01
Introduction

The concept of culture, as inherent to the human being, is an area of study of great importance for the philosopher. In this program, the professional will be able to acquire the necessary knowledge in this field, gaining the critical discernment needed to analyze current situations. A high-impact education, with a comprehensive work program that, from the students' computer, will allow them to learn efficiently and comfortably. All this, with the reassurance provided by the most prestigious online university in the world.
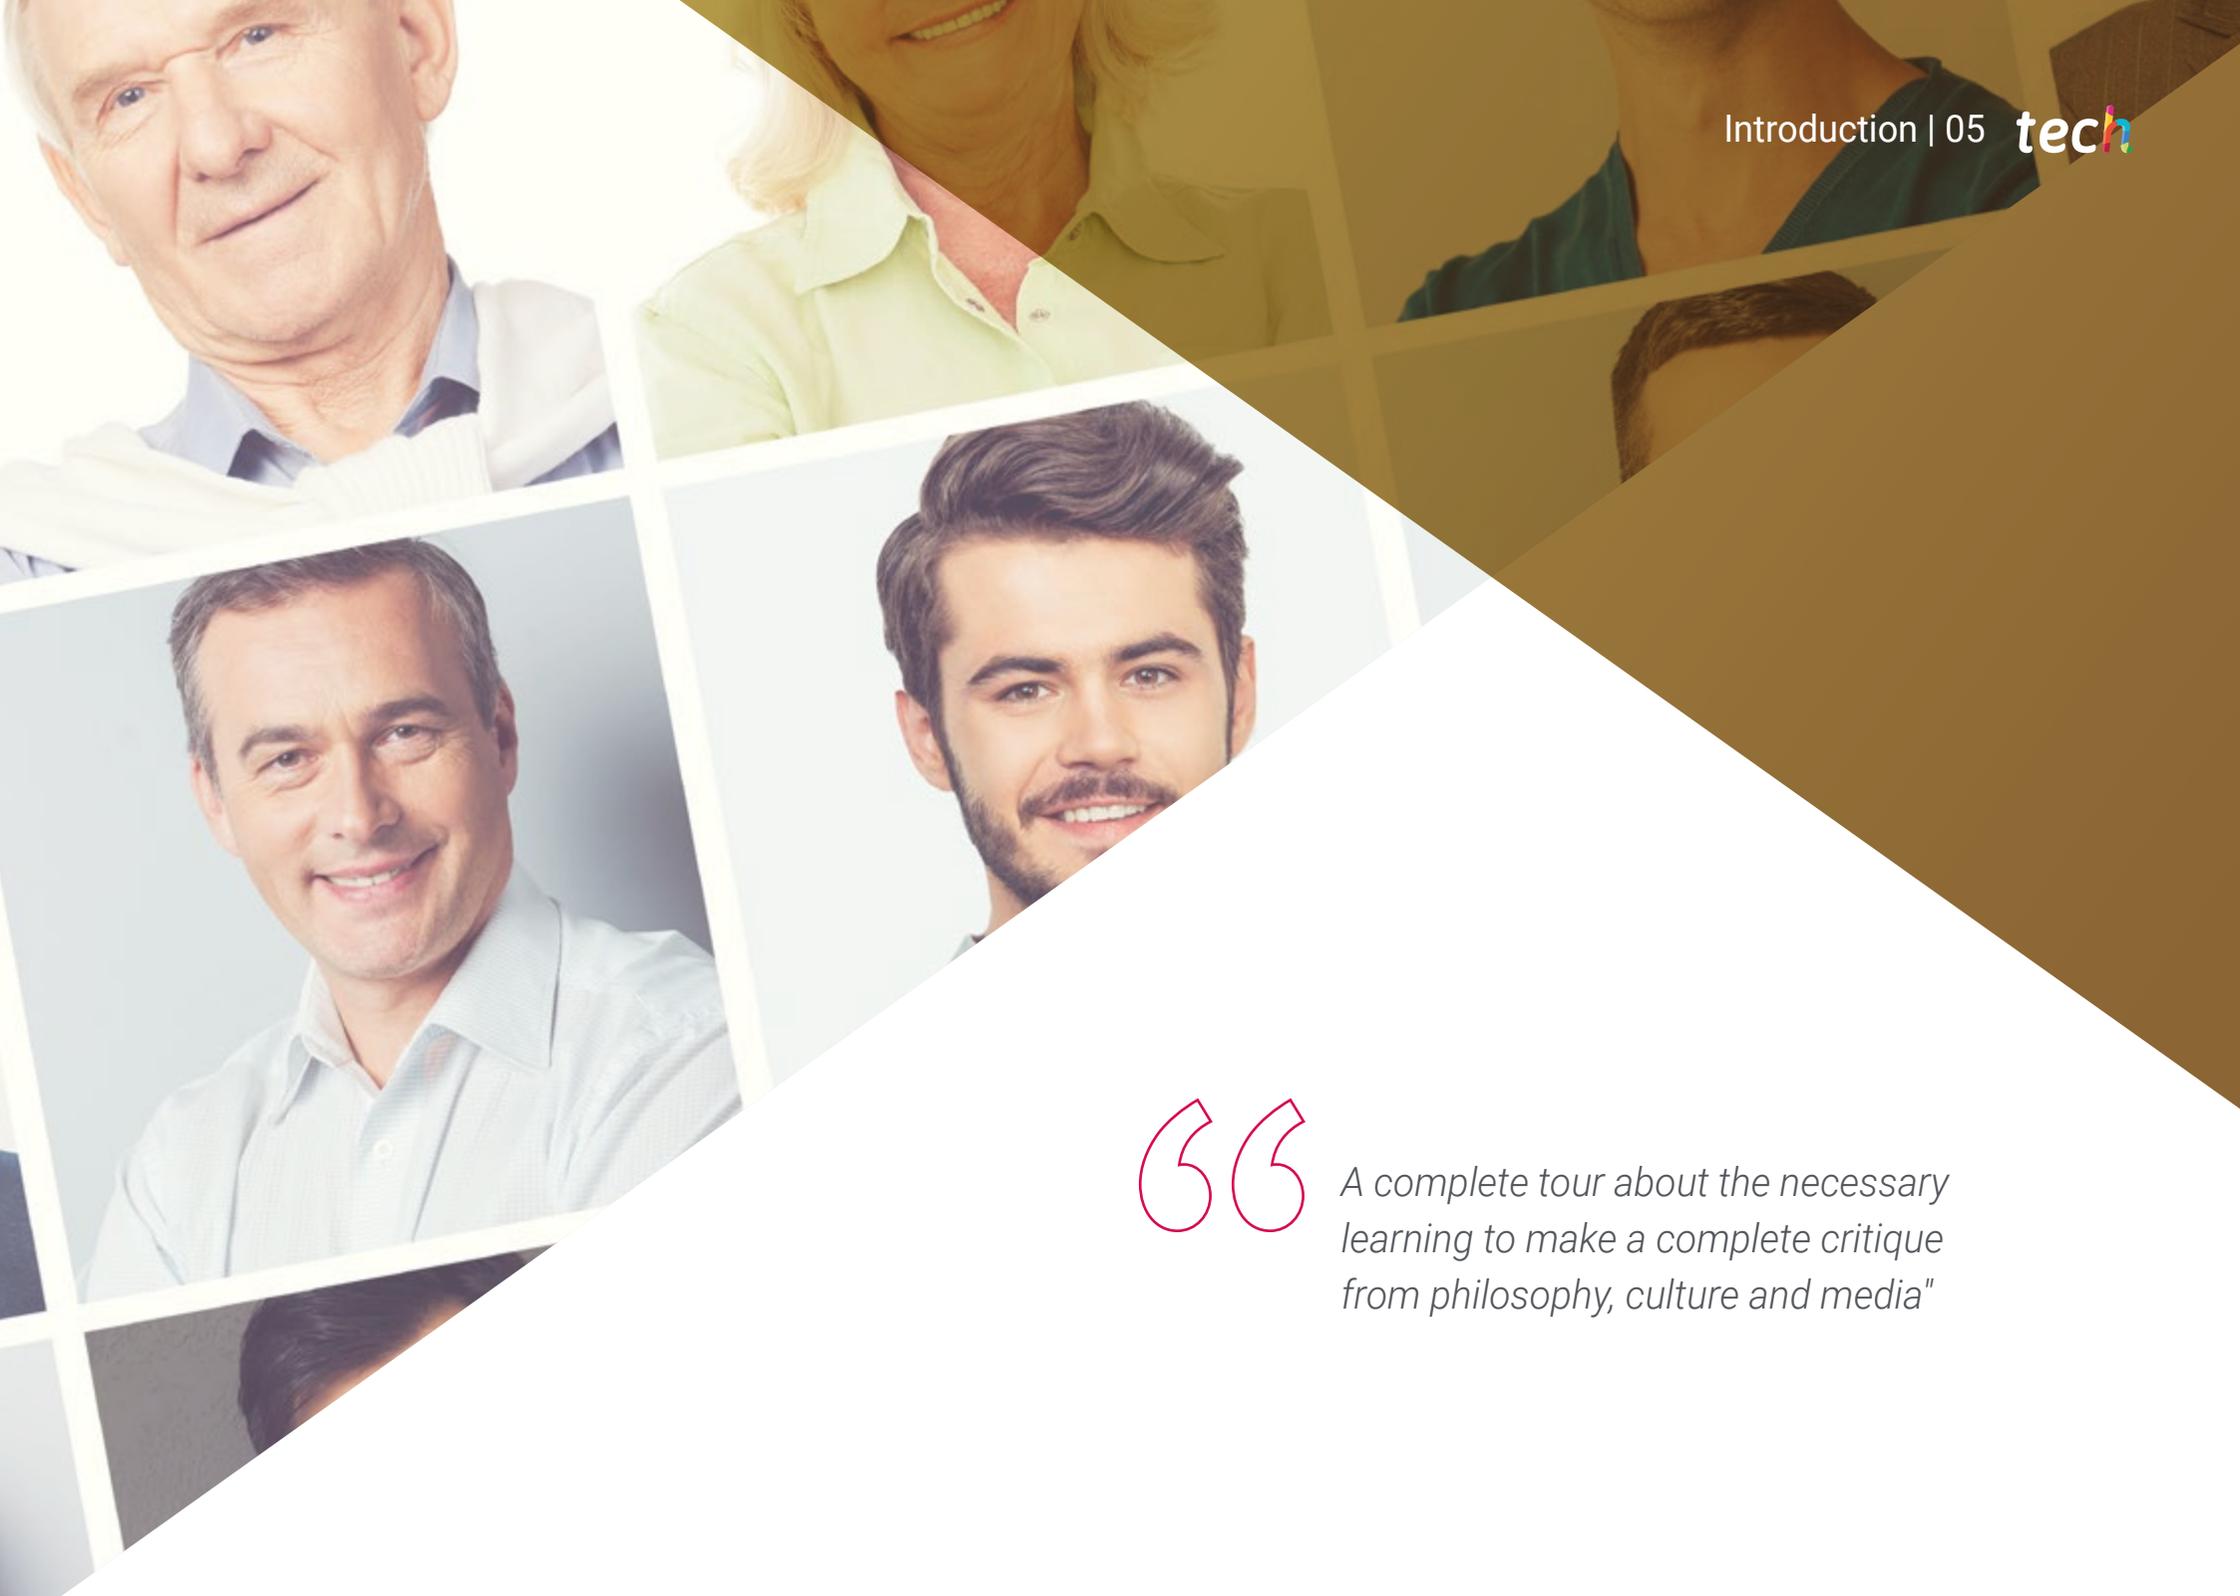

