tech 06 | Introduction

Social Transformation is essential to promote Sustainable Development, the preservation of the Environment, the protection of Human Rights and Gender Equality, as well as the improvement of Education, Health and Infrastructure. However, in more and more countries, transformational processes are facing growing resistance of various kinds that hinder changes in an authoritarian manner and without respecting the freedoms of individuals.

That is why it is required that the action from the International Development Cooperation is carried out on the basis of advanced and specific strategies for each context, facilitating that the Social Transformation culminates successfully in the long term. And Humanities professionals can play a decisive role in this thanks to this program, with which they will learn about the actors involved in Cooperation projects and delve into key concepts in this area, such as Sustainable Development.

In addition, this Postgraduate Diploma will also focus on Social Communication as an actor of change, gaining an overview of the media landscape and the current situation of Press Freedom worldwide. At the same time, students will examine how feminist movements are fighting for Gender Equality in different developing countries, reviewing their historical evolution.

All this and more will be available to the student in 600 hours of innovative educational content, which will be distributed in the number and duration of study sessions that the student deems appropriate. .

This Postgraduate Diploma in Social Transformation through International Development Cooperation contains the Educational most complete and up-to-date scientific program on the market. Its most notable features are:

- The development of case studies presented by experts in Social Transformation through International Development Cooperation
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Contribute to the empowerment of women through your actions in regions where Gender Inequality is manifest"

Lead the change in the communities targeted by the International Development Cooperation considering the specificities of each of their social realities"

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Specialize from home or wherever you deem appropriate with 600 hours of innovative educational materials on Social Transformation through International Development Cooperation.

Test your skills in demanding case studies where you will have to incorporate the gender approach in development processes.

tech 10 | Objectives

General Objectives

- Provide students with advanced knowledge in International Cooperation, of a specialized nature and based on theoretical and instrumental knowledge that will allow them to acquire and develop the skills and abilities necessary to obtain a qualification as a solidarity professional
- Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- Improve professional performance and develop strategies for adapting and solving the problems of today's world, by means of scientific research in cooperation and development processes
- Disseminate the basics of the current system and develop is the critical and entrepreneurial spirit necessary to adapt to political changes within the framework of International Law

Establishes the appropriate cooperation instruments to break down the walls that prevent Social Transformation in different countries"

Module 1. The Development of Peoples: Introduction and Challenges

- Understand the importance of the development of peoples
- Become aware of the actors involved in development, why and its consequences
- Know and clarify such basic concepts as poor and impoverished
- · Become aware of the world situation and development
- Familiarize the student with the economic structure of the world

Module 2. International Development Cooperation

- Know different methods of research in International Development Cooperation
- Gain knowledge on methodologies for public policy advocacy, social communication, political change, etc
- Know the evolution and status of current debates on development
- Become familiar with the instruments of international cooperation for development, as well as the types of projects and existing NGOs
- Develop skills to work with the main vulnerable subjects involved in development cooperation actions and programs
- Understand the international cooperation system and the different members that make it up

Module 3. Social and Transformative Communication

- Prepare social communicators who can apply their knowledge at the different levels
- Identify, understand and know how to use sources, statistical techniques and computer tools to organize selected information and plan development and cooperation reports, analyses and actions
- Conduct an ethical reflection on cooperation, information, images and their applicability in specific contexts and information sources

Module 4. Equality and Cooperation

- Internalize, analyze and understand what we mean when we talk about gender, development and women's rights.
- Know the role of feminist movements in the processes of social advancement and transformation
- Intervene under gender perspectives in international development cooperation

Guest Director

Ms. Rodríguez Arteaga, Carmen

- Liaison Advisor for the 2030 Agenda at AECID
- Director of the Studies Office of the INEM Directorate
- Head of Education, Strategic Planning and Coordinator of Knowledge Networks in AECID
- Degree in Philosophy and Educational Sciences at UCM
- Specialist in Knowledge Managemen
- Expert in Educational Evaluation at OEI
- Expert in Educational Indicators and Statistics at UNED
- Expert in Development Cooperation in Education at the University of Barcelona

