01 Introduction

With this program, students will acquire the knowledge required for the installation, administration, configuration and security of the *Microsoft Internet Information Services (IIS)* web server as well as the free Apache web server. In turn, throughout this program, they will learn the operation, structure and handling of the HTTP protocol, among other issues of great interest.

It is a unique opportunity to specialize and stand out in a sector with a high demand for professionals.

“

Completing this Postgraduate Certificate will place software and computer systems engineering professionals at the forefront of the latest developments in the sector”

Specialize in Web Server Administration with this high-quality program meticulously designed by professionals with extensive experience in the field. Students will learn about the concept, operation, architecture, resources and contents of a web server and will acquire the knowledge required for the correct execution of the audit process and internal computer control, among other issues of great interest that will be addressed throughout this program.

With this program, the student will have access to the most advanced teaching resources and will have the opportunity to study a program that brings together the most in-depth knowledge in the field. A group of highly scientifically qualified professors with extensive international experience will provide students with the most complete and up-to-date information on the latest advances and techniques in Software and Computer Systems Engineering.

The syllabus covers the main current topics in Software and Computer Systems Engineering in such a way that whoever masters them will be prepared to work in this field. Therefore, it is not just another diploma in your backpack, but a real learning tool to approach the topics of the specialty in a modern, objective way and with the ability to make a judgment based on today's most cutting-edge information.

It should be noted that, since this is a 100% online course, the student is not restricted by fixed schedules or having to attend face to face classes, rather they can access the contents at any time of the day, balancing their work or personal life with their academic life.

If they want to differentiate themselves from others and be capable of designing complex systems engineering projects, this is the program for them.

This **Postgraduate Certificate in Web Server Administration** contains the most complete and up-to-date educational program on the market. The most important features include:

- ◆ Practical cases presented by experts in Web Server Administration
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Special emphasis on innovative methodologies in Web Server Administration
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Learn to design, evaluate and manage software engineering projects thanks to this high-quality program"

Specialize in computer systems with the help of professionals with extensive experience in the sector”

Its teaching staff includes professionals belonging to the field of Web Server Administration, who contribute to this program the experience of their work, as well as recognized specialists from reference societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive learning programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Software Security.

This program comes with the best educational material, providing you with a contextual approach that will facilitate your learning.

This 100% online Postgraduate Certificate will allow you to combine your studies with your professional work.

02 Objectives

The Postgraduate Certificate in Web Server Administration is aimed at facilitating the professional's performance so that they can acquire knowledge of the main novelties in this field, which will allow them to practice their profession with the highest quality and professionalism.

“

Our goal is for you to become the best professional in your sector. And for this we have the best methodology and content”

General Objectives

- ◆ Acquire new knowledge in Software and Computer Systems Engineering
- ◆ Acquire new skills in terms of new technologies and the latest software developments
- ◆ Process the data generated in Software and Computer Systems Engineering activities

Improving your skills in the field of Web Server Administration will allow you to be more competitive. Continue your studies and give your career a boost"

Specific Objectives

- ◆ Know the concept, operation, architecture, resources and contents of a web server
- ◆ Understand the functioning, structure and HTTP protocol handling
- ◆ Understand the concept of distributed multi-server architectures
- ◆ Master the functioning of an application server and another proxy
- ◆ Analyze the different web servers that are trending in today's market
- ◆ Understand the process of usage statistics and load balancing on web servers
- ◆ Acquire the necessary knowledge for the installation, administration, configuration and security of the Microsoft Internet Information Services (IIS) web server as well as the free Apache web server

03

Structure and Content

The structure of the contents has been designed by the best professionals in the sector, with extensive experience and recognized prestige in the profession, and aware of the benefits that the latest educational technology can bring to higher education.

“

We have the most complete and up-to-date program on the market. We strive for excellence and for you to achieve it too"

Module 1. Web Server Administration

- 1.1. Introduction to Web Servers
 - 1.1.1. What is a Web Server?
 - 1.1.2. Architecture and Operation of a Web Server
 - 1.1.3. Resources and Contents on a Web Server
 - 1.1.4. Application Servers
 - 1.1.5. Proxy Servers
 - 1.1.6. Main Web Servers on the Market
 - 1.1.7. Web Server Usage Statistics
 - 1.1.8. Web Server Security
 - 1.1.9. Load Balancing on Web Servers
 - 1.1.10. References
- 1.2. HTTP Protocol Handling
 - 1.2.1. Operation and Structure
 - 1.2.2. Request Methods
 - 1.2.3. Status Codes
 - 1.2.4. Headers
 - 1.2.5. Content Coding Code Pages
 - 1.2.6. Performing HTTP Requests on the Internet using a Proxy, Livehttpheadersor Similar Method, Analyzing the Protocol Used.
- 1.3. Description of Distributed Multi-Server Architectures
 - 1.3.1. 3-Layer Model
 - 1.3.2. Fault Tolerance
 - 1.3.3. Load Sharing
 - 1.3.4. Session State Stores
 - 1.3.5. Cache Stores
- 1.4. Internet Information Services (IIS)
 - 1.4.1. What is IIS?
 - 1.4.2. History and Evolution of IIS
 - 1.4.3. Main Advantages and Features of IIS7 and Later Versions
 - 1.4.4. IIS7 Architecture and Later Versions

