# Introduction

Education plays an elemental role in the sustainable and equitable development of developing countries. However, it is a fact that the lack of resources and adequate educational infrastructure in many impoverished countries hinders this process of social transformation. That is why Humanities professionals can do a great job updating themselves in this area with this program. Through it, students will learn the most effective strategies for strengthening the educational sphere in vulnerable communities, focusing on designing new programs and reorienting existing ones. All this will be available to you in a 100% online format with the most innovative educational resources.

“

*Master the most innovative strategies to strengthen educational intervention in the framework of International Development Cooperation”*

In many developing countries, economic and social inequalities are reflected in education, resulting in a significant gap in the quality of education received by different groups of people. For example, girls and women often have less access to education than boys and men, limiting their opportunities in life. As a result, the values of Sustainable Development are practically non-existent in these regions, which is why there is an urgent need for professionals who are as well prepared as possible in Intervention Strategies in Developmental Education.

In fact, this program is an unique opportunity for Humanities professionals to update their knowledge and promote Sustainable Development in impoverished countries. Always, of course, with a focus on the protection of Human Rights and respect for International Humanitarian Law.

Therefore, during this program you will go through the fundamentals of Education for Sustainable Development, analyzing the different existing educational opportunities and the strategies to enhance them in the most vulnerable communities. Likewise, the focus will be on the preservation of the general prohibitions and restrictions that exist to guarantee Human Rights in conflict zones.

Undoubtedly, a tremendously necessary specialization that will increase the students' professional background and add value to their curriculum. All you will need is a device with an Internet connection, with which you can consult an extensive digital library of advanced educational materials.

This **Postgraduate Certificate in Intervention Strategies in Developmental Education** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ The development of case studies presented by experts in Intervention Strategies in the Education for Development
- ◆ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

*Be part of the change that is providing greater opportunities for vulnerable communities through Education”*

*Design advanced educational intervention plans that reinforce the values of Sustainable Development in developing countries”*

*See how the wide range of interactive resources on the Virtual Campus boost your skills in Intervention Strategies in Developmental Education.*

*Undergo demanding case studies based on real situations in which you will establish the assumptions that make up war crimes in conflict zones.*

The program’s teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

# 02 Objectives

The design of this Postgraduate Certificate focuses on providing students with an advanced knowledge of the latest tools and methodologies that will allow them to design strategies for Developmental-Educational Intervention. Therefore, their actions in developing regions will make a difference in the future of thousands of citizens who have traditionally been excluded from the educational sphere. Likewise, the focus of this program is based on the values of Sustainability and Resilience.

*Achieve the objectives of the program and become the professional demanded by NGOs and governmental entities for the promotion of Education in International Development Cooperation”*

## General Objectives

---

- ◆ Provide students with advanced knowledge in International Cooperation, of a specialized nature and based on theoretical and instrumental knowledge that will allow them to acquire and develop the skills and abilities necessary to obtain a qualification as a solidarity professional
- ◆ Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- ◆ Improve professional performance and develop strategies for adapting and solving the problems of today's world by means of scientific research in cooperation and development processes
- ◆ Disseminate the basics of the current system and develop the critical and entrepreneurial spirit necessary to adapt to political changes, within the framework of international law

## Specific Objectives

---

- ◆ Carry out actions and programs aimed at raising awareness of certain situations of injustice and changing values to combat them
  - ◆ Promote the participation of society, especially children and adolescents and entities in the sector, in transforming the world
  - ◆ Create empowerment processes and spaces for active democratic participation for children, aimed at transforming policies and the decision-making model on issues that affect them
  - ◆ Promote research and reflection on issues related to childhood and development, supporting different proposals to promote human development
  - ◆ Encourage networking with other entities in the sector, to achieve a greater impact in our actions
  - ◆ Analyze and understand global initiatives to fight poverty
  - ◆ Qualify the different types of armed conflicts by distinguishing them from other situations of armed violence; identify and classify the victims of such conflicts; know and understand the victim protection system and be able to apply it
  - ◆ Be aware of the limitations that humanitarian law imposes on combatants in relation to the conduct of hostilities, respect for zones, places and installations marked with a protection sign, and the requirement of a code of conduct relating to victims, medical and religious personnel, and humanitarian organizations
- ◆ Identify situations and persons who are particularly vulnerable in armed conflicts, knowing the protection afforded to them by International Humanitarian Law
  - ◆ Stimulate the participation of the people and groups with whom cooperation activities are developed, enabling them to identify their problems and needs, lead their processes of change, assess their evolution and decide on new courses of action

*Identifies situations and people who are particularly vulnerable in armed conflict"*

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning. Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
