tech 06 | Introduction

New business models, new technologies and the so-called Fourth Industrial Revolution imply a production whose products and machines are digitally interconnected, giving rise to concepts such as Industry 4.0 or the smart factory. This reality requires professionals with broad and deep knowledge in an area whose labor demand is constantly increasing.

This is the reason why TECH has created a Postgraduate Diploma in Industry 4.0 and Sectorial Solutions, with which it seeks to provide students with specialized skills and knowledge in one of the areas with the greatest potential in the Engineering sector, so that they can tackle their work as efficiently as possible. And this, through content that addresses topics such as the digital transformation of industry, the principles of the smart factory, digital capabilities in an organization or business strategies in Industry 4.0.

All this, with total freedom on the part of the student, to organize their schedules and studies, as best suits them, without seeing their other obligations interfered with, thanks to a completely online modality. In addition, with the total availability of theoretical and practical content at the forefront of the Engineering and Industry 4.0 sector.

This **Postgraduate Diploma in Industry 4.0 and Sectorial Solutions** contains the most complete and up-to-date program on the market. The most important features include:

- The development of practical case studies presented by experts in psychology and in education
- The graphic, schematic, and practical content with which they are created, provides scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Enhance your professional profile in a few months and stand out in one of the engineering sectors with the greatest future"

Industry 4.0"

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Master the key factors of the digitalization of the tertiary sector, wherever and whenever you want.

Download all the content of Industry 4.0, with your mobile, tablet or computer.

tech 10 | Objectives

General Objectives

- Conduct a comprehensive analysis of the profound transformation and radical paradigm shift being experienced in the current global digitalization process
- Provide in-depth knowledge and the necessary technological tools to face and lead the technological leap and the challenges currently present in companies
- Mastering companies' digitalization procedures and the automation of their processes to create new fields of wealth in areas such as creativity, innovation and technological efficiency
- Leading the Digital Change

Specific Objectives

Module 1. Industry 4.0

- Analyze the origins of the so-called Fourth Industrial Revolution and the Industry 4.0 concept
- In-depth study of the key principles of Industry 4.0, the technologies on which they are based and the potential of all of them in their application to the different productive sectors
- Convert any manufacturing facility into a Smart Factory and be prepared for the challenges that come with it

Module 2. Leading Industry 4.0

- Understand the current virtual era we live in and its leadership capacity, on which the success and survival of the digital transformation processes will depend, on which any type of industry is involved
- Develop, from all available data, the Digital Twin of the facilities/systems/assets integrated in an IoT network

Module 3. Industry 4.0. Services and Sectorial Solutions I

- Conduct an exhaustive analysis of the practical application that emerging technologies are having in the different economic sectors and in the value chain of their main industries
- In-depth knowledge of the primary and secondary economic sectors, as well as the technological impact they are experiencing
- Find out how technologies are revolutionizing the agricultural, livestock, industrial, energy and construction sectors

Module 4. Industry 4.0. Services and Solutions II

- Possess a thorough understanding of the technological impact and how technologies are revolutionizing the tertiary economic sector in the fields of transportation and logistics, health and healthcare (e-Health and Smart Hospitals), smart cities, the financial sector (Fintech) and mobility solutions
- Know about the technological trends of the future

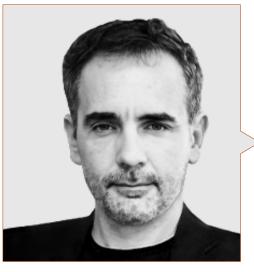

Management

Dr. Segovia Escobar, Pablo

- Chief Executive of the Defense Sector in the Company Tecnobit of the Oesía Group
- Corporate Project Director Indra
- Master's Degree in Companies Administration and Management by the National University of Distance Education
- Postgraduate in Strategic Management Function
- Member of: Spanish Association of People with High Intellectual Quotient

Dr. Diezma López, Pedro

- Chief Innovation Officer and CEO of Zerintia Technologies
- Founder of the technology company Acuilae
- Member of the Kebala Group for business incubation and promotion
- Consultant for technology companies such as Endesa, Airbus or Telefónica
- Wearable "Best Initiative" Award in eHealth 2017 and "Best Technological "Solution" 2018 for occupational safety

Professors

Ms. Sánchez López, Cristina

- CEO and founder of Acuilae
- Artificial Intelligence consultant at ANHELA IT
- Creator of Ethyka Software for Computer System Security
- (Software Engineer) for the Accenture Group in large clients such as Bank of Santander, BBVA, Endesa or Barclays Bank.
- Master's Degree in Data Science at KSchool
- Degree in Statistics from the Complutense University Madrid

Mr. Montes, Armando

- Expert in drones, robots, electronics and 3D printers
- EMERTECH collaborator developing technology products such as Smart Vest
- Ordering and Customer Fulfillment Specialist for GE Renewable Energy
- CEO of the School of Superheroes Foundation related to 3D Printing and Smart Robot Implementation and the Implementation of Smart Robots

