Introduction

Learning, like technology and education systems, has been changing over time and evolving gradually. Therefore, it is of vital importance to be in favor of innovation and implementation of new strategies to put into practice with students. This program will allow the educator to make a deep immersion in the world of Coaching, learning a variety of dynamics and quality tools that will promote change and personal development in children, families and teachers.

“

You will approach complementary disciplines, such as Neurolinguistic Programming, Emotional Intelligence, Mindfulness or Neuroscience that will lead you to achieve your didactic objectives with greater efficiency"

This program stands out from the rest, not only because of the experience of its teachers and the quality of its content, but also because it covers all areas of Coaching in the academic world: from formal to non-formal education, taking into account the different evolutionary stages of the student. This will allow the teacher to acquire a series of invaluable competencies, which will accredit him/her as a coach at the educational level.

Its excellent teaching program integrates uncommon disciplines, such as Neurolinguistic Programming, Neuroscience, or Mindfulness, which are approached as perfectly complementary and compatible tools with a Coaching process at an individual and group level. In addition, it delves into the figure of the teacher and the family, as well as the psycho-evolutionary and educational characteristics of children and adolescents during their development, through the use of practical and didactic multimedia content. This will allow the future coach to quickly assimilate new tools and skills to apply in the daily practice of his or her profession.

Thanks to the participation of several educational psychologists in the development of the contents, this program offers a holistic vision of Coaching, with which to provide value to special groups. It will also provide teachers with the necessary skills to manage some of the main challenges of today's society, such as bullying or the impact of social networks on minors.

The program has been created by professional coaches, who, on a daily basis, work with children regarding key aspects such as identity, self-esteem, talent, creativity, emotional intelligence and attention, maintaining a systemic vision with the family and the educational center.

This **Professional Master's Degree in Educational Coaching**, contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Development of real cases presented by experts in Educational Coaching
- ♦ Graphic, schema and practical contents that gather information on those disciplines that are essential for professional practice
- ♦ News on Coaching strategies
- ♦ Practical exercises where the self-evaluation process can be carried out to improve learning
- ♦ Study of complementary disciplines and diversity of fields such as social exclusion, formal and non-formal education, nutrition, sports, music, family, arts, as well as teaching cloisters
- ♦ The latest technology in online teaching software
- ♦ State-of-the-art interactive video systems
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Educational synergy support groups: questions to the expert, discussion and knowledge forums
- ♦ Availability of content from any device, fixed or portable, with an Internet connection
- ♦ Supplementary documentation banks available even after the program has been completed

You will have practical tools of high applicability in different contexts"

“

You will learn through real case studies presented by coaching experts"

Its teaching staff is made up of prestigious and recognized professionals with a long teaching career. The methodological design of this program, developed by a multidisciplinary team of experts in e-learning, integrates the latest advances in educational technology for the creation of numerous multimedia tools that allow the professional to face the solution of real situations in their daily practice. These will enable you to advance by both acquiring knowledge and developing new skills in your future professional work.

The contents generated for this program, as well as the videos, self-tests, real cases and modular exams, have been thoroughly reviewed, updated and integrated by the professors and the team of experts that make up the working group, to facilitate, in a didactic and staggered manner, a learning process that allows the objectives of the teaching program to be achieved.

This program uses the latest advances in educational technology, based on e-learning methodology.

You will have multimedia tools meticulously designed by coaches, which will favor the speed of assimilation and learning.

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Education School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
