Introduction

The Modern Era begins with the art of the Renaissance, which marks a step in the History of Humanity. Value is given to individuality, to personal achievements through knowledge and a new cult for fame arises, a moment in which sculptures and paintings seek the way to exalt important figures. The individual was also given the importance he deserved with respect to his creations and brought to society great concepts of knowledge and personal success. For professionals in the world of Humanities, understanding everything about this stage of the History of Art will allow them to enhance their talent and awaken critical thinking, which will give them a differentiating edge in their current performance. A 100% online program structured under an innovative methodology and cutting-edge technology in today's university environment.

Interest in Nature, Humanistic Learning and Individualism were present in the late Medieval Period and became dominant in Italy during the 15th and 16th centuries. Renaissance Art History is based on these concepts, especially Humanism, which was a movement organized by the Artists and Intellectuals of the time. The different influences of advances in Science, the Advances in Medicine and the studies of the works of different ancient Philosophers developed a particular way of seeing Beauty. The first cities to use Renaissance Art were Florence, Venice and Milan.

As for the Quattrocento, this Postgraduate Certificate's subject of study, it can be said to be one of the most important periods in the European Artistic Panorama. It is situated throughout the entire fifteenth century and is the First Phase of the Renaissance that began in Florence. The program focuses on everything about the mentioned moment, Florentine Architecture, Palaces in Rome; Tuscan Sculptors and Painters; as well as on analyzing the Cinquecento and Italian Painting in the 16th century. That is the content of our very broad syllabus that will be developed in depth during the program.

For six weeks, professionals will delve into a syllabus designed under the most innovative methodology in the current online university system: Relearning, which allows students to quickly learn and understand the concepts so as to develop critical and analytical thinking. A training that includes a variety of multimedia resources and formats of theoretical and practical content, available from the first day for consultation or download from any device.A training program that includes a variety of multimedia resources and formats of theoretical and practical content, available from the first day for consultation or download from any device.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world."

Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative.

This intensive Humanities program at TECH Global University prepares you to face all the challenges in this field, both nationally and internationally. Its primary objective is to promote personal and professional growth, by helping you achieve success. For this purpose, we rely on Harvard Business school case studies with which we have a strategic Convention that allows us to use the materials used in the most prestigious university in the world.

" *We are the only online university that offers Harvard materials as teaching materials on its courses*"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University *case studies method* with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard *case studies* with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practicing Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.
