01

Introduction

During this program, the engineering professional will acquire knowledge and skills that will allow them to operate as a *Contract Manager*. They will be familiar with all the implications that large construction contracts have on other areas of the project, such as health and safety, subcontracting processes, construction control, budget control and possible disputes and arbitration. These contents will become a great help to the student when it comes to entering a sector that requires in-depth, specific and results-oriented training.

“

Approach all aspects related to contracting in construction projects from a global point of view and become a prestigious professional”

In this program, the work of the Contract Manager in a project will be discussed in depth, analyzing their relationships with other departments and the importance of their management and intervention in activities as important for the project as: health and safety on site, subcontracting processes, work control, budget control and possible disputes and arbitration.

In addition, a review will be made of the possible disputes and arbitrations that may arise in a project, analyzing the importance of the work of a good contract manager before, during and after these situations.

With this Postgraduate Certificate, the professional will have the necessary knowledge as a contract manager to interact with the rest of the departments on the construction site and will be able to carry out exhaustive control of their work" In addition, they will gain specific knowledge in the area of arbitration and possible disputes, so that they can be prepared to participate in future project processes that they manage.

All this, throughout a 100% online training that provides the student with the ease of being able to take it wherever and whenever they want. The only thing that students need is a device with internet access and they will be able to access a universe of knowledge that will be the main basis for these engineers to position themselves in a sector that is increasingly demanded by companies in various sectors.

This **Postgraduate Certificate in Construction Project Management in Contract Management** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- » Practical cases presented by experts in Construction Project Management
- » The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- » Practical exercises where self-assessment can be used to improve learning
- » Special emphasis on innovative methodologies
- » Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- » Content that is accessible from any fixed or portable device with an Internet connection

Thanks to this program, you will be able to position yourself in a sector that is requiring more and more engineers who are experts in this subject"

“

With this program you will have the necessary knowledge as a contract manager to interact with the rest of the departments on the construction site and be able to carry out exhaustive control of their work”

The program’s teaching staff includes professionals from the sector who contribute their work experience to this specialization program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced engineers with vast experience.

Studying online will allow you to learn the latest innovations in the sector while you continue with your professional work.

A prestigious engineer is one who possesses transversal skills in each and every phase of the project.

02 Objectives

Through this training, engineering professionals will acquire the necessary knowledge to work in contract management for construction projects, taking into consideration all the departments to which the contracting is related. All of this with the confidence and efficiency of a Postgraduate Certificate which has been created to boost professionals in the management and planning of contracts. This is done from a global point of view that includes everything from the safety department to the budget and possible disputes and arbitrations.

“

With this Postgraduate Certificate you will achieve all your professional goals and become a top-level engineer”

General Objectives

- » Carry out an exhaustive analysis of EPC projects
- » Manage the different stages of EPC projects
- » Manage the contracts of large-scale projects
- » Perform an in-depth breakdown of guarantees, disputes and insurance in the construction industry
- » Master project management on a global basis
- » Carry out cost, time and resources analysis
- » Gain solid knowledge of the integration phases of a project
- » Manage a project with a global, interdepartmental vision
- » Be able to analyze the earned value of projects

Specific Objectives

- » Ability as a Contract Manager to control the project budget
- » In-depth knowledge of site control management
- » Detailed knowledge of health and safety on site from a contract manager's point of view
- » Analysis of contracts with sub-contracts
- » Ability to participate in potential disputes and arbitrations
- » Ability to prepare the necessary documentation for possible disputes

“

*Your goals are our goals.
If you grow, we will too”*

03

Course Management

This Postgraduate Certificate in Construction Project Management in Contract Management at TECH is taught by highly prestigious professionals in this field of engineering and contract management, who bring their years of work experience to the training, as well as the knowledge they have acquired from research in the field. All to provide the engineer with a high-level program, which will enable them to manage contracts in national and international environments with greater guarantees of success.

“

TECH's training programs count on first class professionals who bring their many years of experience to the Postgraduate Certificate"

International Guest Director

With an extensive professional career of more than 20 years focused on project management and operational transformations, Pierre-Yves Galopin is a prominent international expert in the field of Construction Engineering. He has spent most of his career in reference entities in countries such as France, Finland and Chile. In this way, he has held important positions as General Technical Director, where he has provided holistic advice to projects in the bidding, construction and operation phase on a global scale.

As such, he has worked directly in more than 40 operations, in addition to having negotiated more than 200 contracts in various sectors such as Heavy Industry, Mining, Oil and Gas. His work philosophy is based on achieving operational excellence, which has driven him to remain at the forefront of areas such as external cost maintenance, as well as the different phases of studies in construction. Thanks to this, it is considered a reference in the optimization of large investment projects through the disruptive methodology of Value Engineering.