Mr. Castellano Nieto, Francisco

- Head of Indra Company Maintenance Area
- Consultant for Siemens AG, Allen-Bradley at Rockwell Automation and other companies
- Industrial Electronic Technical Engineer by the Universidad Pontificia Comillas

Mr. Asenjo Sanz, Álvaro

- IT Consultant for Capitole Consulting
- Project Manager for Kolokium Blockchain Technologies
- IT Engineer for Aubay, Tecnocom, Humantech, Ibermatica and Acens Technologies
- Degree from Computer Engineering of Systems at the Complutense University of Madrid

Mr. González Cano, José Luis

- Lighting Designer
- Vocational training teacher in electronic systems, telematics (CISCO certified instructor), radio communications, IoT
- Degree in Optics and Optometry from the Complutense University of Madrid
- Industrial Electronics Technician by Netecad Academy
- Member of: The Professional Association of Lighting Designers (Technical Consultant) and Member of the Spanish Lighting Committee

tech 18 | Structure and Content

Module 1. Industry 4.0

- 1.1. Definition of 4.0 Industry
 - 1.1.1. Features
- 1.2. Benefits of the 4.0 Industry
 - 1.2.1. Key Factors
 - 1.2.2. Main Advantages
- 1.3. Industrial Revolutions and Vision of the Future
 - 1.3.1. Industrial Revolutions
 - 1.3.2. Keys Factors in Each Revolution
 - 1.3.3. Technological Principles as a Basis for Possible New Revolutions
- 1.4. The Digital Transformation of the Industry
 - 1.4.1. Characteristics of the Digitization of the Industry
 - 1.4.2. Disruptive Technologies
 - 1.4.3. Applications in the Industry
- 1.5. Forth Industrial Revolution. Key Principles of Industry 4.0
 - 1.5.1. Definitions
 - 1.5.2. Key Principles and Applications
- 1.6. 4.0 Industry and Industrial Internet
 - 1.6.1. Origin of IIoT
 - 1.6.2. Operation
 - 1.6.3. Steps to Follow for its Implementation
 - 1.6.4. Benefits
- 1.7. Smart Factory Principles
 - 1.7.1. Smart Factory
 - 1.7.2. Elements That Define a Smart Factory
 - 1.7.3. Steps to Deploy a Smart Factory
- 1.8. Status of the 4.0 Industry
 - 1.8.1. Status of the 4.0 Industry in Different Sectors
 - 1.8.2. Barriers to the Implementation of 4.0 Industry
- 1.9. Challenges and Risks
 - 1.9.1. SWOT Analysis
 - 1.9.2. Challenges
- 1.10. Role of Technological Capabilities and the Human Factor
 - 1.10.1. Disruptive Technologies in Industry 4.0
 - 1.10.2. The Importance of the Human Factor Key Factor

Module 2. Leading Industry 4.0

- 2.1. Leadership Abilities
 - 2.1.1. Leadership Factors in the Human Factor
 - 2.1.2. Leadership and Technology
- 2.2. Industry 4.0 and the Future of Production
 - 2.2.1. Definitions
 - 2.2.2. Production Systems
 - 2.2.3. Future of Digital Production Systems
- 2.3. Effects of Industry 4.0
 - 2.3.1. Effects and Challenges
- 2.4. Essential Technologies in Industry 4.0
 - 2.4.1. Definition of Technologies
 - 2.4.2. Characteristics of Technologies
 - 2.4.3. Applications and Impacts
- 2.5. Digitization of Manufacturing
 - 2.5.1 Definitions
 - 2.5.2. Benefits of the Digitization of Manufacturing
 - 2.5.3. Digital Twins
- 2.6. Digital Capabilities in an Organization
 - 2.6.1. Development Digital Capabilities
 - 2.6.2. Understanding the Digital Ecosystem
 - 2.6.3. Digital Vision of the Business
- 2.7. Architecture Behind a Smart Factory
 - 2.7.1. Areas and Operations
 - 2.7.2. Connectivity and Security
 - 2.7.3. Case Uses
- 2.8. Technology Markers in the Post-Covid Era
 - 2.8.1. Technological Challenges in the Post-Covid Era
 - 2.8.2. New Case Uses
- 2.9. The Era of Absolute Virtualization
 - 2.9.1. Virtualization
 - 2.9.2. The New Era of Virtualization
 - 2.9.3. Advantages

Structure and Content | 19 tech

- 2.10. Current Situation in Digital Transformation Gartner Hype
 - 2.10.1. Gartner Hype
 - 2.10.2. Analysis of Technologies and Their Status
 - 2.10.3. Data Exploitation