- 1.5. IIS Installation, Administration and Configuration
 - 1.5.1. Preamble
 - 1.5.2. Internet Information Services (IIS) Installation
 - 1.5.3. IIS Administration Tools
 - 1.5.4. Web Site Creation, Configuration and Administration
 - 1.5.5. Installation and Management of IIS Extensions
- 1.6. Advanced Security in IIS
 - 1.6.1. Preamble
 - 1.6.2. Authentication, Authorization, and Access Control in IIS
 - 1.6.3. Configuring a Secure Website on IIS with SSL
 - 1.6.4. Security Policies Implemented in IIS 8.x
- 1.7. Introduction to Apache
 - 1.7.1. What is Apache?
 - 1.7.2. Main Advantages of Apache
 - 1.7.3. Main Features of Apache
 - 1.7.4. Architecture
- 1.8. Apache Installation and Configuration
 - 1.8.1. Initial Installation of Apache
 - 1.8.2. Apache Configuration
- 1.9. Installation and Configuration of the Different Apache Modules
 - 1.9.1. Apache Module Installation
 - 1.9.2. Types of Modules
 - 1.9.3. Secure Apache Configuration
- 1.10. Advanced Security
 - 1.10.1. Authentication, Authorization and Access Control
 - 1.10.2. Authentication Methods
 - 1.10.3. Secure Apache Configuration with SSL

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career”*

The case method has been the most widely used learning system among the world's leading Information Technology schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

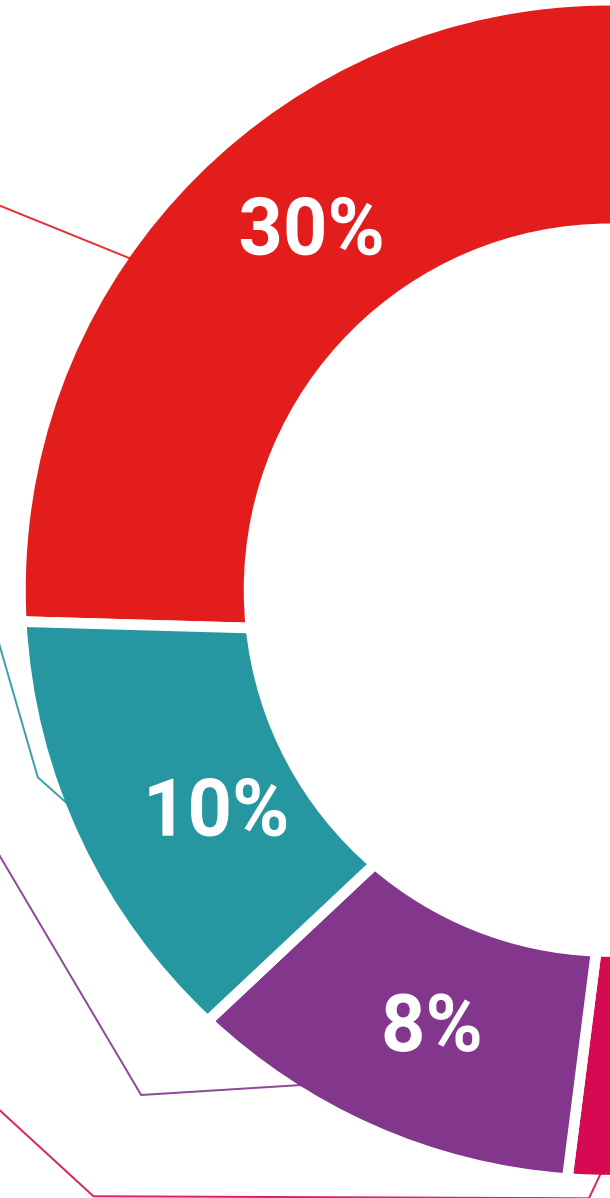

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05 Certificate

The Postgraduate Certificate in Web Server Administration guarantees students, in addition to the most rigorous and up-to-date education, access to a qualification issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Web Server Administration** contains the most comprehensive and up-to-date program on the market.

After passing the assessments, the student will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Web Server Administration**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
