# 01

# Introduction

The adoption of cloud services is an advance in many ways over traditional physical infrastructures, in terms of efficiency, cost reduction or storage capacity. But the characteristics of these services require the skills and knowledge of experts in the field who know how to get the most out of them to improve the final result efficiently. This is the reason why TECH has designed a program that seeks to develop practical skills to adopt and integrate *cloudservices*, through an agenda that addresses topics such as Configuration and Administration of servers and cloud services. All this in a 100% online mode and with the most complete and innovative theoretical and practical content in the academic market.

“

*Become an expert in Adoption and Integration of Cloud Services in just a 6 weeks”*

The adoption of cloud services is an advance in many ways over traditional physical infrastructures, especially in terms of efficiency, scalability, cost reduction, security, flexibility and storage capacity. But cloud computing services, their advantages and features, as well as leveraging their strengths, require the knowledge of subject matter specialists and advanced skills.

This is why TECH has created a Postgraduate Certificate in Service Adoption in Cloud Infrastructures to provide students with the necessary skills to get the most out of the adoption and integration of cloud services. And this, through a syllabus that delves into aspects such as Hardware, Software, Network and Security Configuration, as well as Cloud Server Administration, Balancing Services or Configuration Parameters and Secrets.

All this, in a comfortable 100% online mode that gives total freedom to the students to organize their studies and schedules, without any limitations and without the need to move at any time of the process. In addition, with the possibility of using any device with Internet connection, to access the most complete, dynamic and updated content of the academic market.

This **Postgraduate Certificate in Adoption of Services in Cloud Infrastructures** contains the most complete and up-to-date program on the market. The most important features include:

- ◆ The development of practical cases presented by experts in Adoption of Services in Cloud Infrastructures
- ◆ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

*Access the latest and most complete content from your tablet, computer or mobile"*

“

*Acquire new skills in server configuration or in a cloud service"*

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professionals with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professionals must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned experts.

*Gain specific knowledge in Configuration Parameters and Secrets to boost your professional profile.*

*Learn all about Queue Management and Notification Services in just a few weeks and without investing too much study time.*

# 02 Objectives

The objective of this program is to address the characteristics of computing services, establish good usage practices, enhance practical skills and develop students' competencies in the Adoption of Cloud Services. All this through the most complete multimedia materials, the most updated information and the most dynamic activities in the academic market.

“

*TECH's goal is to give you the place you deserve, helping you achieve your most demanding professional goals in the IT field"*

## General Objectives

---

- ◆ Develop specialized knowledge about what infrastructures are and what motivations exist for their transformation to the cloud
- ◆ Acquire the skills and knowledge necessary to effectively implement and manage IaaS solutions
- ◆ Acquire specialized knowledge to add or remove storage and processing capacity quickly and easily, enabling you to adapt to fluctuations in demand
- ◆ Examine the scope of *Network DevOps*, demonstrating that it is an innovative approach for network management in IT environments
- ◆ Understand the challenges faced by an enterprise in *Cloud* governance and how to address them
- ◆ Use security services in *Cloud* environments such as Firewalls, SIEMS and threat protection, to secure applications and services
- ◆ Establish best practices in the use of *Cloud* Services and the main recommendations when using them
- ◆ Increase user efficiency and productivity: by enabling users to access their applications and data from anywhere and on any electronic device, VDI can improve user efficiency and productivity
- ◆ Gain specialized knowledge about Infrastructure as Code
- ◆ Identify key points to demonstrate the importance of investing in backup and monitoring in organizations

## Specific Objectives

---

- ◆ List the different computing services in each of the main *Cloud* providers
- ◆ Substantiate the advantages of interoperability between services
- ◆ Acquire the skills necessary to deploy the application in *Cloud* and provide it with additional features by incorporating new services
- ◆ Determine how to make our application resilient through autoscaling

“

*Acquire specific knowledge and test your new skills with the wide variety of practical activities available on the Virtual Campus"*

03

# Course Management

This syllabus has the best team of experts in Adoption of Services in *Cloud* Infrastructures, in TECH's quest to offer the highest quality and most effective teaching. Therefore, the outstanding professionals who make up the teaching staff of this program, have designed the most accurate and innovative theoretical and practical material, able to meet the most demanding expectations of students.

