01

Introduction

The Eucharist represents, for Christians, the culminating moment of their faith. A ritual full of symbolism and spiritual charge that finds its fundamental roots in the Bible. In this Postgraduate Certificate, students will go through and reflect on all aspects of the most important celebration in Catholicism. An essential program for Religious Studies students. With a new way of approaching learning, through a next generation teaching plan, and a 100% online format, students will delve into an innovative, creative and effective approach that will essential skills for their professional growth.

Welcome to the new era of education. Welcome to TECH. A different, convenient and guaranteed way to access the best high-level university education"

TECH has designed this program with a criterion of excellence from which students will be able to acquire sapiential and dynamic knowledge of the Eucharist as the culmination of Christian initiation and as the "source and summit" of the whole being and act of faith as sacramental actualization of Easter, with an organic vision of the Eucharist, including its biblical foundation. With these competencies, they will be able to break down the theological and liturgical development present in the history of the Eucharist, explaining its underlying theology and the current celebratory components of the Eucharist, in order to assess the pastoral practice surrounding the Eucharist in various ecclesial communities.

By fulfilling the objectives proposed throughout the course, students will analyze the main historical milestones of the social Magisterium of the Church, identifying the main lines of its teachings in the 19th century. Thus, they will know how to outline the role played by the Church's magisterium in the broader mission entrusted by God to the Church and the character of the reflection it offers on temporal or social issues.

Thus, graduates will acquire the necessary knowledge in this area in an intensive and efficient manner. With this program, students will also gain access to a way of working in which the scientific method is incorporated into religious thought, in favor of a global analysis of all its implications and developments. All this in a 100% online format where students can balance their study time with full-time employment, adapting the learning process to their obligations and allowing them to successfully complete the program.

This **Postgraduate Certificate in Eucharist** is the most complete and up-to-date educational program on the market. The most important features of the program include:

- Practical cases that apply the theoretical content through real life situations
- The graphic, schematic, and eminently practical content with which they are conceived
- The great variety of practical exercises where the self-evaluation process can be carried out to improve learning
- An algorithm-based interactive learning system that enables decision-making in the situations that are presented
- Its intensive focus on practical learning
- High quality theoretical lessons, with questions to the program, discussion forums on controversial topics and individual reflection work
- Content that is accessible from any fixed or portable device with an Internet connection

Dogma, rite and sacraments analyzed and unraveled with a broad view of what they mean and their evolution throughout the history of Christianity"

The greatest University in the technological era is placed at the service of the current needs of society, at a global level, and of the individual, in particular, with a transforming spirit and vocation for social change"

The liturgical development of the Eucharist throughout history, analyzed and broken down in a highly specialized Postgraduate Certificate.

The most technologically developed university in the area of e-Learning offers you the technical and human solvency of the largest Spanish-speaking, 100% online university in the world.

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive specialization programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which students must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Objectives

The main objective of this Postgraduate Certificate in Eucharist offered by TECH is to provide students with a complete and solvent vision of the Eucharist. An essential discipline for Theology scholars. Therefore, this program has been developed with a focus on concrete objectives so as to develop specific skills and competencies that allow for exponential growth, both on a personal and professional level. Thus, students will be instructed in biblical foundations and will delve into the historical development of the celebration and theology of the Eucharist, obtaining a highly capacitating specialization.

At TECH Global University you will learn to enhance your skills, increase your critical capacity and think in a humanistic way. With the guarantee that only the best educational foundation can bring professionals"

General Objetive

- Offer sapiential and dynamic knowledge of the Eucharist as the culmination of Christian initiation and as the "source and summit" of the whole being and work of faith as a sacramental actualization of Easter

Specific Objectives

- Present an organic vision of the Eucharist, indicating its biblical foundation
- Break down the theological and liturgical development in the history of the Eucharist, explaining its underlying theology
- Explain the current celebratory components of the Eucharist
- Evaluate the pastoral practice around the Eucharist in different ecclesial communities

Today more than ever theologians need the endorsement of a solid updated body of knowledge to confront their experience with the real world with guarantees of success"

03

Structure and Content

This curriculum is designed for those who want to increase their professional competence in Religious Studies or deepen their humanistic side. Created with high-quality content, it prepares students to reach excellence in their profession. This training program has been developed in a comprehensive manner to achieve the most complete competencies in each of its areas. The teaching staff is highly qualified at both the theological and teaching levels, and they implement the best educational methodology. Because learning from the best is the easiest way to become the best.

