# 01 Introduction

Token taxation is a complex and constantly evolving issue that can vary from country to country and jurisdiction to jurisdiction, as each has its own tax legislation. However, there are common aspects that apply in many cases. It is for this reason that the IT professional must be at the forefront of legal issues, whether it is a specific law or a general one. Taking into account the importance of legal issues in this area, TECH has developed a program that gives the professional the possibility of acquiring knowledge on Taxation of Tokens, direct taxes and patrimony. All this can be found in a 100% online format that gives them the opportunity to coordinate their daily activities since they will not be subject to fixed schedules.

# tech 06 | Introduction

Since tokens perform similar functions to those of a conventional currency, but in the digital realm, it is necessary to establish a tax regulation for transactions made with tokens. However, so far no specific tax framework has been proposed for digital currencies in any particular country. So far, general rules ranging from taxation of digital gains to taxation of trade in such assets apply.

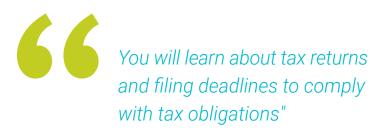

Meanwhile, digital assets continue to grow, and increasingly require legislation to regulate their validity and determine their status. For this reason, it is essential for IT professionals to keep up to date on the taxation of these digital currencies. In this way, they will be able to offer adequate information and legal advice in relation to any buying and selling activity, whether in the business or personal sphere, and in any project in which they are involved.

It is for this reason that TECH has developed this Postgraduate Certificate in Taxation of Tokens, with the purpose of giving the professional legal knowledge around these virtual currencies, a program that will allow them to record and report the holding and transactions of tokens in tax returns, as well as the tax obligations associated with the exchange, including the treatment of capital gains and losses, income and deductions.

An academic proposal offered in a 100% online modality that allows students to access a digital library where they will have access to multimedia materials such as specialized readings and interactive summaries, which they can study at any time and place since they will only need a device with an Internet connection.

This **Postgraduate Certificate in Taxation of Tokens** contains the most complete and up-to-date program on the market. The most important features include:

- The development of practical cases presented by experts in Finance and Blockchain
- The graphic, schematic and practical contents of the book provide technical and practical information on those disciplines that are essential for professional practice
- The practical exercises where the self-evaluation process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- The availability of access to the contents from any fixed or portable device with Internet connection

You will master the direct taxes, their most relevant characteristics and identify those that most affect token income"

The program's teaching staff includes professionals from sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will allow the professional a situated and contextual learning, that is, a simulated environment that will provide an immersive training programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, in which the professional will have to try to solve the different professional practice situations that will arise throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

You will discover how wealth taxes can influence digital assets.

You will understand the tax obligations in different countries and the general regulations that apply to each.

# tech 10 | Objectives

### **General Objectives**

- Analyze the scope of the Fintech revolution
- Identify the origin and reasons for the emergence of Fintechs
- Observe the differential value provided by Fintechs
- Develop the concept of tokenization
- Analyze the tokenization process
- Identify which projects can be tokenized
- Establish the advantages of tokenization
- Provide an in-depth understanding of Blockchain technology and its implementation in Asset tokenization
- Analyze the technical specifications of Tokens and their standards, Blockchain types, security in Blockchain networks, smart contracts, success stories and the advantages and disadvantages of Asset tokenization
- Apply the most advanced concepts and tools to carry out token and cryptocurrency trading transactions in a secure and efficient way

# **Specific Objectives**

- Examine the different types of tokens and their particular tax characteristics.
- Break down the tax obligations associated with the purchase, sale, exchange, mining, staking, staking of tokens, etc. including the treatment of capital gains and losses, income and deductions
- Analyze how token holdings and transactions should be recorded and reported on tax returns, addressing filing requirements and deadlines
- Develop case studies and real-world examples to illustrate how tax rules apply in different scenarios and specific situations involving tokens

Thanks to TECH, you will be an expert in information returns and the deadlines and information needed to comply with tax obligations"

# tech 14 | Course Management

#### Management

### Dr. Gómez Martínez, Raúl

- Founding Partner and CEO of Open 4 Blockchain Fintech
- Founding Partner of InvestMood Fintech
- Managing Director of Apara
- PhD in Business Economics and Finance from King Juan Carlos University of Madric
- Degree in Economics and Business Administration from Complutense University of Madric
- Master's Degree in Economic Analysis and Financial Economics from complutense University of Madrid

