Introduction

Works with marked details of exaggeration, opulence in all artistic expressions, have a focus on the Baroque Movement that began in Italy in the Modern Age and revolutionized the artistic concept of the Renaissance, the period that preceded it. A Cultural, Scientific, Technological, Political, Economic and Philosophical Style important to know in depth for any professional who develops in the professional environment of the Humanities. To this end, this exclusive program has been designed with specific content to promote talent and awaken critical thinking in students about this period in the History of Art. A 100% online degree structured under an innovative methodology and the most cutting-edge technology in today's university environment.

“

Understand the artistic values, the authors and the main works of the Baroque. Through the most secure and dynamic educational platform 100% online"

The Baroque period was one of the most famous Cultural Movements in the History of Universal Art, although it was despised for centuries as it was seen as nothing but excesses and irrationalism. Born in Rome, it spread throughout Italy and other European countries in the 1700s. In Spain, France and Austria the movement became very popular. The Baroque imposed excess, creativity, metaphor, exuberance, drama and sensuality. That is why, abandoning the classical serenity that preceded it, the Baroque comes to express a world in movement and agitation of the senses, in which the contradictory character is its most representative quality.

For any historian or professional in the arts and humanities, knowing this movement in depth, involves delving into the depths of the historical context of each of the expressions represented as the Italian architecture, painting and sculpture in Rome and Spain, the styles of iconic artists of the time as Caravaggio, Velasquez and others. Part of the content of a very broad syllabus that will be developed in depth in this degree.

During 150 hours, the professional will delve into a syllabus designed under the most innovative methodology of the current online university system: Relearning, which allows the student to quickly learn and understand the concepts, so that they are able to develop critical and analytical thinking. Training with a variety of multimedia resources and theoretical and practical content formats, available from day one for consultation or downloading from any device.

This **Postgraduate Certificate in Baroque Art** is the most comprehensive and up-to-date educational program on the market. The most important features include:

- ♦ Developing practical cases presented by experts in Art History
- ♦ The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

With this program you will be able to distinguish the Art of this Art Period from that of other periods"

“

TECH's study system will allow you to organize your time and pace of learning, adapting it to your current schedule"

The program's teaching staff includes professionals from sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

Learn all about Baroque Art and get your degree in just 6 weeks 100% online.

It delves into the history of three greats of Baroque Art: Rubens, Rembrandt and Vermeer.

02 Objectives

 - 1.10.3. Johannes Vermeer

“ Possessing exclusive qualifications makes the difference in today's professional profile. Get your Baroque Art Degree 100% online and in 6 weeks”

04

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: A way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world"

Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This intensive program in Humanities at TECH Technological University prepares you to face all the challenges in this area, both nationally and internationally. Its main objective is to promote personal and professional growth by , helping you achieve success. For this purpose, we rely on Harvard Business school case studies with which we have a strategic Convention that allows us to use the materials used in the most prestigious university in the world.

We are the only online university that offers Harvard materials as teaching materials on its courses"

The case method has been the most widely used learning system among the world's leading humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University *case studies method* with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard *case studies* with the best 100% online teaching method: Relearning.

In 2019 we obtained the best learning results of all Spanish-language online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only Spanish-speaking university qualified to employ this successful method. In 2019, we have managed to improve the overall satisfaction levels of our students (teaching quality, quality of teaching materials, course structure, objectives...) as far as the indicators of the best online university in Spanish are concerned.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: A direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Re-testing

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: So that they can see how they are achieving your goals.

05

Certificate

The Postgraduate Certificate in Baroque Art, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this training program
and receive your diploma without travel or
laborious paperwork”*

This **Postgraduate Certificate in Baroque Art** contains the most complete and up-to-date educational program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained through the Postgraduate Certificate and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Baroque Art**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
