# Introduction

This program in Geography of the Mediterranean World addresses the different territories of human and physical geography, ensuring that students gain a working knowledge of the various geospatial techniques.

“

*The Postgraduate Certificate in Geography of the Mediterranean World is aimed at those who are interested in learning more about the world around us”*

This program journeys through Africa, America, Europe, Asia and Oceania, their morphology and activity, to update student knowledge based on the latest scientific evidence provided by the age of satellites and technological precision instruments.

Urban environments, sustainability or migratory movements, are flows of human development that are circumscribed to their regions in specific ways, thus affecting the morphology of the territories. Cultural geography, sensitive to the technology mentioned above, is key at a time when digital technologies permeate all spheres of our lives and substantially change our communication and geographical positioning in the world.

This program is aimed at those interested in attaining a higher level of knowledge of world geography. Take advantage of the opportunity to take this educational program in a 100% online format, without having to give up obligations, and making it easy to continue studying. Update your knowledge and get your qualification to continue growing personally and professionally.

This **Postgraduate Certificate in Geography of the Mediterranean World** contains the most complete and up-to-date program on the market. The most important features include:

- The development of 100 simulated scenarios presented by experts in Geography
- The graphic, schematic, and practical contents provide students with scientific and practical information on the disciplines that are essential
- The latest advances in physical geographic concreteness and the current situation of human geography in different territories
- It contains practical exercises where the self-assessment process can be carried out to improve learning
- Interactive learning system based on the case method and its application to real practice
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

*Gain in-depth knowledge of today's world from a geographical perspective and from the hand of professionals in the sector"*

“

*This 100% online Postgraduate Certificate offers a practical knowledge update on geography, without sacrificing the highest scientific and academic rigor”*

The teaching staff includes professionals in geography and history, who pour into this program the experience of their work, in addition to recognized specialists belonging to reference societies and prestigious universities.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations.

The program design is centered around Problem-Based Learning, in which students will resolve professional practice situations that may arise throughout the course. To that end, they will be assisted by an innovative, interactive video system created by renowned experts in geography who have extensive teaching experience.

*Make the most of the latest educational technology to get up to date in human and world Geography without leaving your home.*

*Know the reality of the World and Human Behavior with the utmost academic rigor.*

# 02 Objectives

This program is aimed at those who are interested in learning more about the world around us, orography, geopolitics in detail or human behavior in population distribution and activity. Our students will update on the trends in population development, studying issues that constitute the forefront of the discipline in depth.

Reach the level of knowledge you desire  
and master geography at a global scale”

## General Objective

---

- Attain the level of knowledge required to master world geography at the physical and human levels from a global perspective, with special emphasis on the European context and a vision of the urban organization of territories

*A boost to your CV that will give you the competitiveness of the best prepared professionals in the labor market”*

## Specific Objectives

---

- Get to know the natural and socioeconomic elements of the Mediterranean world
- Understand the regional differences between the different Mediterranean areas in terms of socioeconomic and natural aspects
- Use the terminology and techniques accepted in the geographic science and profession
- Understand Spain's Relations within the Transnational Framework

03

# Structure and Content

The structure of the contents has been designed by a team of professionals in world geography, aware of the relevance of current education in order to delve into this area of knowledge, with the aim of humanistically enriching the student and raising the level of knowledge in world geography through the latest educational technologies available.

“

*This Postgraduate Certificate in Geography of the Mediterranean World contains the most complete and up-to-date program on the market”*

## Module 1. Geography of the Mediterranean World

- 1.1. Cultural Diversity and Political Fragmentation
  - 1.1.1. The Mediterranean Peoples
- 1.2. Mediterranean Environments
  - 1.2.1. Mediterranean Soils
  - 1.2.2. Vegetation Adaptation
  - 1.2.3. Mediterranean Vegetation
  - 1.2.4. Fauna
- 1.3. The Population
  - 1.3.1. Evolution and Demographic Characteristics of the Mediterranean Peoples
  - 1.3.2. The Demographic Challenges of the Future: Aging, Decline and Migratory Pressures
- 1.4. Migration in The Mediterranean Peoples
  - 1.4.1. Emigration
  - 1.4.2. Immigration
- 1.5. Evolution of Mediterranean Cities
  - 1.5.1. Cities and Urban Networks
- 1.6. Rural Areas
  - 1.6.1. Rural Areas: Characteristics and Contrasts
- 1.7. Primary Sector in the Mediterranean
  - 1.7.1. General Characteristics
- 1.8. Secondary Sector in the Mediterranean
  - 1.8.1. Industrial Sector
- 1.9. Tertiary Sector in the Mediterranean
  - 1.9.1. General Aspects of the Mediterranean Tertiary Sector
  - 1.9.2. Trade and Commerce
- 1.10. The Tourism Emergence
  - 1.10.1. Tourism Emergence in the Mediterranean: Evolution and Characteristics

“

*A unique, key, and decisive educational experience to boost your professional development”*

04

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

# Certificate

The Postgraduate Certificate in Geography of the Mediterranean World guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Geography of the Mediterranean World** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

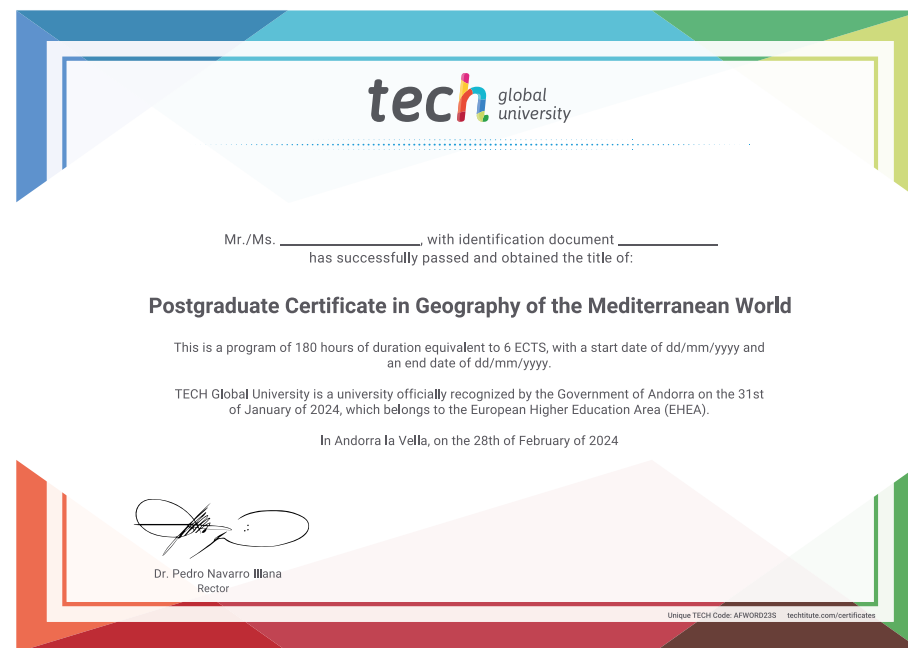

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Geography of the Mediterranean World**

Modality: **online**