Adaptable, flexible and versatile: our curriculum is designed so you can decide when, how and the amount of time and effort you wish to devote to your training. And without compromising educational efficiency"

Module 1. Eucharist

1.1. Introduction
- 1.1.1. Historical Review of the Treaty
- 1.1.2. The Eucharist, Source and Summit of Christian Life

1.2. Biblical Foundation
- 1.2.1. Old Testament Precedents
- 1.2.2. Institutional Texts
- 1.2.3. Johannine Corpus
- 1.2.4. Other Testimonies

1.3. Historical Development of the Celebration and Theology of the Eucharist
- 1.3.1. The Celebration and Eucharistic Consciousness of Christian Antiquity
- 1.3.2. Eucharistic Controversies and the Celebration during the Middle Ages
- 1.3.3. Reformation and the Council of Trent
- 1.3.4. The Liturgical Movement and the Second Vatican Council

1.5. Liturgy of the Eucharist: Mystagogy
- 1.5.1. Initial Rites
- 1.5.2. Liturgy of the Word
- 1.5.3. Liturgy of the Eucharist

1.6. Current Problems and Perspectives
- 1.6.1. Eucharist and Church
- 1.6.2. The Social Dimension of the Eucharist
- 1.6.3. Ecumenical Perspectives
- 1.6.4. Pastoral Orientations

A curriculum designed to make it easy for you to achieve your Postgraduate Certificate in Eucharist with fluency and efficiency"

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

> *Our program prepares you to face new challenges in uncertain environments and achieve success in your career"*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