“

*Succeed in one of the areas with the greatest potential in the field of Cloud Infrastructures, with the help of the best teaching team"*

## Management

### Mr. Bressel Gutiérrez-Ambrossi, Guillermo

- ♦ Specialist in Systems Administration and Computer Networks
- ♦ Storage and SAN Network Administrator at Experis IT (BBVA)
- ♦ Network Administrator at IE Business School
- ♦ Graduate in Computer Systems and Network Administration at ASIR (ASIR)
- ♦ Ethical Hacking course at OpenWebinars
- ♦ Powershell course at OpenWebinar

## Professors

### D. Intriago Narváez, Kevin

- ♦ Datacenter & Cloud Architect at Claro Ecuador
- ♦ IT Infrastructure Engineer at Claro Ecuador
- ♦ Senior IT Infrastructure Engineer at Credimatic
- ♦ Infrastructure Administrator at Solvesa
- ♦ Massive Front End Technical Support
- ♦ Computer Systems Engineer at the University of Guayaquil
- ♦ Bachelor's Degree in Networking and Operating Systems from Escuela Superior Politécnica del Litoral
- ♦ Master's Degree in Management Information Systems from Escuela Superior Politécnica del Litoral

# 04

# Structure and Content

The syllabus has been structured and planned by a team of experts in Adoption of Services in Cloud Infrastructures, who have poured their experience and knowledge, in order to offer the most complete, innovative and dynamic content possible. All this, based on the pedagogical methodology of *Relearning*, in which TECH is a pioneer and which guarantees the best possible assimilation of the essential concepts of the subject, without the need to spend too much time studying.

“

*A tailor-made content that will allow you to improve your skills in Cloud Infrastructures without leaving home and with total freedom"*

## Module 1. Adoption of Services in Cloud Infrastructures

- 1.1. Configuration of a Cloud Server
  - 1.1.1. Hardware Configuration
  - 1.1.2. Software Configuration
  - 1.1.3. Network and Security/Safety Configuration
- 1.2. Configuration of a Cloud Server
  - 1.2.1. Assigning Permissions to my Cloud Server
  - 1.2.2. Configuring Security Rules
  - 1.2.3. Deployment of a Cloud Server
- 1.3. Administration of a *Cloud* Server
  - 1.3.1. Management of Storage Units
  - 1.3.2. Network Management
  - 1.3.3. Security Copies Management
- 1.4. Persistence
  - 1.4.1. Decoupling our *Cloud* Service
  - 1.4.2. Persistence Service Configuration
  - 1.4.3. Integration of the BB.DD. with our *Cloud* Service
- 1.5. Autoscaling
  - 1.5.1. Image Generation of our Server
  - 1.5.2. Creation of Autoscaling Groups
  - 1.5.3. Definition of Auto Scaling Rules
- 1.6. Balancing Services
  - 1.6.1. Balancing Services
  - 1.6.2. Generation of a Load Balancer
  - 1.6.3. Connecting the Balancer to our *Cloud* Service
- 1.7. Content Delivery Services
  - 1.7.1. Content Delivery Services
  - 1.7.2. Configuration of Content Delivery Services
  - 1.7.3. Integration of the CDN to our *Cloud* Service

- 
- A person's hand is holding a silver smartphone in front of two computer monitors. The monitors display code in a dark-themed editor. The background is a bright, out-of-focus office setting with a window.
- 1.8. Configuration Parameters and Secrets
    - 1.8.1. Configuration Parameters Management Services
    - 1.8.2. Secrets Management Services
    - 1.8.3. Integrating Configuration Services and Secrets with our *Cloud Service*
  - 1.9. Queues Management Services
    - 1.9.1. Decoupling Our Application
    - 1.9.2. Configuring a Queueing Service
    - 1.9.3. Integrating the Queue with Our *Cloud Service*
  - 1.10. Notification Services
    - 1.10.1. Notification Services in the Cloud
    - 1.10.2. Configuration of a Notification Service
    - 1.10.3. Adding Notifications to Our *Cloud Service*

“ Access all the content right out of the box and a wide variety of additional material, with which to specialize your knowledge in the aspects of *Cloud Services Adoption and Deployment* that interest you most”

# 05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: ***Relearning***.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn to solve complex situations in real business environments through collaborative activities and real cases.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method has been the most widely used learning system among the world's leading Information Technology schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

# 06 Certificate

The Postgraduate Certificate in Adoption of Services in Cloud Infrastructures guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Adoption of Services in Cloud Infrastructures** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Adoption of Services in Cloud Infrastructures**

Modality: **online**

Duration: **6 weeks**

Accreditation: **6 ECTS**

\*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