#### **Professors**

#### Mr. García Gorriti, Juan

- Consultant specialized in corporate taxation
- Specialist in Blockchain and cryptoassets
- Entrepreneur helping to the creation of innovative companies from the legal/tax branch
- Private teaching in the legal and administrative field

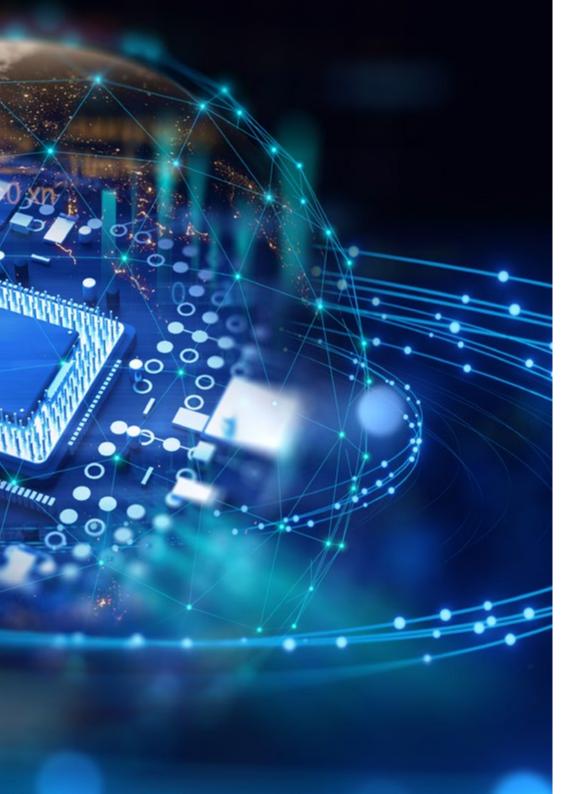

# tech 18 | Structure and Content

#### Module 1. Taxation of Tokens

- 1.1. Indirect Taxes
  - 1.1.1. Indirect Taxes Features
  - 1.1.2. Types and Examples of Indirect Taxes
  - 1.1.3. Indirect taxes Applied to Tokens
- 1.2. Taxation of the Purchase of a Token (VAT)
  - 1.2.1. Application of Indirect Taxes on Different Types of Tokens
  - 1.2.2. Types, Settlements and Deadlines for their Presentation.
  - 1.2.3. Methods of Control by the Administration
- 1.3. Direct Taxes. Relevant Features
  - 1.3.1. Direct Taxes
  - 1.3.2. Types and Examples of Direct Taxes
  - 1.3.3. Income Taxes
- 1.4. Wealth Taxes
  - 1.4.1. Concept of the Tax
  - 1.4.2. Assets on which Wealth Tax is Levied
  - 1.4.3. Countries of Application
- 1.5. Other Direct Taxes
  - 1.5.1. Features
  - 1.5.2. Examples of these Direct Taxes
  - 1.5.3. Countries of Application
- 1.6. Token Sale Taxation. Income
  - 1.6.1. Application of Direct Taxes on Different Types of Tokens
  - 1.6.2. Different Types of Token Yields
  - 1.6.3. Income
  - 1.6.4. Different Wealth Taxes at the Global Level
  - 1.6.5 Others
- 1.7. Other Taxes to be Applied
  - 1.7.1. Informative Declarations
  - 1.7.2. Examples, Deadlines and Information in Informative Returns
  - 1.7.3. Other Tax Matters

