Introduction

Teachers whose mission is to teach other education professionals face a major challenge, since they must enhance their students' abilities as well as their own. The result will be a higher performance of the learning functions of future students, in a correct assimilation of knowledge, advocating for an improved educational system. For this reason, this program focuses on teacher development at a higher level, deepening the pedagogical conception and its theoretical and practical foundations to improve the teacher's preparation. To achieve this, the professional will be provided with quality and up-to-date content, which delves into inclusive and diverse teaching, focused on personalized education, in order to bring out the best in students.

“

Knowing and understanding the elements, processes and values of education and their impact on integral training will be one of your objectives during the program of this Professional Master's Degree”

TECH's Professional Master's Degree aims to boost the career of education professionals focused on the training of other teachers, deepening their knowledge of teaching at a higher level. It is a program that stands out for the scope of its content, as it includes an up-to-date and quality syllabus, focused on enhancing the capabilities of the professional and their students.

From the psychology of learning to the design of new educational programs and their planning, this program directs the student to higher performance in their profession, and in teaching in general, advocating for an improved educational system. In this sense, those studying this program learn to structure the information in an adequate way, allowing their students to assimilate the knowledge in a correct manner. At the same time, they will reflexively delve into the aspects of verbal and non-verbal communication appropriate for teacher development.

During this program, the education professional will delve into everything related to the teaching of other colleagues, involving all types of actors that make the teaching process a fruitful learning process. In addition, due to the current social demand, the syllabus emphasizes an inclusive and diverse teaching method, so that the student can orient the discourse according to a broad group of people, thereby acquiring a differential value and up-to-date competencies.

The program presents the main theoretical perspectives on diversity in the classroom, as well as the issue of exclusion in schools and the main factors of school failure, a direct consequence of discrimination. It also addresses the issue of inclusive schooling and intercultural education, as well as digital exclusion in the new knowledge society. It considers ICT in schools to ensure professional development aimed at managing digital sources for teaching use, communication in digital networks for pedagogical purposes, with the ability to create teaching materials using digital tools and problem management, as well as knowledge of security areas for the correct use of ICT in the classroom.

This **Professional Master's Degree in Training of Trainers** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Practical cases presented by experts in Pedagogy
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will learn to identify complex situations with special attention given to diversity and social inclusion"

“

This Professional Master's Degree focuses on reflecting on the aspects of verbal and non-verbal communication suitable for successful teaching development”

The program's teaching staff includes professionals from the sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive learning programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will learn to identify people's needs and possibilities for development in order to create a base for educational actions.

You will become aware of the need for lifelong learning as a frame of reference for the entire educational system.

02

Objectives

The design of the program of this Professional Master's Degree will allow the student to acquire the skills required to carry out a successful teaching task in the training of other teaching professionals. The content gathered throughout the syllabus will provide the student with all the pertinent knowledge, promoting the development of their teaching skills, enabling them to achieve the proposed objectives. In this way, they will develop comprehensive skills in a specific field of the pedagogical branch, which is none other than training trainers by means of different teaching techniques, according to each type of student.

“

You will understand the importance of teacher professional development and its direct reflection on the quality of education thanks to the comprehensive syllabus that TECH has developed for you”

General Objectives

- ◆ Learn to teach and guide teaching to each student according to their individual conditions
- ◆ Gain the skills to work with different ICTs
- ◆ Know and understand the elements, processes and values of education and their impact on comprehensive training
- ◆ Know how to structure the information in an adequate way that allows students to assimilate the knowledge in a correct manner
- ◆ Understand the importance of professional teaching development and its direct reflection on the quality of education
- ◆ Know the different pedagogical foundations of education

You will achieve the objectives of this Professional Master's Degree at TECH thanks to the tools you will be provided with during the program"

Specific Objectives

- 1.1. The Three Brains
 - 1.1.1. The Reptilian Brain
 - 1.1.2. The Mammal Brain
 - 1.1.3. The Human Brain
- 1.2. Reptilian Brain Intelligence
 - 1.2.1. Basic Intelligence
 - 1.2.2. Pattern Intelligence
 - 1.2.3. Parameter Intelligence
- 1.3. The Intelligence of the Limbic System
- 1.4. The Intelligence of the Neocortex
- 1.5. Evolutionary Development
- 1.6. The Stress Response or Flight Attack
- 1.7. What Is the World? The Learning Process
- 1.8. Learning Schemes
- 1.9. The Importance of the Link
- 1.10. Attachment and Parenting Styles
- 1.11. Basic Desires, Primary Desires
- 1.12. Secondary Desires
- 1.13. Different Contexts and their Influence on Development
- 1.14. Emotional Schemes and Limiting Beliefs

