01

Introduction

Since its origins, Metaphysics has been engaged in the search for the basic definitions of matter or life, among many other fundamental questions. Developments that the philosopher must master in order to operate effectively. This Metaphysics program will provide a comprehensive and sound approach to this discipline, with an intensive program that will allow the student to learn effectively and comfortably from their own computer. All this, with the reassurance provided by the most prestigious online university in the world.

“

Acquire specialist skills with expertise on fundamental metaphysical issues, with this high-level Postgraduate Certificate created to propel you towards excellence in your field”

Reality transcends the sensory spectrum. Its qualities need more than empirical explanation in order to be understood and assimilated by human beings. In this Postgraduate Certificate we will engage in a process aimed at understanding the nature of metaphysics, its place in philosophical developments and its importance in the study of society and real-life experience and everyday events.

In order to provide the best education possible, all the essential concepts have been included to propel students to advanced levels of philosophy, with guidance on how to convert this knowledge into effective and practical skills.

A complete compendium of knowledge and developments that will lead to the highest standards of professional training, with the competitiveness of an expert in this field of work.

This Postgraduate Certificate will also teach students the most effective study methods for this subject.

If you seek self-improvement, to achieve a positive change at a personal level, to interact with the best and belong to a new generation of professionals capable of performing their work anywhere in the world, this may be the path for you.

A Postgraduate Certificate fully compatible with other work, personal, teaching or study commitments. Its system and teaching approach will flexibly adjust to student needs throughout the course. Consequently, the results are much more efficient, since study will not become an unbearable burden, but rather, a stimulating and easy challenge to undertake and bring to fruition.

This **Postgraduate Certificate in Metaphysics** contains the most complete and up-to-date program on the market. Its most notable features are:

- ♦ The examination of case studies to apply the theoretical content to real life situations
- ♦ Graphic, schematic, and practical contents which provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ The inclusion of practical exercises where the self-evaluation process can be carried out to improve learning
- ♦ An algorithm-based interactive learning system for decision-making in the situations students are presented with
- ♦ Special emphasis on practical learning
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and assignments for individual reflection
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

An exceptional Postgraduate Certificate that will allow you to advance in your career in a confident and steady way, with the quality of a serious and robust course"

“

This Postgraduate Certificate will allow you to grow as a professional in philosophy and as a humanist, significantly expanding your capacity for analysis and philosophical understanding”

This Postgraduate Certificate is created to ensure you can study in a simple, efficient and flexible way, with the superior quality of an advanced program.

Study with the technical and human excellence of the world's largest 100% online university.

TECH University offers the most innovative, creative and unique offering, in a dynamic, talented and internationally recognized institution. With a space to exchange ideas, experience and reflections. Students will be able to share their learning experience, through forums and other collaborative tools, all 100% online.

TECH supports its students at all times thanks to an involved and committed teaching team. The teaching team transmits their expertise in their professional performance, working from a real, lively and dynamic context. TECH explores the student's critical side, their ability to the field things, their problem-solving skills, as well as their interpersonal skills.

02

Objectives

The main objective of this Postgraduate Certificate is to provide students with the essential concepts to approach this discipline effectively, learning how to carry out analyses, dissertations, presentations, debates or publications related to this subject, with the support of the most comprehensive knowledge. A program on which the student will learn while enjoying the benefits of a Postgraduate Certificate designed to optimize work time to the maximum.

“

The best Postgraduate Certificate in Metaphysics on the educational market. An essential step to achieving excellence in your career"

General Objectives

- ♦ Acquire a rigorous philosophical method, shaped by ordered thought and the capacity for dialog, putting this into practice
- ♦ Possess adequate tools to study philosophical subjects
- ♦ Conduct fruitful scientific work
- ♦ Structure the various philosophical contents that will become evident in daily work environments
- ♦ Develop a mental structure and appropriate conceptual frameworks that structure philosophical criteria rooted in the Christian tradition, including principles, methods and contents of their own
- ♦ Shape students' unique identity as Christian thinkers

The profile of the humanistic professional has reached the highest levels of professionalism. Activate a growth in your competence and don't get left behind"

Specific Objectives

- ♦ Explain the Nature of Metaphysics
- ♦ Be aware of the place of metaphysics within philosophy
- ♦ Expound on the dynamic principles of being and causality
- ♦ Highlight their operation in examples of everyday experience
- ♦ Analyze everyday reality to highlight metaphysical principles
- ♦ Explain the constitutive metaphysical principles of being in the static sense
- ♦ Explain the transcendental properties of being
- ♦ Explain the categories of being by pointing out their operation in examples of everyday experience
- ♦ Explain the analogy of being, pointing out its operation in examples of everyday experience
- ♦ Analyze everyday reality to highlight metaphysical principles

03

Structure and Content

The content of this program has been designed by TECH together with its teaching staff according to the highest quality standards, collating the most comprehensive knowledge in this field, bringing the student closer to excellence. The contents of the program have been put together with the aim of combining high academic impact with effective new approaches. It should be noted that the contents include audiovisual material, complementary readings and self-study exercises to enhance student progress.

“

A very complete syllabus, organized in didactic units created to maintain learning momentum to study consistently and without losing motivation, clearly achieving your goals"

Module 1. Metaphysics

- 1.1. Introduction
 - 1.1.1. Objective and Placement of the Topic
 - 1.1.2. Method and Principles in Metaphysics
 - 1.1.3. Metaphysical and Anti-Metaphysical Philosophies
 - 1.1.4. Fundamental Problems in Metaphysics
- 1.2. Dynamic Metaphysics: Time, Change and Movement
 - 1.2.1. Experiential Data and its Theoretical Problems
 - 1.2.2. History of the Question of Movement: Antiquity, the Middle Ages and Modernity
 - 1.2.3. Matter and Form as Principles of Specification and Individuality
 - 1.2.4. Composition of Act and Potency of Finite Beings
- 1.3. Casual Dynamism
 - 1.3.1. Experiential Data and its Theoretical Problems
 - 1.3.2. Aristotelian Doctrine: Four Causes History and Meaning of the Question
 - 1.3.3. Acting as an Exercise of Efficient Causality
 - 1.3.4. Self-Causation and the Principle of Finality

“

The highest quality in online education delivered by the best professionals in the sector"

Module 2. Metaphysics II

- 2.1. Metaphysics in the Static Sense: Being and Entity
 - 2.1.1. Reflection on the Entity and Its Divisions: The Concept of Being Its Properties
 - 2.1.2. Entity Structure: Essence and Existence
 - 2.1.3. First Metaphysical and Logical Principles: History of the Links between Logic and Metaphysics
 - 2.1.4. Reality Denial, Metaphysical Opposition and Logical Implications of Non-Being
- 2.2. The Transcendental Properties of Being
 - 2.2.1. Unity and Truth
 - 2.2.2. Beauty and Kindness
 - 2.2.3. The Matter of Relativism
- 2.3. The Classification of Being
 - 2.3.1. Predicaments
 - 2.3.2. Substance
 - 2.3.3. Accidents in General
 - 2.3.4. Relation Particulars
 - 2.3.5. Quality Particulars
 - 2.3.6. Ontological Density of the Personal Being
- 2.4. The Participation and Analogy of Being
 - 2.4.1. Historical Background of the Doctrine of Participation
 - 2.4.2. Philosophical Classification of Analogy: Proportionality Attribution
 - 2.4.3. Logical and Mathematical Senses of Analogy

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Certificate in Metaphysics guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Metaphysics** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained through the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Metaphysics**

Official N° of Hours: **250 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
