01

Introduction

This program delves into the main environmental management tools that organizations can apply, providing the professional with the technical knowledge and management tools necessary to successfully incorporate environmental improvements into business management. A high impact course for your practical skills and your CV.

“

An in depth exploration of the most innovative and interesting tools currently available for environmental management in organizations”

Throughout the program, carbon markets will be discussed in depth, analyzing their mechanisms and associated advantages. The main standards and methodologies for calculating the carbon footprint of an organization, a product or an event as well as the water footprint will be analyzed, describing the main requirements and processes of each of the systems.

The main methodologies of life cycle analysis will be established, analyzing the different application software tools, differentiating the different calculation approaches and principles and standards of eco design and eco labels.

Finally, students will acquire a solid knowledge of the processes and competitive advantages of environmental and energy certifications in buildings and organizations.

By completing and passing the evaluations of this program, the student will obtain a solid knowledge of the rules and regulations to be applied in relation to environmental and energy management in organizations. A complete, high intensity program, which will allow incorporating into practice the most updated knowledge in this field of work. A highly interesting subject due to its current relevance and the mandatory integration of the standards that will be studied in the Postgraduate Certificate.

With an approach focused on efficiency, this Postgraduate Certificate has been created to allow students to optimize their efforts and achieve the best learning results in the shortest possible time. Additionally, as it is a 100% online program, the student is not constrained by fixed timetables or the need to move to another physical location, but can access the contents at any time of the day, balancing their professional or personal life with their academic life.

This **Postgraduate Certificate in Environmental Management Tools in Organizations** contains the most complete and up to date educational program on the market.

The most important features of the specialization are:

- ◆ Practical cases presented by experts in this sector
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where the self assessment process can be carried out to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Include the new perspectives of eco design and eco management standards and make a qualitative leap in your professional practice in the environmental management sector"

“

Integrate up to date forms of intervention in environmental management from the most outstanding projects on the international scene into your way of working”

Supported by excellent multimedia content, developed with the latest educational technology, this Postgraduate Certificate will provide the professional with situated and contextual learning, i.e., study in a simulated environment that will provide immersive learning programmed to train in real situations.

The design of this program focuses on Problem Based Learning, which means the student must try to solve the different real life situations of that arise throughout the academic program. For this purpose, the professional will be assisted by an innovative interactive video system, developed by renowned and experienced experts in Environmental Management Tools in Organizations

The most up to date material and the best audiovisual systems on the educational market to achieve an immersive learning experience.

A 100% online Postgraduate Certificate that will allow you to combine your studies with your professional work with maximum organizational flexibility.

02 Objectives

The general objective of this Postgraduate Certificate is to promote the professional's capacity to act in this field so that they can incorporate the main advances in this field of work and intervention.

“

Include the broadest and most up to date knowledge of all aspects involved in environmental management in organizations in your education"

General Objectives

- ◆ Training in the use of environmental and energy tools
- ◆ Conduct energy audits
- ◆ Conduct environmental impact assessments

“

A high quality Postgraduate Certificate that will give you the up to date knowledge you've been looking for"

Specific Objectives

- ◆ Precisely establish the application of environmental management tools in organizations
- ◆ Identify carbon markets and their utility
- ◆ Master the calculation of the carbon footprint of organizations, products and events based on international reference standards
- ◆ Acquire all the necessary knowledge for the implementation of climate change mitigation tools
- ◆ Calculate the water footprint and know the principles of the reference standards
- ◆ Develop a life cycle analysis and identify its different approaches
- ◆ Gain an in depth understanding of the characteristics and principles of environmental and energy certifications of sustainable buildings

03

Course Management

A multidisciplinary teaching faculty will offer the most up to date and comprehensive knowledge in this field, accompanying accompanied during the learning process and making available their experience and real vision of the profession. A unique opportunity to learn directly from experts in this field of work.

“

You will learn from experts in this sector, who will provide you with a specific and direct vision of the reality of this field of work"

Management

Mr. Abreu Acosta, Guzmán

- ◆ Technician in the area of Territorial Planning and Management at Gestión y Planeamiento Territorial y Medioambiental de Canarias
- ◆ Degree in Law
- ◆ Occupational Health and Safety Auditor, Specialization in OSHAS 18001
- ◆ Degree in Environmental Sciences. UNIVERSITY OF HUELVA
- ◆ Lawyer in his own law firm, specialized in Urban Development and Environmental Law.
- ◆ Freelance consultant specializing in Risk Prevention, Quality and Environment

Professors

Mr. Espinosa, César

- ◆ Head of the Environment Service of Arona City Council
- ◆ Degree in Law
- ◆ Recipient of the IV Felipe González Vicent Prize, Faculty of Law ULL in 1994.
- ◆ UNESCO Global Geopark El Hierro Technical Manager
- ◆ Technical Manager El Hierro World Biosphere Reserve
- ◆ Legal Coordinator of the Department of Rural and Marine Affairs and the Environment of the Island Council of El Hierro (2011-2015).
- ◆ Technical Project Manager

Mr. Palanco, César

- ◆ Director - Manager INTENSA PROMILAB
- ◆ Industrial Engineer. Mechanical Intensification
- ◆ Industrial Technical Engineer. Industrial Electronics Specialty
- ◆ Construction Manager
- ◆ Installation and testing technician
- ◆ Purchasing Manager TOGOGAS Huelva S.L.
- ◆ Installation technician TOGOGAS Huelva S.L.
- ◆ Commercial Delegate TOGOGAS Huelva S.L.