"A complete tour about the necessary learning to make a complete critique from philosophy, culture and media"

This Postgraduate Certificate will lead the student to the acquisition of the necessary knowledge to understand the different definitions of culture, from philosophy, but also from other branches of knowledge.

Through a stimulating and complete study, the student will learn to examine the cultural reality, developing a critical judgment of it.

Throughout the program, the professional will be able to apply knowledge from the systematic subjects to the analysis of society and politics. This learning will allow them to learn to develop a critical view of specific situations in the different political and social environments of the contemporary world.

In addition, with this Postgraduate Certificate the professional will learn with the most effective systems for the study of this subject.

If the goal is to improve oneself, achieve a positive change on a personal level, interact with the best and belong to the new generation of professionals capable of developing their work anywhere in the world, this may be the way to go.

A Postgraduate Certificate fully compatible with other work, personal, teaching or study commitments. Its system and teaching approach will flexibly adjust to student needs from beginning to end throughout the course. Consequently, the results are much more efficient, since the study will not become an unbearable burden, but rather, a stimulating and easy challenge to undertake and bring to fruition.

This **Postgraduate Certificate in Philosophy of Culture and Social Theory** contains the most complete and up-to-date program on the market. Its most notable features are:

- Practical cases to apply the theoretical content to real life situations
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- It contains practical exercises where the self-assessment process can be carried out to improve learning
- Algorithm-based interactive learning system for decision-making in the situations that are presented to the student.
- Special emphasis on practical learning
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

This Postgraduate Certificate will allow you to grow as a professional in philosophy and as a humanist, significantly expanding your capacity for analysis and philosophical understanding"

"Study with the largest university of the technological era and you will be part of an entity with a vocation of service, aware of the current needs of society, globally, and of the individual, in particular"

This Postgraduate Certificate is designed to make studying simple, efficient and flexible, with the maximum quality of a high-level educational program.

Culture and society, analyzed with the tools of philosophy, in a high-quality Postgraduate Certificate.

At TECH Global University we offer you the most innovative, creative and different proposal, in a dynamic institution with talent and international recognition. With a space to exchange ideas, experience and reflections. The professional will be able to share the experience in the study, through forums and other collaborative tools 100% online.

TECH Global University accompanies the student at all times thanks to an involved and committed faculty. The university's teaching staff transmits what they do in their professional performance, working from a real, lively and dynamic context. But, above all, the critical side of the student is explored, their ability to question things, their competence in problem solving, their interpersonal skills.

02
Objectives

With this Postgraduate Certificate the student will be taught through the essential contents in the approach of this discipline, learning to carry out analyses, dissertations, expositions, debates or publications related to this subject, with the support of the most complete knowledge. A Postgraduate Certificate with which the professionals will learn while enjoying the benefits of a program designed to optimize their working time to the maximum.

100

"A complete learning in Philosophy of Culture and Social Theory, with the quality of the best study materials and an online system that has won international recognition"

General Objectives

2.4.2.   Promoting Peace and International Community: Global Entities

2.4.3.   War and Conditions for Peace: Legitimate Defence and Community

A complete and effective Postgraduate Certificate that will teach you to analyze with a philosophical view the cultural and social events that occur in today's society"

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

" At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

"