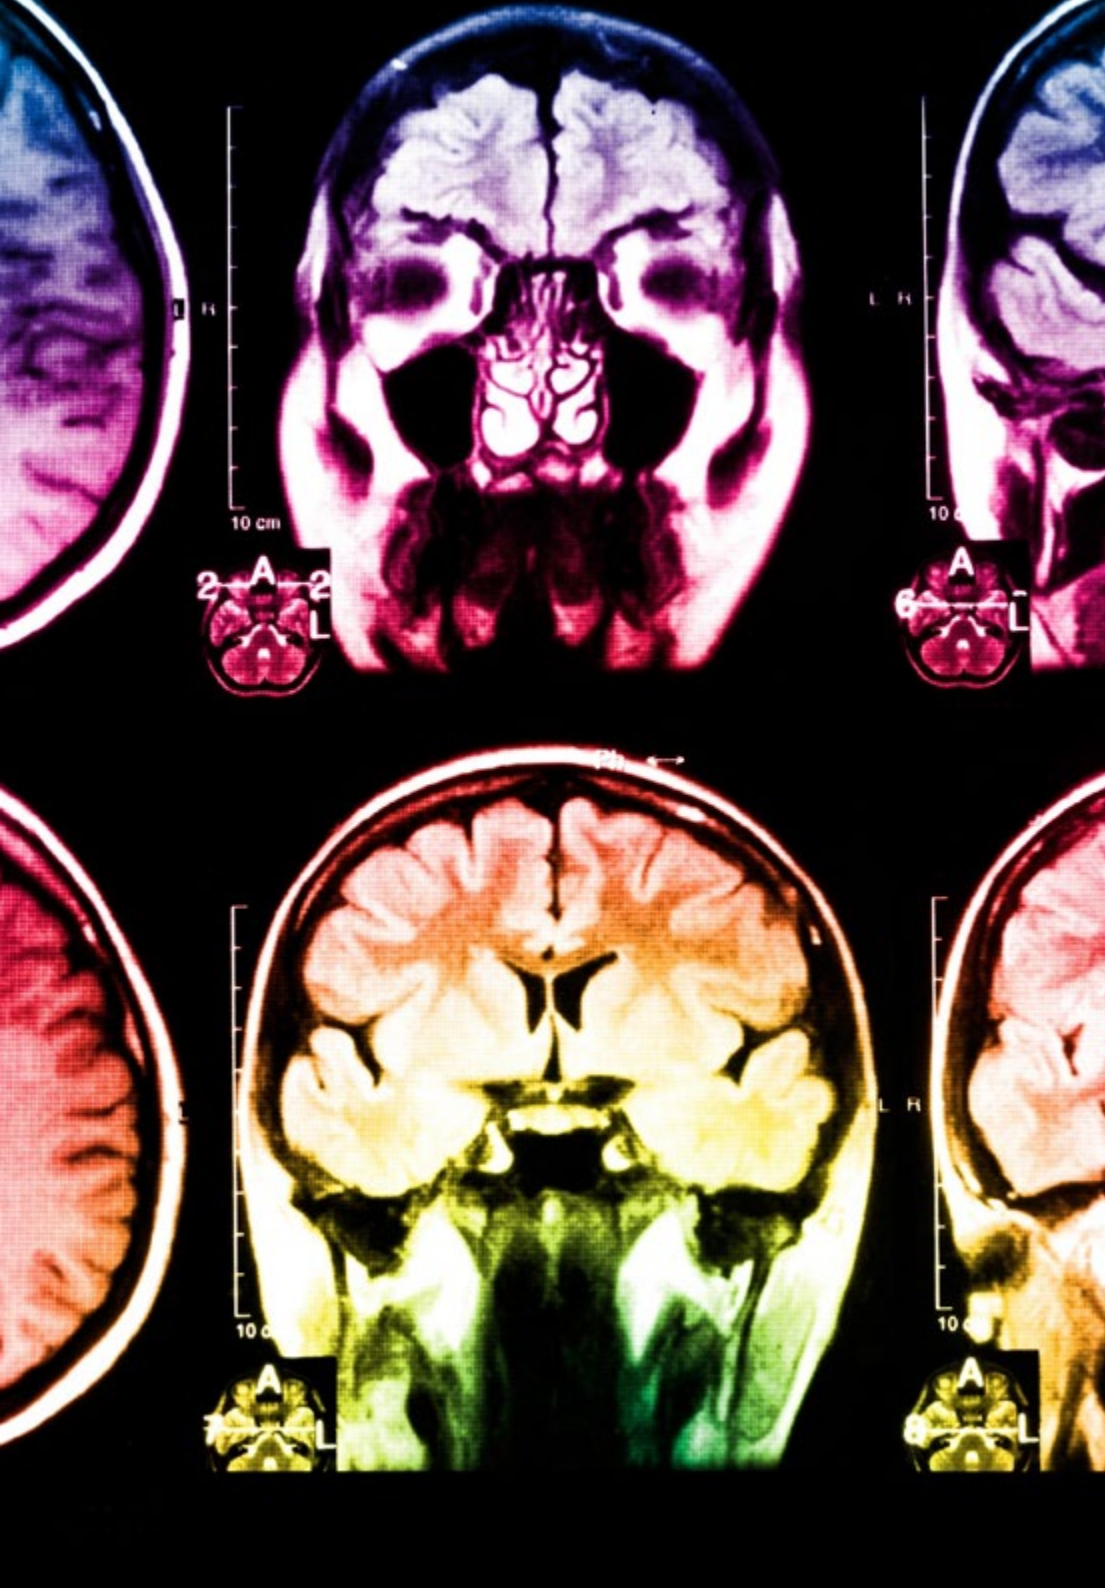
TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.



