12.5.1. Introduction
  - 12.5.2. The Benenzon Method
- 12.6. Main Tools of Music Therapy
  - 12.6.1. Introduction
  - 12.6.2. Main Tools
- 12.7. Music Therapy in Children and Adolescent Disorders
  - 12.7.1. Music Therapy and Asperger's
  - 12.7.2. Music Therapy and ADHD
  - 12.7.3. Music Therapy and Down Syndrome
- 12.8. Primary and High School Education and its Relation with Music Therapy
  - 12.8.1. Music Therapy in Primary Education
  - 12.8.2. Music Therapy in High School Education

# Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

*With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.*

*It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.*

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

# Certificate

The Professional Master's Degree in Didactics and Pedagogy in Music Education guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"*

This program will allow you to obtain your **Professional Master's Degree diploma in Didactics and Pedagogy of Music Education** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (**official bulletin**). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Professional Master's Degree in Didactics and Pedagogy of Music Education**

Modality: **online**

Duration: **12 months**

Accreditation: **60 ECTS**

\*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