Mr. Contreras Acuña, Manuel

- ◆ Teacher (Secondary, Vocational Training)
- ◆ Doctor in Chemical Sciences Faculty of Experimental Sciences, University of Huelva
- ◆ Master's Degree in Instrumental Techniques in Chemistry, Faculty of Experimental Sciences, University of Huelva
- ◆ Triple Master's Degree in Occupational Health and Safety, Quality and Environmental Management
- ◆ Interim Substitute Professor Department: Chemistry and Materials Science
- ◆ Contract Researcher Department: Chemistry and Materials Science

Mr. Toscano, Manuel

- ◆ Professor of the Department of Earth Sciences of the University of Huelva.
- ◆ Degree in Geological Sciences from the University of Granada.
- ◆ Technical Engineer in Drilling and Mining Prospecting
- ◆ Technical Engineer in Energy, Fuels and Explosives Resources
- ◆ Degree in Mine Exploitation from the University of Huelva
- ◆ Author and/or co-author of more than ninety national and international contributions
- ◆ National and international projects financed by the Andalusia Council, the Spanish

government and the European Union.

Mr. Bueno Márquez, Pedro

- ◆ Technician of the Directorate General of Vocational Training, Ministry of Education and Sports
- ◆ Chemical Engineering 1997 - 2002 University of Huelva
- ◆ Postgraduate Course on Renewable Energy Management and Development, Catholic University of Avila
- ◆ Technical Teacher of Vocational Training. Department of Education and Sports
- ◆ Andalusian Energy Agency Technician
- ◆ Project Engineer. Aldesa Engineering & Services
- ◆ Project Engineer. Andalusian Studies Group (Grande S.L.)

Ms. Granell García, Lilia

- ◆ Manager and Administrator of Recap Canarias Finance
- ◆ Degree in Physical Sciences, specializing in Fundamental Physics.
- ◆ Recap ibérica Financa, ltd.
- ◆ Technical and commercial director SOTEC group
- ◆ Technical and commercial director SEIFERMANN
- ◆ CEO of CERCAN

04

Structure and Content

The syllabus of this Postgraduate Certificate includes all the necessary contents to achieve a broad and up to date knowledge of all the aspects involved in proper environmental management, in relation to the new existing requirements.

A program specifically created to provide our students with a continuous process of skills improvement that will boost their real capacity for intervention.

“

Knowledge is the key to intervene as an expert in this field.

Don't get left behind”

Module 1. Environmental Management Tools

- 1.1. Carbon Markets
 - 1.1.1. KP Flexibility Mechanisms
 - 1.1.2. CAP and Trade and Carbon Funds Schemes
 - 1.1.3. Voluntary Carbon Markets
- 1.2. Organizational Carbon Footprint
 - 1.2.1. Methodological Reference Standards
 - 1.2.2. Scopes for Organizational Carbon Footprint
 - 1.2.3. Calculation Process
- 1.3. Product and Event Carbon Footprint
 - 1.3.1. Methodological Reference Standards
 - 1.3.2. Scopes for Product Carbon Footprint
 - 1.3.3. Scopes for Carbon Footprint of Events
- 1.4. Climate Change Mitigation Tools
 - 1.4.1. Reduction and Limitation of Emissions
 - 1.4.2. Emissions Offsets
 - 1.4.3. Business Benefits. Certifications
- 1.5. Water Footprint
 - 1.5.1. Stages and Units
 - 1.5.2. Differentiation of Water for Calculations
 - 1.5.3. The Water Footprint for Companies
- 1.6. Life Cycle Analysis
 - 1.6.1. Differentiation of Approaches
 - 1.6.2. LCA Process
 - 1.6.3. Software Tools for LCA
- 1.7. Eco-Design and Eco-Labeling
 - 1.7.1. Eco-Design Standardization
 - 1.7.2. Types of Eco-Labeling
 - 1.7.3. Eco-Labeling Process

- 1.8. *LEED* and *BREEAM*
 - 1.8.1. The Value of Sustainable Building Certification
 - 1.8.2. Approaches to Both Certifications
 - 1.8.3. Technical Comparison between the Two Certifications
- 1.9. Other Sustainable Building Certifications
 - 1.9.1. *Passive House*
 - 1.9.2. *Well*
 - 1.9.3. VERDE (Building Reference Efficiency Evaluation)
- 1.10. Energy Certification of Buildings
 - 1.10.1. Energy Efficiency in Buildings
 - 1.10.2. Technical Conditions and Procedures
 - 1.10.3. Main Calculation Programs

“Advance your skills with the most interesting study systems on the online teaching scene”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world”

We are the first online university to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This intensive Engineering program at TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH Technological University you will use Harvard case studies, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method is the most widely used learning system by the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action oriented learning method. Throughout the program, the studies will be presented with multiple real cases.

They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH is the first university in the world to combine Harvard University case studies with a 100% online learning system based on repetition, which combines 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

06

Certificate

The Postgraduate Certificate in Environmental Management Tools in Organizations guarantees students, in addition to the most rigorous and up to date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university degree without travel or cumbersome paperwork”

This **Postgraduate Certificate in Environmental Management Tools in Organizations** contains the most complete and up to date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Environmental Management Tools in Organizations**
Official N° of hours: 150 h.

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