In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

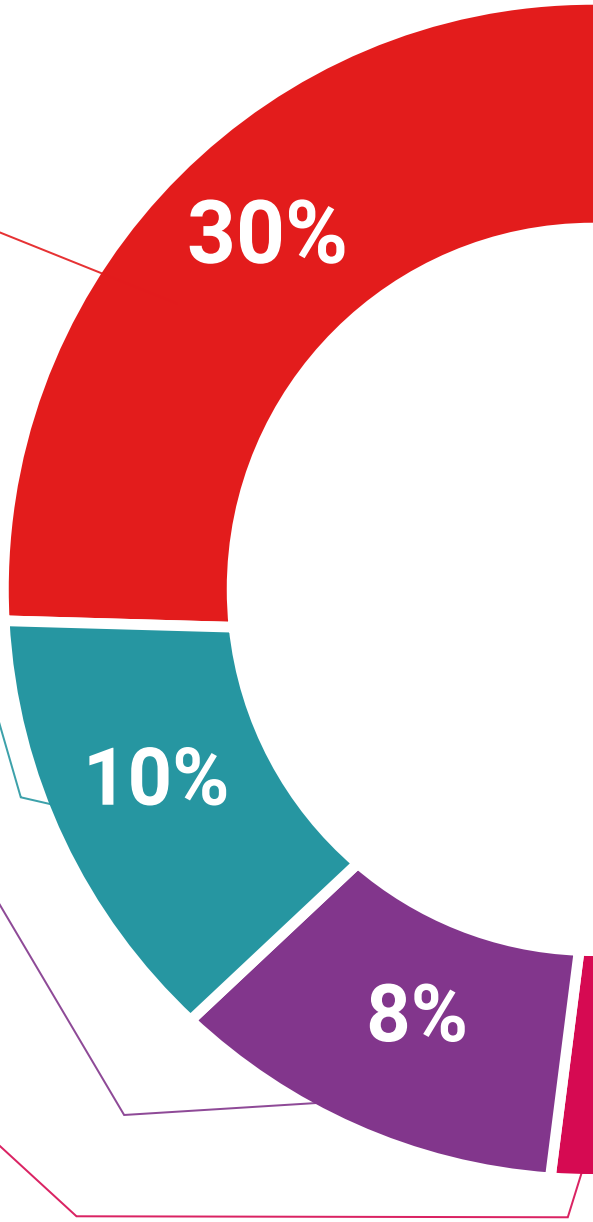
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

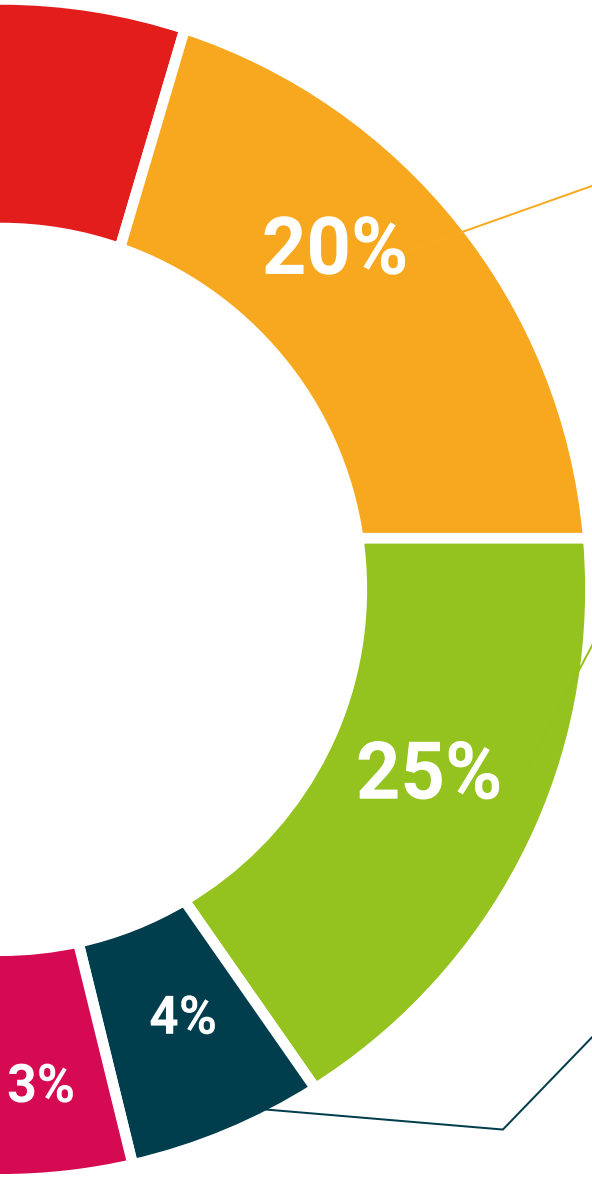
Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.





Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Certificate in Eucharist guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Eucharist** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (***official bulletin***). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