Module 3. Industry 4.0. Services and Sectorial Solutions I

- 3.1. Industry 4.0 and Business Strategies
 - 3.1.1. Factors of Business Digitalization
 - 3.1.2. Roadmap for Business Digitalization
- 3.2. Digitalization of Processes and the Value Chain
 - 3.2.1. Value Chain
 - 3.2.2. Key Steps in the Digitization of Processes
- 3.3. Sectorial Solutions Primary Sector
 - 3.3.1. The Primary Economic Sector
 - 3.3.2. Characteristics of Each Subsector
- 3.4. Digitization of the Primary Sector: Smart Farms
 - 3.4.1. Main Characteristics
 - 3.4.2. Keys Factors of Digitization
- 3.5. Digitization of the Primary Sector: Digital and Intelligent Agriculture
 - 3.5.1. Main Characteristics
 - 3.5.2. Keys Factors of Digitization
- 3.6. Sectorial Solutions Secondary Sector
 - 3.6.1. The Secondary Economic Sector
 - 3.6.2. Characteristics of Each Subsector
- 3.7. Digitization of the Secondary Sector: Smart Factory
 - 3.7.1. Main Characteristics
 - 3.7.2. Keys Factors of Digitization
- 3.8. Digitization of the Secondary Sector: Energy
 - 3.8.1. Main Characteristics
 - 3.8.2. Keys Factors of Digitization
- 3.9. Digitization of the Secondary Sector: Construction
 - 3.9.1. Main Characteristics
 - 3.9.2. Keys Factors of Digitization

- 3.10. Digitization of the Secondary Sector: Mining
 - 3.10.1. Main Characteristics
 - 3.10.2. Keys Factors of Digitization

Module 4. Industry 4.0 - Industry Services and Solutions (II)

- 4.1. Tertiary Sector Solutions
 - 4.1.1. Tertiary Economic Sector
 - 4.1.2. Characteristics of Each Subsector
- 4.2. Digitization of the Tertiary Sector: Transport
 - 4.2.1. Main Characteristics
 - 4.2.2. Keys Factors of Digitization
- 4.3. Digitization of the Tertiary Sector: eHealth
 - 4.3.1. Main Characteristics
 - 4.3.2. Keys Factors of Digitization
- 4.4. Digitization of the Tertiary Sector: Smart Hospitals
 - 4.4.1. Main Characteristics
 - 4.4.2. Keys Factors of Digitization
- 4.5. Digitization of the Tertiary Sector: Smart Cities
 - 4.5.1. Main Characteristics
 - 4.5.2. Keys Factors of Digitization
- 4.6. Digitization of the Tertiary Sector: Logistics
 - 4.6.1. Main Characteristics
 - 4.6.2. Keys Factors of Digitization
- 4.7. Digitization of the Tertiary Sector: Tourism
 - 4.7.1. Main Characteristics
 - 4.7.2. Keys Factors of Digitization
- 4.8. Digitization of the Tertiary Sector: Fintech
 - 4.8.1. Main Characteristics
 - 4.8.2. Keys Factors of Digitization
- 4.9. Digitization of the Tertiary Sector: Mobility
 - 4.9.1. Main Characteristics
 - 4.9.2. Keys Factors of Digitization
- 4.10. Future Technological Tendencies
 - 4.10.1. New Technological Innovations
 - 4.10.2. Application Trends

tech 22 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 24 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

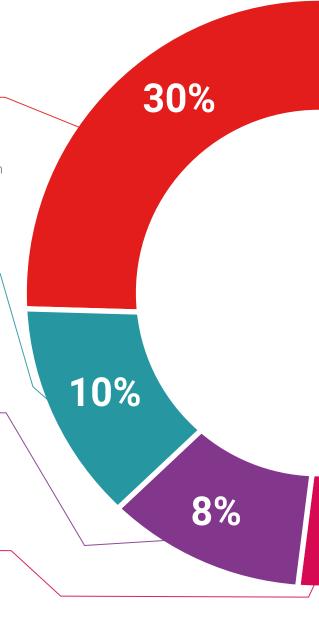

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Methodology | 27 tech

for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

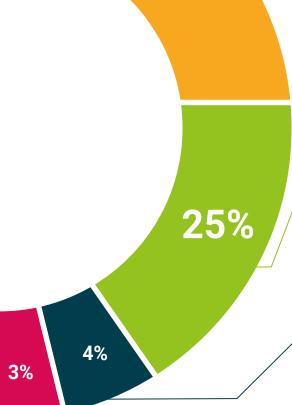

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

20%

tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Diploma in Industry 4.0 and Sectorial Solutions** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Diploma in Industry 4.0 and Sectorial Solutions

Modality: online

Duration: 6 months

Accreditation: 24 ECTS

Mr./Ms. _____, with identification document _____ has successfully passed and obtained the title of:

Postgraduate Diploma in Industry 4.0 and Sectorial Solutions

This is a program of 600 hours of duration equivalent to 24 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
