# Introduction

The different musical styles that exist today are the result of centuries of evolution in this art. From the melodies that were sung in prehistoric times accompanied by the clattering of stones to the songs of Beethoven himself, music has always accompanied human beings. Knowing the evolution of this artistic representation gives the interested party a high cultural level and a broad vision of how it has developed over the years. This is the reason for this degree, to guide you through this historical journey and provide you with all the information you need to become an expert in this area. A 100% online program, with a customizable schedule and distributed over 6 weeks.

“

*You will find the most complete online program on the History of Music in this Postgraduate Certificate"*

Music is an art that only a few people know how to value. And the variety of its genres, from the most classic to the current ones, adapts it to the tastes of anyone. Studies have shown that, even in prehistoric times, different cultures had instruments with which they used to sing melodies in their celebrations and rituals. But like any art, the course of history, linked to political, social and economic events, made it evolve into what we know today.

Knowing its origins and its development over the centuries provides a more critical and cultural vision of this art, which is why TECH has considered launching this Postgraduate Certificate in Music History. This is a 100% online program designed by experts in Art History that covers, from the origins to the second half of the twentieth century, the key aspects to understand the evolution of music, delving into the genres of each historical period and its greatest representatives.

In addition, in order for graduates to find in this degree the best opportunity to broaden their knowledge, in the Virtual Classroom they will find additional material in audiovisual format, complementary readings, research articles and much more. But undoubtedly, the definitive factor that will help you achieve your academic objectives is the adaptability of this program to your own availability, being able to customize the academic schedule and deciding when and from where to take this Postgraduate Certificate.

This **Postgraduate Certificate in Music History** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Developing practical cases presented by experts in Art History
- ♦ The graphic, schematic, and eminently practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning.

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: A way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

*At TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world"*

*Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.*

*The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.*

### A learning method that is different and innovative

This intensive program in Humanities at TECH Technological University prepares you to face all the challenges in this area, both nationally and internationally. Its main objective is to promote personal and professional growth by helping you achieve success. For this purpose, we rely on Harvard Business school case studies with which we have a strategic Convention that allows us to use the materials used in the most prestigious university in the world.

*We are the only online university that offers Harvard materials as teaching materials on its courses"*

The case method has been the most widely used learning system among the world's leading humanidad schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

Our university is the first in the world to combine the Harvard University *case studies method* with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard *case studies* with the best 100% online teaching method: Relearning.

*In 2019 we obtained the best learning results of all Spanish-language online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only Spanish-speaking university qualified to employ this successful method. In 2019, we have managed to improve the overall satisfaction levels of our students (teaching quality, quality of teaching materials, course structure, objectives...) as far as the indicators of the best online university in Spanish are concerned.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: A direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Re-testing

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: So that they can see how they are achieving their goals.
