01
Introduction

It is no secret that the Greek civilization has a great importance for today's world due to its philosophical, scientific, mathematical, artistic, architectural, etc. works. On the other hand, the Roman Empire was the most important civilization for Western culture, since it inherited writing and letters, law, the calendar and even the idea of transporting water from the rivers to the cities. Both cultures have been studied for years, centuries even, and more and more surprising discoveries are being made that open up new opportunities for historians interested in this subject.

" Are you passionate about the mysteries that Greek and Roman culture still hide in their artistic and architectural works? Then this program is for you"

In this fully online Postgraduate Certificate, the student will be able to understand the political, economic, social, religious and cultural dynamics of Rome and Greece in antiquity. Both civilizations continue to be studied for their contributions to the arts, sciences, architecture, medicine, etc., marking their millennial history by a series of wars and conflicts that shaped these societies.

Therefore, an in-depth tour of early Greece, known as the "Dark Ages", will be made. Then we will study different stages of the same, passing through the formation of the Polis, up to the Hellenistic era, which is marked by the death of Alexander of Macedon and the development of new cultural systems. On the other hand, it will deal with Roman history from its foundation to the events that caused the end of the Republic, with the arrival of Augustus and the principality.

The entire program, together with the didactic material and explanatory videos, is contained in the virtual classroom. A platform that can be accessed from anywhere in the world and is at the forefront of the latest educational trends. In this way, the student has the certainty of receiving quality content that meets the demands of today's market.

This **Postgraduate Certificate in Ancient History: Greece and Rome** contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in art and archaeology
- The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

An opportunity to find new professional opportunities that will take you to the top of your career"

TECH offers you a direct degree at the end of the program, so you will not have to submit a final paper to obtain your university degree once you have completed the syllabus"

A group of professionals in the history of Greece and Rome have developed all the content of this Postgraduate Certificate.

*Enroll now and you will have access to the virtual platform to start a new professional path.*

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02
Objectives

The purpose of this Postgraduate Certificate is to take the career of its students to the next level, taking them away from the academic area and motivating them to find new professional options. Therefore, you will be provided with all the knowledge about the history of ancient Greece and Rome, through a complete multimedia content and classes taught by the best experts in the field. Therefore, upon graduation, they will be able to determine the events, in chronological order, of both civilizations, which will serve them as experts in a museum, excavation or auction consultant.

" *Don't get left behind. Achieve your objectives thanks to the complete program that this Postgraduate Certificate has for you"*

General Objectives

- Possess a level of knowledge necessary to master the aspects of ancient history, in the different stages of the past
- Develop critical thinking with respect to historical events and current reality
- Know in depth different cultures and to establish differences between them
- Master concepts that help to distinguish between Greek and Roman art
- Integrate the conceptual foundations of history as a function of art and archaeology
- Identify the most relevant figures and iconographies of universal and Christian history

In just a few weeks you will become a great expert on the history of Rome and Greece"

Specific Objectives

- Understand the political, economic, social, religious, and cultural dynamics of each of the cultures being studied

- Prioritize the lines of thought, concepts, beliefs and cultural traits of each people

- Develop critical thinking about historical events

- Know the contributions of Ancient History in shaping the cultural, political and socioeconomic foundations of the present day

- Manage general information about the various stages of Greek and Roman history

- Have the capacity for synthesis and analysis that will allow the student to understand and structure diverse information in a broad temporal and geographic framework

- Organize historical information in a coherent manner and transmit it according to the critical canons of the discipline

03
Structure and Content

For this Postgraduate Certificate, the content of the syllabus has been structured in a module that contains all the important aspects to know the details of the history of Greece and Rome. It has been developed by a group of experts who play different roles in this area, enhancing the value of the program. In addition to all this, the online modality allows the student to decide the best time to take on the course load of the degree.

"

If you want to be recognized internationally as an expert in ancient Greek and Roman history, this program is what you need. Enroll Now"

    1.4.6.   Hellenistic Society
    1.4.7.   Hellenistic Culture
1.5.   The Origins of Rome and Monarchic Rome
    1.5.1.   Pre-roman Italy
    1.5.2.   The Foundation of Rome
    1.5.3.   The City of Romulus
    1.5.4.   The First Kings of Rome
    1.5.5.   The Etruscans
    1.5.6.   Etruscan Kings

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**
This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

" *Our program prepares you to face new challenges in uncertain environments and achieve success in your career"*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.
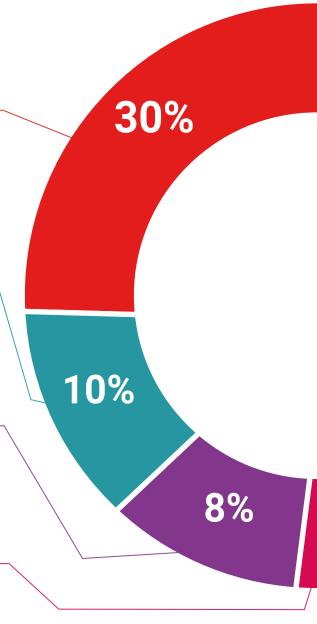

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

3%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Certificate

This Postgraduate Certificate in Ancient History: Greece and Rome, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Global University.

Successfully complete this master's and receive your university degree without travel or laborious paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Ancient History: Greece and Rome** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Ancient History: Greece and Rome**

Modality: **online**

Duration: **6 weeks**

Accreditation: **6 ECTS**

tech global university

Mr./Ms. _____, with identification document _____ has successfully passed and obtained the title of:

Postgraduate Certificate in Ancient History: Greece and Rome

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