Module 2. General Teaching. Design and Development of the Syllabus

- 2.1. Foundations of Didactics as an Applied Pedagogical Discipline
 - 2.1.1. Foundations, Origin, and Evolution of Didactics
 - 2.1.2. The Concept of Didactics
 - 2.1.3. The Object and the Purpose of Didactics
 - 2.1.4. Personalization of the Teaching-Learning Process
 - 2.1.5. Didactics as Theory, Practice, Science and Art
 - 2.1.6. Didactic Models

- 2.2. Learning to Learn. Contributions from the Theory of Multiple Intelligences, Metacognition, and Neuroeducation
 - 2.2.1. An Approach to the Concept of Intelligence
 - 2.2.2. Metacognition and its Application in the Classroom
 - 2.2.3. Neuroeducation and its Application to Learning
- 2.3. Didactic Principles and Methodology
 - 2.3.1. Didactic Principles
 - 2.3.2. Didactic Strategies and Types
 - 2.3.3. Didactic Methods
- 2.4. Educational Design and Planning
 - 2.4.1. Approach to the Concept of Syllabus
 - 2.4.2. Levels of Syllabus Concreteness
- 2.5. Competence Objectives and Contents
 - 2.5.1. Educational Objectives
 - 2.5.2. Objectives in the Linear Model. What Is the Purpose of Teaching?
 - 2.5.3. Objectives in the p-Process Model
 - 2.5.4. Competencies. Why Teach?
 - 2.5.5. Contents. What to Teach
- 2.6. Didactic Procedures and Teaching Techniques
 - 2.6.1. Representation Procedures and Codes
 - 2.6.2. Teaching Techniques
- 2.7. Activities, Teaching Media, Teaching Resources and ICT
 - 2.7.1. Activities
 - 2.7.2. Means and Resources from a Curriculum Perspective
 - 2.7.3. Classification of Resources and Didactic Means
 - 2.7.4. Teaching Means and ICT
- 2.8. Motivation in the Classroom and Strategies for its Achievement.
 - 2.8.1. What Is Classroom Motivation?
 - 2.8.2. Different Types of Motivation
 - 2.8.3. Main Theories of Motivation

- 2.9. Educational Evaluation
 - 2.9.1. Approach to the Concept of Evaluation
 - 2.9.2. Evaluation Systems
 - 2.9.3. Content of the Evaluation: What to Evaluate
 - 2.9.4. Evaluation Techniques and Instruments: How to Evaluate
 - 2.9.5. Evaluation Moments
 - 2.9.6. Evaluation Sessions
 - 2.9.7. Syllabus Adaptations
- 2.10. Communication in the Teaching-Learning Process
 - 2.10.1. The Communication Process in the Classroom
 - 2.10.2. Communication from the Learner's Perspective
 - 2.10.3. Communication from the Teacher's Perspective

Module 3. Information and Communication Technologies for Education

- 3.1. ICT, Literacy and Digital Competencies
 - 3.1.1. Introduction and Objectives
 - 3.1.2. The School in the Knowledge Society
 - 3.1.3. ICT in the Teaching and Learning Process.
 - 3.1.4. Digital Literacy and Competencies

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Global University School we use the Case Method

In a given situation, what should a professional do? Throughout the program students will be presented with multiple simulated cases based on real situations, where they will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method.

With TECH, educators can experience a learning methodology that is shaking the foundations of traditional universities around the world.

It is a technique that develops critical skills and prepares educators to make decisions, defend their arguments, and contrast opinions.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Educators who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process is solidly focused on practical skills that allow educators to better integrate the knowledge into daily practice.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life teaching.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine case studies with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Educators will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 85,000 educators with unprecedented success in all specialties. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialist educators who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Educational Techniques and Procedures on Video

TECH introduces students to the latest techniques, with the latest educational advances, and to the forefront of Education. All this, first-hand, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
