01

Introduction

This complete program has been created to enable students to understand the fundamental articulation of theological activity, starting with the notions of Christ and the Church. A course that will include the role of the Church in society, as an entity or community. This knowledge is key to understanding the foundations of the Church's presence in the world, namely, Ecclesiology, the focus of this specialization program. A unique opportunity for scholars to develop in Religious Studies.

“

The analysis and understanding of all the areas involved in Ecclesiology from the critical lens of Religious Studies”

This Postgraduate Certificate is an intensive tool that will enable students to understand the fundamental theological principles of the Church, based on Sacred Scripture, tradition and the magisterium. With this program, students will be able to generate a perspective that seeks to establish a dialogue with today's society, especially with urban culture, and to analyze and understand the magisterial documents of the Second Vatican Council and the subsequent ecclesiology derived from them.

A growth from which they will be able to develop a sensitivity for the great theological and spiritual questions presented and raised by the great theological tradition of the Church, and have the sensitivity to understand the vital approaches of the culture that surrounds us and its influence on the configuration of the person and society.

This program has been created so students can acquire the essential knowledge in the field in an intensive and efficient manner. An opportunity for students to improve their qualifications with the convenience of the most effective online method in the teaching market. TECH offers the opportunity to incorporate the knowledge in this area into the specialization students receive. With this Postgraduate Certificate, students will also gain access to a way of working in which the educational method is incorporated into religious thought, in favor of a global analysis of all its implications and developments.

If you want to excel as a professional, achieve a positive change at a professional level, interact with the best through an interesting online universe and belong to the new generation of future theologians, able to develop their work anywhere in the world, this may be your path.

This **Postgraduate Certificate in Ecclesiology** contains the most complete and up-to-date program on the market. Its most notable features are:

- ♦ Practical cases that apply the theoretical content through real life situations
- ♦ The graphic, schematic, and eminently practical content with which they are conceived
- ♦ The great variety of practical exercises where the self-evaluation process can be carried out to improve learning
- ♦ An algorithm-based interactive learning system that enables decision-making in the situations presented
- ♦ Its intensive focus on practical learning
- ♦ High quality theoretical lessons, with questions to the expert, discussion forums on controversial topics and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Improve your qualifications and you will improve your professional future. Now is always the best time"

“

The greatest University in the technological era is placed at the service of the current needs of society, at a global level, and of the individual, in particular, with a transforming spirit and vocation for social change”

TECH offers its students the most innovative, creative and different proposal to contribute to the process of their professional growth, in an internationally recognized, dynamic and talented institution that makes it very easy for them to balance their specialization with their professional and personal activities. They will be able to balance their studies with a full-time job, adapting the process to their obligations and successfully completing the program without having to sacrifice everything else.

With a virtual space to exchange ideas and reflections, students will be able to share their learning experience through forums and other collaborative tools, 100% online.

We support you at all times, thanks to an involved and committed teaching staff. The teaching team transmits their expertise of their professional performance, working from a real, lively and dynamic context.

But above all, TECH explores students' critical side, their ability to question things, their problem-solving skills, as well as their interpersonal skills.

The most intensive analysis of Ecclesiology in its different aspects, in a highly intensive Postgraduate Certificate, which will allow you to master this most relevant of subjects.

The most technologically developed university in the area of e-Learning offers you the technical and human solvency of the largest Spanish-speaking, 100% online university in the world.

02

Objectives

The main objective of this program is to provide students with a complete and solvent vision of Ecclesiology and all its developments and activity throughout history till today, with this highly specialized Postgraduate Certificate: An indispensable discipline for professional theologians. Therefore, TECH has developed a program that focuses on concrete, measurable and useful objectives that will allow students to grow both on a professional and a personal level. And thus creating useful professionals for an improved society.

“

At TECH Technological University you will learn to enhance your skills, increase your critical capacity and think in a humanistic way. With the guarantee that only the best educational foundation can bring professionals”

General Objectives

- ♦ Explain the fundamental articulation of theological activity from the notions of Christ and the Church
- ♦ Generate a perspective that seeks to engage in dialogue with today's society, especially with urban culture

Today more than ever theologians need the endorsement of a solid updated body of knowledge to confront their experience with the real world with guarantees of success"

Specific Objectives

- ♦ Understand Fundamental Theology as one of the branches of Theology whose object is to understand the mystery of God in its entirety
- ♦ Explain elements of the credibility of Jesus Christ and His Church
- ♦ Discuss contemporary cultural conditions with reference to the act of faith
- ♦ Analyze and argue about the various problems surrounding credibility
- ♦ Organically present the fundamental theological principles about the Church, based on Sacred Scripture, Tradition and the Magisterium
- ♦ Analyze and understand the magisterial documents of the Second Vatican Council and the subsequent ecclesiology derived from them
- ♦ Develop a sensitivity to the great theological and spiritual questions presented and posed by the great theological tradition of the Church
- ♦ Become aware of the vital approaches of the culture that surrounds us and its influence on the configuration of the person and society

03

Structure and Content

This curriculum is designed for those who want to increase their professional competence in Religious Studies or deepen their humanistic side. Created with high quality content, it prepares students to reach the highest levels in their profession. The program has been developed in a comprehensive manner to achieve the most complete competencies in each of its areas. The teaching staff is highly qualified at both the theological and teaching levels, and they implement the best educational methodology. Because learning from the best is the easiest way to become the best.

“

Adaptable, flexible and versatile: our curriculum is designed so you can decide when, how and the amount of time and effort you wish to devote to your training. And without compromising educational efficiency”

Module 1. Ecclesiology I

- 2.8. The Mission of the Church
 - 2.8.1. Evangelization of Cultures
 - 2.8.2. The Church as Promoter of Evangelization and Communication in Urban Culture

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Certificate in Ecclesiology guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Ecclesiology** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate**, issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Ecclesiology**

Official Number of Hours: **200 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