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

3%
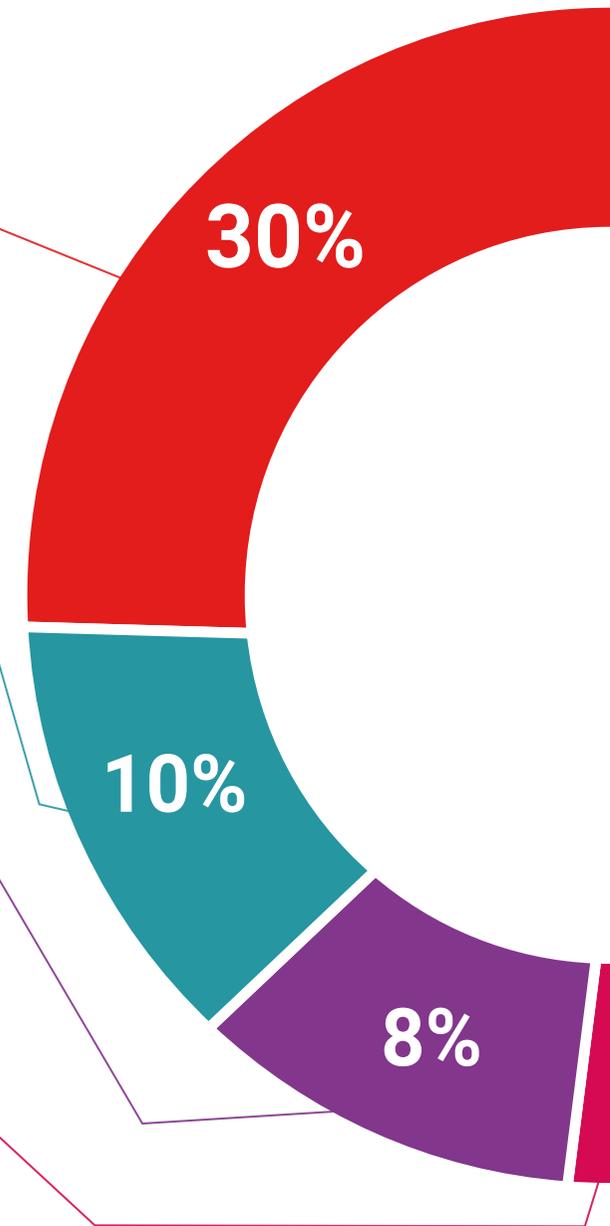

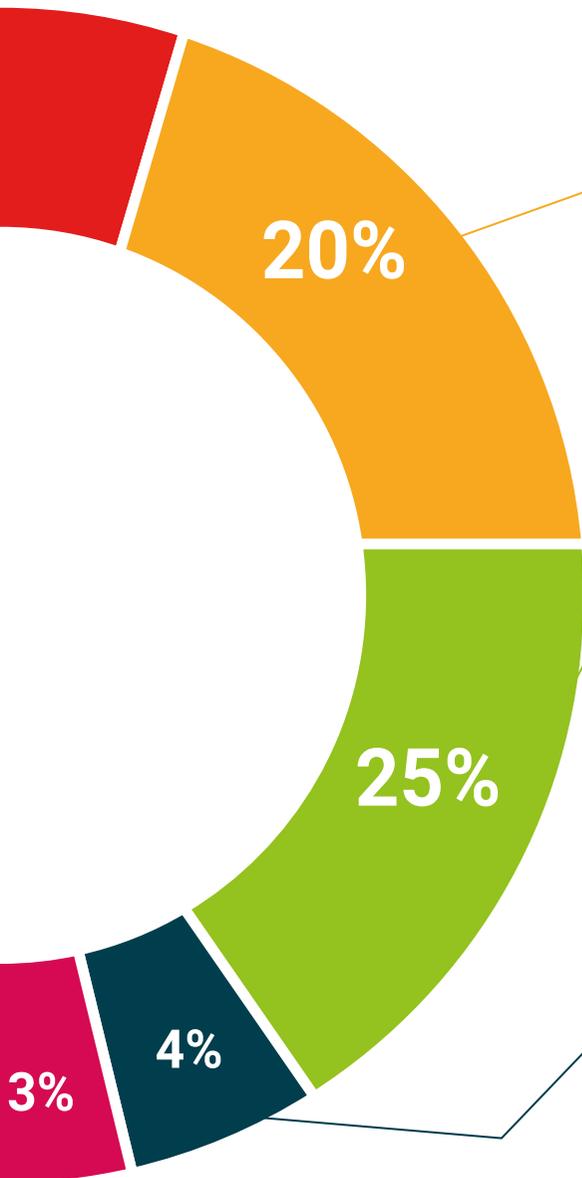

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Certificate

The Postgraduate Certificate in Philosophy of Culture and Social Theory guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

Successfully complete this program and receive your Postgraduate Diploma without having to travel or fill out laborious paperwork"

This program will allow you to obtain your **Postgraduate Certificate in Philosophy of Culture and Social Theory** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.