Management

Ms. Romero Mateos, María del Pilar

- Social Educator Specialized in Child Empowerment
- Employment training teacher
- Gender Equality Agen
- Author and collaborator in educational projects at Abile Educativa
- Co-Author of the book: 'Principeso Cara de Beso
- Postgraduate Diploma in International Development Cooperation

Professors

Mr. Cano Corcuera, Carlos

- Specialist in Planning and Management of Cooperation Development Interventions
- General Coordinator of the Spanish Cooperation in the Dominican Republic
- General Coordinator of the Spanish Cooperation in Mexico
- Degree in Biology with a major in Zoology and a minor in Animal Ecology.
- Specialization courses in the following areas: International Cooperation;
 Identification, Formulation and Monitoring of Cooperation Projects; Humanitarian
 Aid; Equal Opportunities; International Negotiations; Planning with a Gender
 Perspective; Results-Oriented Management for Development; Disability Approach in
 Cooperation Projects; European Union Delegated Cooperation, etc

Ms. Sanchez Garrido, Araceli

- Deputy Head of the Department of Cultural Cooperation and Promotion of the DRCC
- Responsible for the application of AECID's Cultural Diversity Mainstreaming Guide.
- Professor of the Master in Cultural Management at the Carlos III University of Madrid
- Degree in Geography and History, specializing in Anthropology and Ethnology of America, Complutense University of Madrid
- Member of the Faculty of Museum Curators assigned to the Museo de América de Madrid

Ms. Cordoba, Cristina

- International Cooperation Nurse Specialist
- Training and experience in International Development Cooperation Projects
- Co-founder and participant of PalSpain project
- Founder of the Youth Association APUMAK

Ms. Florez Gomez, Mercedes

- · Specialist in International Cooperation in Iberoamerica
- Director of the CECE in Montevideo
- Degree in Geography and History from the Complutense University of Madrid
- Advanced Diploma in South Cooperation
- Diploma in Humanitarian Action Institute of Studies on Conflict and Humanitarian Action
- MSc in Corporate Social Responsibility from the Pontifical University of Salamanca
- MSc in Information and Documentation from the Antonio de Nebrija University
- Specialist in Inequality, Cooperation and Development, Instituto Universitario de Desarrollo y Cooperación, Complutense University of Madrid
- Specialist in Planning and Management of Development Cooperation Projects in Education, Science and Culture (OEI)

Dr. Ramos Rollon, Marisa

- Specialist on public policies and institutions in Latin America and on the issues of democratic governance and development policies
- Coordinator of the department of Democratic Governance in the Eurosocial program
- Full Professor of Political Science at UCM
- Responsible for the Democratic Governance sector at the Spanish Agency for International Cooperation
- Professor of Political Science at the University of Salamanca
 Development Cooperation Advisor to the Vice-Rector for International Relations of
 the University of Salamanca
- Relations and Cooperation at the Complutense University of Madrid
- Doctor of Political Science from the Complutense University of Madrid in the Contemporary Latin America program
- Bachelor's Degree in Political Science with a major in International Relations and Latin American Studies from UCM

tech 30 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Humanities schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 32 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 33 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

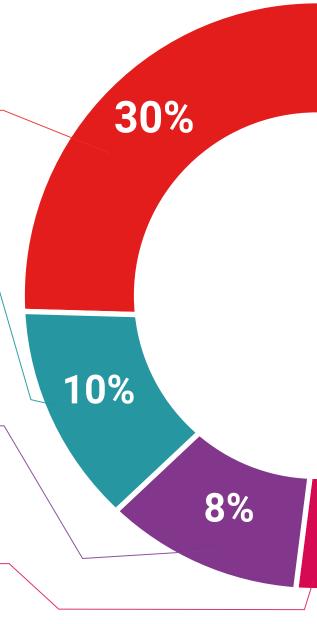

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

25%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

4%

tech 38 | Certificate

This Postgraduate Diploma in Social Transformation through International Development Cooperation contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Diploma in Social Transformation through International Development Cooperation

Official No of Hours: 600 h.

POSTGRADUATE DIPLOMA

in

Social Transformation through International Development Cooperation

This is a qualification awarded by this University, equivalent to 600 hours, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH is a Private Institution of Higher Education recognized by the Ministry of Public Education as of June 28, 2018.

June 17, 2020
