# Introduction

The Gospels or the Parables are some of the main elements that help to shape and form the Faith of the believers of Christianity. Therefore, understanding the word of Jesus Christ and the messages of the Catholic Religion is an essential aspect to extract the meaning and origin of the different beliefs of the practitioners. Because of this, philosophers specialized in the study of the relationship between individuals and religions must have high competencies in its management, which is why TECH has created this program. During it, the student will understand the Christian Meaning of Death or identify the representations of the messages of Jesus Christ, 100% online and from his own home.

“

You will detect, with this program, the meaning that Jesus of Nazareth wanted to transmit through his Parables and his stories narrated in the first person”

The consolidation of the Christian Faith is essentially developed through the figure of Jesus Christ. In this sense, his Parables or his stories narrated in the first person have an implicit message that configures a certain vision of the relationship with the environment and with others of the believers themselves. To deeply understand the convictions of Christianity, therefore, it is indispensable to master the meaning of the ideas transmitted. For this reason, philosophers who have a special concern for the analysis of Religion are obliged to know the intricacies of the Christian Message in order to carry out their work efficiently.

For this reason, TECH has designed this Postgraduate Certificate, which will give the student the most avant-garde and effective knowledge to understand in a simple way the word and actions of Jesus Christ. Throughout this academic period, you will expand your skills in identifying the Christian Meaning of Death and suffering or analyze the signs of salvation and authority of Jesus present in the Parables. In addition, you will establish the different mechanisms of Faith of the Church in Jesus Christ or learn to extract the most avant-garde meaning of the Creed.

Because this program is taught through a 100% online methodology, the student will be able to achieve excellent learning without the need to make uncomfortable trips to study centers. Likewise, didactic materials will be available in formats as readings, explanatory videos or interactive summaries. With this, TECH's intention is to provide you with an enjoyable and fully individualized education, operative through a device with an Internet connection and from anywhere in the world.

This **Postgraduate Certificate in Christian Message** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Catholic Education
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning.
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*Analyze, through this Postgraduate Certificate, the signs of salvation and authority of Jesus Christ that are present in the Parables”*

“

*Optimize your learning by means of didactic materials in formats such as self-assessment tests or interactive summaries”*

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the course. For this purpose, students will be assisted by an innovative interactive video system created by renowned experts in the field of educational coaching with extensive experience.

*This Postgraduate Certificate will allow you to detect and analyze the mechanisms of faith of the Church in Jesus Christ as the Lord or as the revelation of God.*

*The 100% online methodology in which this Postgraduate Certificate is developed will allow you to learn only with a device with an Internet connection from anywhere in the world.*

# 02

# Objectives

The Postgraduate Certificate in Christian Message has been designed with the intention of giving the student the best tools to understand the meaning and scope of the same. Therefore, the student will understand in depth the theological reading of the life of Jesus or the belief in eternal life. All this, ensuring learning by following a series of general and specific objectives established for this program.

“

*Meet the general and specific objectives designed by TECH for this program and achieve excellent professional growth”*

  - 1.10.1. The Creed
  - 1.10.2. I believe in Eternal Life

“

*Take this TECH Postgraduate Certificate to understand in depth the different meanings offered by the messages of Christianity”*

04

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

# 05 Certificate

The Postgraduate Certificate in Christian Message guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”*

This private qualification will allow you to obtain a **Postgraduate Certificate in Christian Message** endorsed by **TECH Global University**, the world's largest online Prehistory, Ancient History and the

**TECH Global University**, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