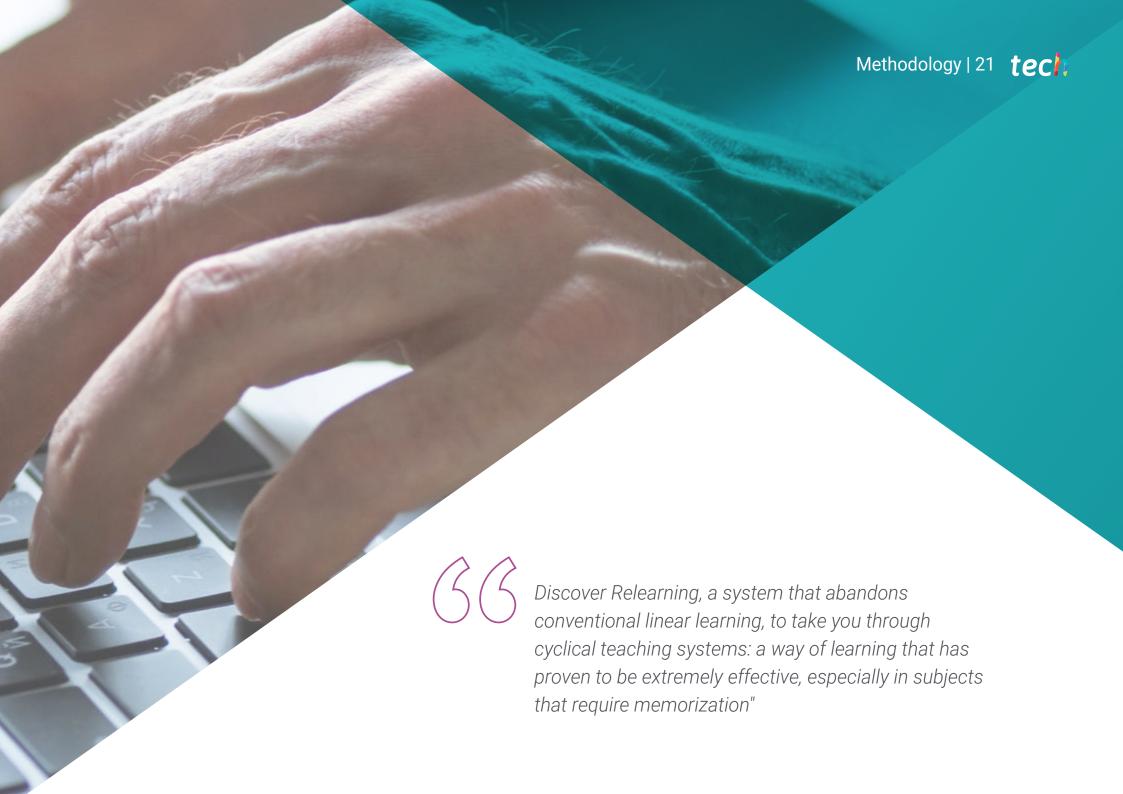

# Structure and Content | 19 tech

- 1.8. International Taxation
  - 1.8.1. International Taxation. Principles
  - 1.8.2. European Union (MICA)
  - 1.8.3. Analysis of Different Regulations for the Same Operation
- 1.9. Tax Havens
  - 1.9.1. Features and Types
  - 1.9.2. Prevention and Control of Tax Havens
  - 1.9.3. Influence on Cryptoassets
- 1.10. Tax Planning
  - 1.10.1. Tax Planning. Concept
  - 1.10.2. Tax Planning for Individuals and Companies
  - 1.10.3. International Taxation for Cryptoassets (CBDCs). Evolution and Trends

You will delve into tax havens and their relationship with cryptoassets, their characteristics, and prevention and controlefforts"

# tech 22 | Methodology

#### Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

#### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading Information Technology schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

#### Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

# Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

#### This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

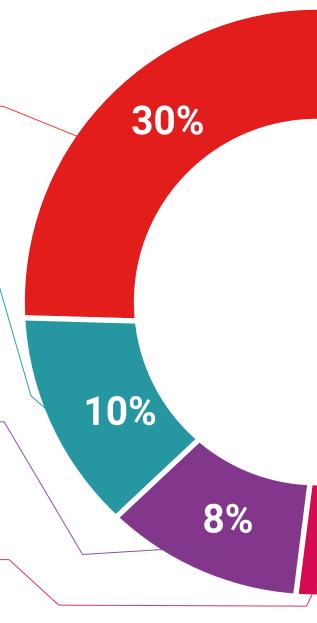

#### **Practising Skills and Abilities**

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

# Methodology | 27 tech

25%

#### **Case Studies**

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

# tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Taxation of Tokens** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Taxation of Tokens

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

Mr./Ms. \_\_\_\_\_\_, with identification document \_\_\_\_\_\_ has successfully passed and obtained the title of:

#### **Postgraduate Certificate in Taxation of Tokens**

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
