Introduction

Nowadays, the world has become tremendously changing and complex, and social phenomena are becoming increasingly relevant. That is why it's fundamental to understand and analyze the social reality in which the individual develops. All the more reason why this degree is a high-value specialization that focuses on studying and analyzing current social problems from a critical and reflective perspective. This program offers a complete and updated preparation to master the social challenges of the present. It is a 100% online actualization opportunity that uses an innovative pedagogical methodology such as Relearning, which favors active and meaningful student learning. It also offers great flexibility so that students can organize their academic resources according to their time availability and needs.

“

*A Postgraduate Certificate that
will provide you with all the keys of
Contemporary Social Analysis”*

Since the changes in society are becoming more and more vertiginous, social phenomena are becoming more and more relevant. In this context, it is essential to understand and analyze social reality in order to act in a critical and reflective manner. In this sense, Contemporary Social Analysis is postulated as a discipline that focuses on studying and understanding current social problems from a multidisciplinary and critical perspective.

Therefore, the Postgraduate Certificate in Contemporary Social Analysis provides a complete and updated preparation to address the social challenges of the present. Throughout the program, students will have the opportunity to delve into the main social problems of today, such as Inequality, Exclusion, Violence or Poverty, among other key issues.

This degree is taught online, which allows students to access the specialization from anywhere in the world and adapt their pace of study to their time availability. In addition, it has an innovative pedagogical methodology such as Relearning, which favors active and meaningful student learning. Through this pedagogical approach, students are the protagonists of their own learning process, through practical and reflective activities.

This **Postgraduate Certificate in Contemporary Social Analysis** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Contemporary Social Analysis
- ♦ The graphic, schematic, and practical contents with which they are created, provide exhaustive and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Go through the historical processes that have shaped the main historical systems of social stratification”

“

You will master the main concepts related to Social Inequality”

Access a unique qualification in the market to address Contemporary Social Analysis.

Test your skills by carrying out case studies on key sociological theories.

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

02

Objectives

In view of the increasing complexity of conducting rigorous analyses of the most relevant social processes and changes, the purpose of this program is to provide sociologists and specialists with the most effective tools to unravel the concepts of Contemporary Social Analysis. The Syllabus focuses on the most relevant knowledge modules in this area, addressing key issues of interest to professionals in the field.

“

*Boost your career by mastering
the differential features of Social
Stratification systems”*

General Objectives

- ♦ To analyze current social processes from both a classical and contemporary perspective
- ♦ To understand the contemporary sociology of communication, education, family and culture
- ♦ To study the growing relevance of the gender perspective and diversity in today's societies

You will achieve your goals to expertly analyze the societies of the present"

Specific Objectives

- ♦ To understand the main concepts related to social inequality and social stratification systems
- ♦ To know the main theoretical and practical perspectives from which the study of different aspects of social stratification, social inequality and economic inequality have been approached
- ♦ To understand the historical processes that have shaped the main historical systems of social stratification and to understand their differential features

03

Structure and Content

In order to ensure complete coverage of the curriculum, TECH has adopted the Relearning methodology in the development of all teaching materials. This methodology implies that key concepts and terminology related to social processes are repeated throughout the syllabus, resulting in more natural and effective learning. As a consequence, students will not need to invest many hours of study to master all the contents, as they are reinforced with a large amount of high quality audiovisual and complementary material.

“

An expertly crafted syllabus and quality content about Contemporary Social Analysis”

Module 1. Social Structure in Contemporary Societies

- 1.1. Social Structure, Inequality and Social Stratification
 - 1.1.1. Social Structures
 - 1.1.2. Visions of Social Structure
 - 1.1.3. Social Inequalities

- 1.2. Sociological View of Inequality
 - 1.2.1. Social Stratification
 - 1.2.2. Class, Status and Power
 - 1.2.3. Stratification Theories
- 1.3. Stratification in Human Societies
 - 1.3.1. Stratification Systems
 - 1.3.2. Primitive Societies: Slavery, Breed, Estate
 - 1.3.3. Industrial Society: Class
- 1.4. Social Class in Contemporary Societies
 - 1.4.1. Definitions and Outlines
 - 1.4.2. Models of Capitalism
 - 1.4.3. Deindustrialization
- 1.5. Economic Inequalities
 - 1.5.1. Concepts, Measurement and Analysis Unit
 - 1.5.2. Inequality Indicators
 - 1.5.3. Distributive Role of the States
- 1.6. Poverty, Deprivation and Social Exclusion
 - 1.6.1. Concepts
 - 1.6.2. Poverty in Developed Societies
 - 1.6.3. Relationship Between Inequality and Poverty
- 1.7. Social Mobility
 - 1.7.1. Concept and Types
 - 1.7.2. Theories of Social Mobility
 - 1.7.3. Fees

- 1.8. Consequences of Social Inequality
 - 1.8.1. Effects of Class and Status
 - 1.8.2. Social Class and Unemployment
 - 1.8.3. Class and Migration
- 1.9. Crisis Management
 - 1.9.1. Neoliberalism
 - 1.9.2. Capital/Labor Changes
 - 1.9.3. Changes in Culture
- 1.10. Historic and Contemporary Globalization
 - 1.10.1. Dimensions of Globalization
 - 1.10.2. Capitalism
 - 1.10.3. A World in Transition

“

*A program with all the keys to
a world in transition”*

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: ***Relearning.***

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05 Certificate

The Postgraduate Certificate in Contemporary Social Analysis guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This **Postgraduate Certificate in Contemporary Social Analysis** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Contemporary Social Analysis**

Official N° of hours: **150 h.**
