Introduction

Teaching is a daily challenge that is nourished by experience and learning from constant updating. Learning each new resource emanating from the different current methods is a basic requirement to offer quality work in this area. This program has been created to allow students to acquire this knowledge, with quality and in a structured way, in a single educational path. An exceptional opportunity to study at a high-quality university.

O INFANTE D. HENRIQUE VA
CONQUISTA DE CEUTA
(SÉCULO XV)

“

The goal this Postgraduate Certificate proposes is to advance by learning how to implement different methodologies in the teaching of geography and history”

Teaching is a task in which professionals are constantly nourished by innovation. The different Current Methods propose alternative ways of approaching the programs that must be taught in each school year.

This program offers the possibility of learning how these different methodological options are established and developed, in order to be able to incorporate their benefits to professional practice.

Teachers should be aware of the development of their discipline over time and of the various legislative changes that have taken place in the field of education, in order to improve their skills when teaching an everchanging and evolving student body.

It is precisely in this need to update that this Postgraduate Certificate offers teachers a special treatment of ICT, extremely current tools in our education system that serve as attractive vehicles to engage students.

Moreover, as this Postgraduate Certificate delve into the different methodological and assessment techniques, educators will be able to develop the necessary capacity to establish a satisfactory teaching-learning process with their students.

An efficient, highly instructional and impactful Postgraduate Certificate that will optimize your effort and convert it into performance with the best learning system on the market"

This **Postgraduate Certificate in Current Methods in History and Geography in High School** contains the most complete and up-to-date program on the market. The most important features include:

- » A large number of practical cases presented by experts in Current Methods in History and Geography in High School
- » The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- » The latest updates on Current Methods in History and Geography in High School
- » It contains practical exercises where the self-evaluation process can be carried out to improve learning
- » Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- » With special emphasis on evidence-based methodologies in Current Methods in History and Geography in High School
- » All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- » Content that is accessible from any fixed or portable device with an Internet connection

“

Incorporate into your work practice the most interesting benefits of the new methodologies and acquire new, more interesting and efficient work capabilities”

The teaching staff includes teaching professionals in the field of Current Methods in History and Geography in High School, who bring their experience to this training program, as well as renowned specialists belonging to leading societies and prestigious universities.

The multimedia content developed with the latest educational technology will provide students with situated and contextual learning, i.e., a simulated environment that will provide immersive learning programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative, interactive video system developed by recognized experts in the field of Current Methods in History and Geography in High School who have extensive teaching experience.

We promote your professional and personal growth through the highest quality teaching systems.

Take the opportunity to learn about the latest advances in this field and apply it to your daily practice.

02 Objectives

The main objective of the program is to develop theoretical and practical learning, so professionals can master of the specific work methods in teaching geography and history in a practical and rigorous way. Including the latest updates and new protocols in the field.

“

Take a leap in quality by incorporating new methodologies to your teaching and improve your chances of work and success in teaching geography and history to high school students”

General Objectives

- » Delve into student motivation and teacher roles in this task, for which diverse cognitive theories must be introduced
- » Have an impact on the motivation of adolescents specifically, getting to know them and being able to mediate in class conflicts
- » Provide methodological tools so the teachers that enroll in the program can motivate students

Acquire new work tools with this complete Postgraduate Certificate"

Specific Objectives

- » Identify the main Current Methods that have emerged as a result of geographical divisions
- » Delve into the most significant models and currents worldwide, segmented geographically

03

Course Management

The program includes in its teaching staff leading experts in Current Methods in History and Geography in High School, who pour into this program the experience of their work. In addition, other experts of renowned prestige participate in its design and planning completing the program in an interdisciplinary manner.

“

*Learn about the latest advances in procedures
in Current Methods in History and Geography
in High School from leading professionals”*

Management

Mr. Cañestro Donoso, Alejandro

- » PhD in Art History, University of Murcia
- » Professor at the University of Alicante

Professors

Ms. Domínguez Alonso, Lourdes

- » Degree in History, University of Alicante
- » Master's Degree in Compulsory High School Education, Vocational Training and Language Teaching

04

Structure and Content

The contents have been structured and designed by a team of professionals from the best educational centers and universities in the country, who are aware of the relevance of current innovation and who are committed to quality teaching through new educational technologies.

“

With this complete syllabus, you will learn the different ways of working according to the different methodologies applicable in this area”

Module 1. Current Methods

- 1.1. Difficulties in Teaching History
 - 1.1.1. Social and Political Vision of History
 - 1.1.2. Nature as a Social Science
 - 1.1.3. Student Body Interest
- 1.2. Difficulties in Teaching Geography
 - 1.2.1. Necessary Cognitive Development of the Student Body
 - 1.2.2. Necessary Use of Tools and Resources
 - 1.2.3. Learner's Need for a New Understanding of Their Environment
- 1.3. Teaching Methodology
 - 1.3.1. Definition of Teaching Methodology
 - 1.3.2. Methodology Efficacy
 - 1.3.3. Traditional and Modern Methodologies
- 1.4. Teaching-Learning Models
 - 1.4.1. Dimensions of Psychoeducational Knowledge
 - 1.4.2. Models for the Teaching-Learning Process
 - 1.4.3. Instructional Design
- 1.5. Lectures and Teacher Role
 - 1.5.1. Positive Aspects of Lectures
 - 1.5.2. Negative Aspects of Lectures
 - 1.5.3. Lectures Today
- 1.6. Behavioral Learning Theories
 - 1.6.1. Classical Conditioning
 - 1.6.2. Operant Conditioning
 - 1.6.3. Vicarious Conditioning
- 1.7. Cognitive Theories and Constructivist Theories
 - 1.7.1. Classical Theories of School Learning
 - 1.7.2. Cognitive Theories of Information Processing
 - 1.7.3. Constructivism

- 1.8. Methodologies for Developing Competencies
 - 1.8.1. Problem-Based Learning
 - 1.8.2. Case Studies
 - 1.8.3. Project-Based Learning.
 - 1.8.4. Cooperative Learning
 - 1.8.5. Didactic Contract
- 1.9. Didactic Methodology Applied to Social Sciences
 - 1.9.1. Teachers as a Key Methodological Element
 - 1.9.2. Expository Strategies
 - 1.9.3. Inquiry Strategies

“

A unique, key, and decisive training experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

The case method has been the most widely used learning system among the world's leading Geography and History schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology, we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Certificate in Current Methods in History and Geography in High School guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Current Methods in History and Geography in High School** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding Postgraduate Certificate issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Current Methods in History and Geography in High School**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