In his constant effort to promote progress in the construction sector, he has developed multiple specialized articles on his findings and research. In fact, he is one of the people in charge of preparing press releases in the Communication Department of Boston Consulting Group. As such, he has contributed to increase the knowledge of citizens in aspects such as the applications of Artificial Intelligence in commercial activities, the management of Greenfield or Brownfield investment projects and even the most recent trends in construction materials. In this regard, he highly values networking networks and is an active participant on LinkedIn, where he takes the opportunity to make key connections, share industry knowledge and stay up-to-date on industry opportunities.

Dr. Galopin, Pierre-Yves

- ♦ Associate Director and Partner at Boston Consulting Group, Boston, United States
- ♦ Director of Development Projects at Sembcorp Industries, Santiago de Chile
- ♦ Co-Founder and Advisor at Tellus Chile
- ♦ Operations Manager at OSD Pipelines, Chile
- ♦ EPCM Engineer at Hatch, Chile
- ♦ Area Manager and Civil Engineer at Bouygues, Finland
- ♦ Civil Engineer at Degremont, Paris
- ♦ Management Consultant at Partners in Performance, Latin America

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Mr. Ruiz Cid, Martin Joaquín

- » Technical Director EPC Project Group - EPC Project Manager Leader at Soltec Energías
- » Industrial Technical Engineer specializing in Mechanics/Structures from the Polytechnic University of Cartagena
- » Industrial Engineer in Electricity from the Polytechnic University of Cartagena
- » Master's Degree in Power Electronics and Adaptive Control
- » MBA in Strategic Company Management from UNED (National Distance Learning University)
- » Master's Degree in Renewable Energies and the Environment
- » Professional Project Manager Course
- » EPC Turnkey Project Management Course
- » Industrial Instrumentation Course

04

Structure and Content

Through this training, TECH provides engineers with a global review of all the aspects that are involved in the relationship between the *Contract Management* and the other areas of work. Through this complete course, which incorporates all the fields of work which involve the management of contracts for large construction projects, the student will develop their theoretical and practical knowledge, achieving professional and personal growth that will allow them to intervene in this field of work with confidence of an expert. You will achieve this through top-notch content designed by the best professionals in the industry.

“

The contents you will have access to will allow you to have a theoretical basis when facing real situations”

Module 1. Project Management in Contract Management

- 1.1. Contract Management and Budget
 - 1.1.1. Objectives of Budget Management on the Part of the *Contract Manager*
 - 1.1.2. Main Types of Budget
 - 1.1.3. Budget According to the Costs Structure
- 1.2. Contract Management and Work Site Control
 - 1.2.1. Objectives of Work Site Control Management
 - 1.2.2. Hiring an Inspection Body
 - 1.2.3. Verification and Monitoring of the Work
- 1.3. Contract Management and Health and Safety Control in the Work Site
 - 1.3.1. Objectives of Work Site Health and Safety Control Management
 - 1.3.2. Aspects to Consider to Carry Out Health and Safety Control
 - 1.3.3. Verification and Monitoring of the Work
- 1.4. Contract Management and Subcontracts
 - 1.4.1. Importance of the Intervention of the *Contract Manager* in the Management of Subcontracting Contracts
 - 1.4.2. Types of Subcontract Contracts
 - 1.4.3. Analysis of Contracts with Subcontractors
- 1.5. Subcontracting Process to be Followed by the *Contract Manager*
 - 1.5.1. Bidding and Comparison
 - 1.5.2. Pre-Selection and Pre-Recruitment
 - 1.5.3. Subcontract Award
- 1.6. Monitoring of Changes in Subcontractor Contracts
 - 1.6.1. Importance of Monitoring Changes
 - 1.6.2. Control of Cost and Time Frame Changes
 - 1.6.3. Need for Timely Notifications

- 1.7. Contract Management and Outsourcing Contract
 - 1.7.1. Fundamentals of an Outsourcing Contract
 - 1.7.2. Contract Management in This Type of Contract
 - 1.7.3. Aspects to Consider
- 1.8. Contract Management and Contractual Disputes
 - 1.8.1. Intervention of the *Contract Manager* in Disputes
 - 1.8.2. Technical and Legal Difficulty in International Arbitrary Cases
 - 1.8.3. Importance of Contract Management for Future Disputes
- 1.9. Classification of Disputes and Arbitrations
 - 1.9.1. Types of Disputes and Arbitrations
 - 1.9.2. Preparation of Documentation for Disputes
 - 1.9.3. Importance of Traceability for Future Disputes
- 1.10. *Contract Manager* and Clients
 - 1.10.1. *Contract Manager* Communications With the Client
 - 1.10.2. Monitoring of the Contract With the Client
 - 1.10.3. Importance of Controlling the Traceability of Communications

“ Don't miss this great opportunity.
You will learn everything you need to
become a successful professional”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“ *Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Certificate in Construction Project Management in Contract Management guarantees, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this training program
and receive your university certificate
without travel or laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Construction Project Management in Contract Management** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Construction Project Management in Contract Management**

Modality: **online**

Duration: **6 weeks**

Accreditation: **6 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
